

THE ATTENTION OF AGENTS

*Is Called to the Following Works which are
among our Standard Publications.*

DR. MANNING'S STOCK DOCTOR AND LIVE STOCK ENCYCLOPÆDIA

Is one of our Standard Works, and is having a very great sale. We have the highest testimonials from all the leading stock men of Canada, who are among our patrons.

To thoroughly experienced agents with a knowledge of stock and farming it offers better inducements than any other book.

No others should attempt its sale as it is a large and expensive book, and only the right class of men can sell it.

HISTORY OF THE SEA

Is a first-class work and having a large sale.

OUR FAMILY BIBLES

are without doubt the best in the market. Agents that sell them will use no other as they are finer and contain more valuable features than any others.

We have both old and new versions of the New Testament, in large type in parallel columns, comparative style, free of charge when wanted. All other publishers make a charge usually of one dollar for this. We guarantee to give from five to ten per cent. better on Bibles than any other publisher. As we are the largest Subscription House in Canada, we can afford to do better than others. We have a large export trade in our books to foreign countries, which no other house in Canada has—having exported over a million dollars worth of books during the past three years.

This enables us to sell cheaper and make better books than we otherwise could.

THE ROYAL PATH OF LIFE.

Although all our books are good we would especially recommend our "ROYAL PATH OF LIFE" in sections where it has not been sold. All are in love with the book who know it, as over half a million copies have been sold in the United States, being about double that of any other subscription book ever published, it is pretty well known.

We are issuing the steel plate edition. We have numerous agents taking forty and fifty orders a week for it, and when an agent has once sold this book he will sell no other, and no other book has ever given such satisfaction. The second canvass often pays better than the first. We are in a position to supply this work on extra reasonable terms, as we are manufacturing them in such large quantities both for home use and foreign shipment.

We think our instructions on this book the best that has ever been written, and any agent who follows them must succeed.

MANITOBA AND THE GREAT NORTH-WEST.

(By Professor Macoun and Principal Grant.)

A few more Agents can have profitable employment on this great work.

We also act as general Canadian Branch of National Publishing Co'y in Philadelphia, and will supply any of their publications on best terms.

Agent has sold twenty copies.
