JOHN SMITH HONORED

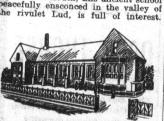

BUST PRESENTED BY BADEN-POWELL TO HIS NATIVE TOWN.

Founded Jamestown 300 Years Agoventure as a Boy.

King Edward VI. Grammar school at Louth, the school where Capt. John Smith wrestled with the "three Rs." has been made the proud possessor of a bust of its most illustrious alumnus. The fact that the gift is from Major-General Baden-Powell, who chaims to be a "direct lineal descendant of the doughty colonizer" and was made by the general himself, makes the presentation decidedly appropriate aside from the fact that America is about to celebrate the founding of Jamestown, 300 years ago, by a great exposition.

by a great exposition.

Major-General Baden-Powell, known Major-General Baden-Powell, known to every Englishman as "B. P." since his heroic defence of Mafeking in the Boer war, is a many sided man, and not the least of his talents is sculpture. Some time ago "B. P." discovered that there were no busts of his illustrious "ancestor," and in order that his features might be preserved to posterity he set about to use a few minutes before breakfast every morning in modeling a bust of Capt. John Smith. One replica of this work, it may be remembered, the amateur sculptor courteously presented to the state of Virginia, and a second copy of the same was given to the Royal school at Louth last week. While Baedeker cites a church steeple as the only attraction for the sightseer at Louth, this ancient school peacefully ensconced in the valley of the register the sightseer at the contract of the state of the results of the results and the state of the state of virginia and a second copy of the same was given to the Royal school at Louth last week.

WRERE JOHN SMITH ATTENDED SCHOOL The town is in Lincolnshire, not far from the eastern coast of England, and while a majority of the 10,000 inhabi-

from the eastern coast of England, and while a majority of the 10,000 inhabitants are busy in the iron foundries breweries, carriage shops, and carpet factories of the place, a few old schoolmasters are trying to uphold the reputation of the grammar school, which for six centuries back has been turning out famous "old boys."

Among the laurel wreathed escutcheons on the walls of the old school are names of distinguished alumni, including Lord Alfred Tennyson and Sir John Franklin, the Arctic explorer—names that are as well known in America as homely "John Smith."

The school was founded as a royal school in 1551, but it had existed for many years before that date as a "guild" school. The only relic of the buildings in which Johnny Smith spent his school hours is a bust of Edward VI.—and when gazing at the plaster features of his sovereign, it may be guessed that Johnny little thought that a bust of himself would some day grace the school as it now does.

The "Smith boy's" connection with

some day grace the school as it now does.

The "Smith boy's" connection with the school is covered vaguely in the school records of 300 years ago—about as vaguely as a "Smith boy's" record would be chronicled to-day. After a few terms at a school in Alford, near his home, Johnny is known to have become restless, and his father decided to send him to Louth, where he might live with a relative and attend the royal school.

The period was a tempting one for Johnny, for it was shortly after the annihilation of the Spanish armada, and the tales of adventure and glories of war which filled his ears fanned the flames of adventure in his young heart. He was on his way to school in jerkin, and doublet, and high ruff collar one day, when he met a peddler, to whom he sold his books, and planned to go to sea on the proceeds. At this juncture he was called home by the death of his father, and his aged mether also soon passed away, leaving the would-be adventurer an orphan. The rest of his life story is known to the world.

In presenting the bust to the school the other day, Gen. Baden-Powell

In presenting the bust to the school the other day. Gen. Baden-Powell made reference, as he had often done before, of his "coming direct from the doughty captain." He traces the descent on his mother's side. He says "Capt. John Smith married while in America, and his grandson, Benjamin Smith, lived in New Jersey and died in 1769. Benjamin's son, Joseph, Smith, lived in New Jersey and died in 1769. Benjamin's son, Joseph, came to England as a loyalist, married, and was father, of my grand-father. Admiral W. H. Smith, whose daughter was my mother. This branch of the Smith (or Smyth) family is entitled at the heralds' college to bear the arms of John Smith—viz.: Three Turks' heads, etc."

the arms of John Smith—viz.: Three Turks' heads, etc."

This claim has elicited a long letter from William Gordon McCabe, one of the commissioners of the Jamestown exposition, which appeared last week in The Saturday Review, a prominent London journal. Mr. McCabe says, in part: "It is a distinct shock to a humble student of Virginian history to learn that the stout old soldier, who died at the comparatively early age of 51, had a grandeon living in—in all places of the earth!—New Jersey, 160 years atter his grandfather had sailed away forever from Virginia!

"And it is as sure as anything can be sure that John Smith never was married and consequently could be no lineal ancester of Gen. Baden-Powell. The greastion is almost too platin for discussion. Smith was in the colony less than two years and a half, was easily the foremost figure in it. and we can account for well nigh every action of his during that time. He stanuchest of triends, and between the marrieves of the two we can follow him short every day in his splendid

OHN SMITH HONORED

fight to save the great enterprise in the face of appalling difficulties and dangers without and cowardly treachery within.

