

straighter grained, is easier split and stands exposure to the air longer. Chestnut commences to bear seed when eight to ten years old, and continues to do so to a very old age, but regular and plentiful crops begin only after the twentieth year. The yield per tree averages between $1\frac{1}{2}$ and 3 bushels or even more. The chestnut is a long-lived tree, attaining an age of 400 to 600 years.
