The Compiler of the NEWFOUNDLAND ALMANAC, encouraged by the success which attended his first publication, has great pleasure in obeying the numerous calls with which he has been favoured for its continuance. In the present work he has introduced much additional matter, which he trusts will evince his desire to make it as generally useful and as deserving of public support as possible, especially the regulations of the Post Office, as lately established—rendered, he hopes, in a concise and intelligible form. The lists of the several officers in the different departments of the government have undergone a complete revision and correction.

For the astronomical calculations the Compiler is, as before, indebted to the Hon. J. M. SPEARMAN, Collector of Her Majesty's Customs, to whom he again begs to tender his warmest acknowledgments; and to those persons who may be disposed to communicate local information he will at all times be much obliged.

Errata.
