BEWARE OF TENDER, INFLAMED GUMS

Pyorrhoea, with a premature loss of teeth, is almost inevitable if you do not properly care for your gums. Here is the explanation:

As you age, the body tissues naturally relax. You see this tissue loosening in the neck. It goes on in your gums, too. As you grow older, your gums shrink below the normal gum line. Through lack of care they become spongy and inflamed. Then you have Pyorrhoea (Riggs' Disease). Four out of five people over forty have Pyorrhoea. And many under forty, also.

Don't let a tender gum spot develop. These tender spots breed disease germs which enter the system through tiny openings—infected the joints or tonsils—or causing other ailments. Immediately get Forhan's, which positively prevents Pyorrhoea if used in time and used consistently. Forhan's tones the gums and hardens them. They in turn keep the teeth healthy. Brush your teeth with Forhan's. It cleans them scientifically—keeps them white and clean.

If gum-chirulage has already set in, start using Forhan's and consult a dentist immediately for special treatment. See and do tubes. All Druggists.

Blockade Holds Till PEACE TREATY HAS BEEN RATIFIED BY GERMANY

Paris, June 30.—(By the Associated Press).—Official notification to Germany is that the blockade will not be raised until the treaty is ratified by Germany. This is in the form of a resolution adopted by the Council of Four and presented to the German delegation before its departure for Berlin. This is regarded in conference circles as a sure plan for securing a speedy ratification

because of Germany's food and raw material needs.

As Russia was practically blockaded as a result of the blockade against the Central Powers, the opinion is held that when the blockade against them ceases there will be no blockade against Russia. However, Soviet Russia's lack of credit and inability to make financial arrangements are looked upon by financial advisers as a bar to Russia's resumption of trade on a large scale.
