## Employ the Electric Vacuum Cleaner to Do Your Spring Housecleaning

We Recommend the "Electro-Vac," a Durable, Efficient Machine at the Moderate Price of \$27.50

AND THIS moderate price is a very strong argument in its favor, for it is marked at the same figure as the usual selling price in the United States, the place of its manufacture.

To such a point of perfection have its various features been brought, however, that, despite the low price and its lightness (it weighs only eleven pounds), it is remarkably efficient, and is distinguished by these special features:—

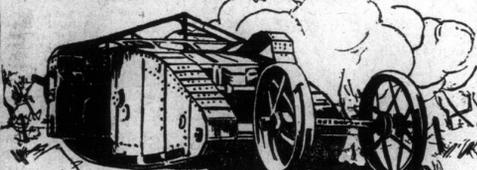

- A graded scale bar, making it possible to adjust the suction regulator for rugs of either very short or very long pile.
- A motor that is fully guaranteed by its maker (Independent of the guarantee of the Electro-Vac)—placed horizontally and so assembled that it cannot come out of position.

- A tipping device by which the machine can be raised when necessary to run from one rug to another.
- Two auto roller bearing wheels which do not need oiling.

- Oil reservoir which insures a constant supply of oil, prevents over-heated bearings and needs filling only once a year.
- A self-adjusting brush located in the nozzle and so arranged that it cannot get out of order.
- An encasement of nickel pressed steel, which is extremely durable. The price of the Electro-Vac is \$27.50, Extra attachments, 7.00
