Why pay \$100.00 for gasoline when \$20.00 will run a FRASER ENGINE the entire season and with better results than on gasoline.—Jan 24, 14

"Rewarded."

A certain firm in St. John's advertised and sold a large number of a certain article last Spring.—It was a new article, the first ever made for the purpose for which it was sold—it was highly recommended by the manufacturers—after selling several hundred a great many of which were shipped to Labrador, the fears of the firm's lining the article were aroused in case it would not come up to representents and that many through it might lose their summer's voyage. They therefore decided to send an expert to Labrador to see if all was going well and did so at a great expense. However, they were rewarded by finding every single one of the articles working most satisfactorily.—Nothing but praise was heard right down to Cape Harrison, the new article was a boon to all who had bought it, and hundreds of others were after it, and since, it has been imitated by a great number who when it was first introduced tried, to "knock it."

The firm who sent the expert to Labrador was Franklin's Agencies, Ltd., and the article was the famous FRASER kerosene adapter which runs the FRASER engine so successfully and cheaply on kerosene.—Jof

Waterman Marine Motors won highest awards in the Norwegian and Russian Fisheries. There's not a fishing fleet from Norway to Falklands—from Lands End to Japan, where these motors are not in use.

Waterman Motors are made of the highest grade material and can be run on either gasoline or kerosene or both. Because of their light weight, they use less fuel than any other and last longer.

Don't consider buying an Engine every two or three years—buy a Waterman, it will save you money and last you a life time.
