VIGOROUSLY

Miller Concession to be Developed

Mining Operations of the N. A. T. & T. Co. Will be Pushed

L. S. Robe, mining engineer in charge of the N. A. T. & T. Co. properties, who returned from the outside a few days ago, is nowadays the busiest man in the territory. He was visited a short time in his office this morning where he was found behind a mass of papers and documents mountain high. Mr. Robe was very glad to see the reporter of the Nugget and was quite affable in his salutation but when it came to talking for publication he can give an oyster for dumbness and a clam for closeness several points in the game. Modesty has always been a characteristic of Mr. Robe and if his disinclination to allow his name to appear in print in connection with any of the large en is in inverse ratio with his ability he is unquestionably the most gifted and most able mining engineer who ever spent an hour in the Yukon.

One thing that he did consent t say was that the mining operations of the company would be pushed more vigorously this year than eper before and 53 and 54 below on Bonanza, all now of which have been extensively prospected and worked before. Open cuts will be the method by which they will be operated. Concerning the other holdings in this vicinity Mr. Robe did not desire to be quoted. It is not known whether 61, 62 and 63 below on Bonanza will be worked this year or not. One thing that will be done that will prove a blessing to the Six called, on Miller creek. This will be vigorously worked and should prove highly remunerative as the ground contiguous is known to be very rich Accompanying Mr. Robe on his return from the east, which extended as far as Chicago, was Mr. Edward Isom, a young son of Vice President Isom, of the company. Mr. Isom is a student of mining and civil engi-

HAY TAKES JUMP

N. C. Co Announces Exhausted

There was a big commotion in cot

nercial circles late yesterday caused by the announcement of the N. C. co. that its supply of hay was exausted and that it had no more for The hay supply-has been lim ited but it was not considered to be running so short as that and the rest of the dealers who have hay on hand immediately upon learning of the action of the N. C. Co. put the price up to 10c per pound or \$60 per ton more than it was selling for yester-

day morning. One local dealer estimates the sup ply in Dawson at the present time under 50 tons but others think that it will go considerably over that figure. It is considered that it will be a tight pinch to get the stock through with the supply on hard until the freshasupply gets in and it is thought that there will be a further increase of 2 to 21c per pound before naviga-
