

## Look at These Pictures

### WHAT A TRANSFORMATION!

How came this change? Is it the result of years of toil and expensive labor? Stump-pulling is such hard work—the hardest work—this cannot be the result of burning out, because burning out stumps destroys the fertile elements of the soil and this picture shows such a bountiful yield. What other method could bring about such beneficial results?

Friend: This transformation came about by the intelligent use of a powerful force harnessed for use. Many farmers have been using this force for clearing land of stumps, boulders and trees, digging ditches, post-holes, wells and reservoirs and for draining swamps.

## C.X.L. Stumping Explosives

Is the name of this powerful energy, which can be handled by responsible persons as safely as gasoline, coal oil or matches, and is actually safer to handle than gunpowder.

It has been a great benefit to many farmers—it will be profitable for you—our booklet tells all about it. We want you to read this booklet. Send for it. Write us about arranging demonstrations.

**CANADIAN EXPLOSIVES LIMITED**  
Montreal, P. Q. Victoria, B. C.

If you find 12 gauge guns and loads too heavy and a bit slow in an all-day hunt, just get this splendid new

## Marlin

**16-Ga. Hammerless Repeating Shotgun—\$24.50**

**The Safest Breech-Loading Gun Built.**

## "BAKER" WIND ENGINES

have been built for 30 years, and they have special features for their particular work that make them the simplest, most reliable and practical for pumping.

"BAKER" Back Geared Engines are so constructed that the gears cannot wear out of mesh. Most other makes have the small gear or pinion above the large one. That will eventually wear apart and strip the gears.

"BAKER" wheels are carried close to the tower, being built on a hub revolved on a long steel spindle, and as a result there is

less friction, and the wheel will never sag toward the tower, while on other mills with wheel "keyed to shaft revolved in babbitt boxes" will cause excessive friction, and the outer babbitt boxing will become worn, causing the wheel to sag toward the tower and become wrecked.

"BAKER" wheels have large numbers of small sails, without rivets. The small sails develop the full power of the wind, add strength to the structure, and cause the wheel to turn with steady motion.

HELLER-ALLER Towers have many points of superiority over windmill towers in general. All our towers have heavy flat braces instead of wire or rods as used on cheaper makes. No danger of our braces breaking in cold weather from over-tension.

### Heller-Aller Pneumatic Water Supply System

solves the problem and makes it possible to have running water anywhere in the house, stable or yard, for all domestic purposes, and for fire protection. The cost is so low that almost every country resident can afford to install it. Operated by windmill, electric motor, gasoline engine or by hand power. Write for information.

### Heller-Aller Pumps

for every purpose, Regulators, Pressure House Tanks, Pine, Cypress and

### GALVANIZED STEEL TANKS
