SCIENCE.

The only weekly Scientific Journal in America published for the educated reading public in general, and not catering to any particular trade, profession or branch of science.

ACCURATE MAPS.

SCIENCE is the only American journal that systematically publishes Accurate Maps of those regions which attract, from time to time, the world's attention. The readers of SCIENCE have recently had large and trustworthy Maps of the Isthmus of Panama, Roumelia, Afghanistan, the Polar Regions, the Congo Free State, New Zealand, showing location of recent volcanic disturbances, and other centres of interest.

POLITICAL SCIENCE.

SCIENCE is now presenting a discussion on disputed questions in Political Science, between the adherents of the so-called old and new schools. To this discussion able articles have been contributed by Professors Sumner and Hadley of Yale, Laughlin and Taussig of Harvard, Ely of Johns Hopkins University, James of Philadelphia, Simon Newcombe of Washington, and others.

TERMS:—Subscription for one year, U. S. and Canada, \$5; To foreign countries, \$6; Trial subscription, for three months, \$1; Science with Political Science Quarterly, \$6.50; Science with Nature, \$10.25.

"The value of this comprehensive scientific weekly to the student, the scientific worker, the manufacturer, and to the whole of that large and daily-growing class to which scientific knowledge is a necessity, can hardly be over-estimated. With this month (June) closes the seventh volume and the public will be glad to learn that the publishers intend to so enlarge the scope of the journal as to keep its readers au courant with the progress of scientific investigation in all its fields. The article on artificial butter, of which we gave a summary, the map of the oil and gas wells of Ohio in the last number, the letters from correspondents at London, Paris, Vienna, St. Petersburg, Tokio, and elsewhere, the important papers on economics from such men as Sumner, Newcomb, Ely, and Seligman, and the excellent reviews and comments give evidence of the wide range of investigation and discussion dealt with in *Science*. No student, business or professional man should be without it."—*Montreal Gazette*, July 6, 1886.
