

SCOTT'S EMULSION

SOME of the problems the children bring home from school are too difficult for us to solve, but we often have more difficult questions than these. What shall be done with the delicate boy or girl who keeps thin and pale, who does not develop and grow like the other children?

SCOTT'S EMULSION

will solve this problem easily. It is new life for backward and poorly developed children. They don't object to it. They like it and even become fond of it.