"Had he ever married we should surely have heard of it from the narratives of Lookill and Bangall or Masters Pots and Phettiplace. No man, as I have said, had more bitter enemies, and had Capt. John Smith sailed away from Virginia abandoning his wife and child we should just as surely have heard of it from Wingfield or Master Archer. Indeed, after Smith, owing to his dreadful accident, sailed for England, the chief of all the stories trumped up against him was that he designed. stories trumped up against him was that he designed to marry Pocahon-

Mr. McCabe cites an English historian who speaks of Smith as spending his last days in London as a "lonely bachelor," and further goes to prove that his brother Francis left no lawful issue, and that Capt. Smith made no mention in his will of any offspring whatever.

It seems to be, in American language, "up to" the heralds' college and "B. P." to answer this flat denial from Virginia.

THE BUILDING OF ROADS.

Advice About How Not to Make Repairs on Them-Birmingham U. S. Consul Makes a Report.

Consul Makes a Heport.

Consul Halstead of Birmingham,
England, reports to the Department
of Commerce and Labor results of
unintelligent, unscientific road repairing. He quotes some excellent advice about how not to make or repair
a road. He writes:

ing. He quotes some excellent advice about how not to make or repair a road. He writes:

"When in London recently I noticed that the great road along the Thames, one of the most important thoroughfares in London, known as the Thames embankment, was very rouch, and in a recent article in The London Mail, entitled 'How Not to Make a Road,' some observant person tells of the methods used when the embankment was last torn up and remetaled and reironed, which confirms in many respects the despatch I recently published in Daily Consular and Trade Reports, Sept. 9, entitled 'Dust and Motor Cars.' This writer had thought that a sound knowledge would surely be displayed in repairing such a thoroughfare as the Thames embankment. After the scarifier had been at work and the road torn up, loads of 'blue metal,' he said, were dumped down, but this stone was of a very uneven nature, both as to size and shape, many of the pieces being long and narrow, while others were small and approximately cubical, and there was additionally a large proportion of irregularly shaped stones. The loads were roughly spread across the roadway, and in many cases 'the

there was additionally a large proportion of irregularly shaped stones. The loads were roughly spread across the roadway, and in many cases the wheel ruts of the carts were not even raked out." Continuing his description of what was done as roadmaking for the great thoroughfare, he says:

"Over this chaotic heap was strewn—shade of Macadam! — pulverized clay. Water was then copiously flooded on to this interesting mess to induce the clay to get in between the crevices or chasms in the roadway. This it speedily did, although naturally much remained as mud on the surface. Then the steam roller got to work, and soon the roadway looked quite smooth and nice, and he who knew no better would have passed by and said, "That is a fine hit of work." He who knew, however, and saw it done, said "Give it a few weeks and it will be as bad as ever."

EIGHT-DAY REVOLUTION.

Gen. Paredes and Most of His "Army

Put to Death in Venezuela. The much advertised "revolution" of Gen. Antonio Paredes is over and its leader and most if not all of his

'army" are dead.

Just eight days was the length of he "revolution" one of the shortest in history.

Gen. Paredes and 18 men were cap

Gen. Paredes and 18 men were cap-tured by Government forces and sent from Bolivar and Maturin and by boat from La Guayra.

After the collapse of their expedi-tion they were imprisoned at Barran-

GEN. PAREDES

cas under a strong guard. All have since been shot.

Gen. Paredes landed with about 20 men at Pedernales, at the mouth of the Orinoco River, Feb. 5. In his "army," of which Gen. Baldillo was chief of staff, were several men who are well known in Venezuela.

Choosing the name "Legalista" for his organization, and with the war cry "Free Industries and Popular Sovereignty!" Gen. Paredes, under the tricolor of Venezuela, started full of confidency for Ciudad, Bolivaz, expecting the country would rise and flock to him as he marched.

The result of this revolution has naturally left the Government stronger than ever.

MEN RULE BY FORCE, WOMEN BY CHARM.

BY CHARM.

And yet, because they live less strenuously, women neglect the early evidences of failing vigor. The wise woman will not permit her charms to be robbed by ill-health. When she feels appetite failing, nerves getting on edge, color fading, nerves getting on edge, color fading, she takes Ferrozone. How it sharpens the appetite! How quickly rich blood is available to restore color to the cheeks, buoyancy to the step. Better try Ferrozone. You'll feel like a new being, with new vigor and ability to confront life's difficulties. You are sure to bless the day you commenced Ferrozone. Sold everywhere in 50c. boxes.

Pay for Immigrants.

Ottawa, March II.—Following the termination last fall of the contract with the North Atlantic Trading Co. for the encouragement of immigration to Canada, the Government has now arranged to pay a commission of ten shillings per head on each adult and five shillings per head on each child booked for Canada by the booking agents of the continental steamship companies. The immigrants so booked must be those who have signified their intention to follow farming or railroad work in Canada, or to accept positions as domestic servants in the case of females.

DOUBLED UP WITH CRAMPS.

Stomach feels like an infernal ma-Stomach feels like an infernal machine and you want relief mighty quick. Nothing does the work half so soon as Polson's Nerviline. Why, it kills the pain instantly. If your bottle is empty get another to-day, Nerviline keeps the doctor bill small because it cures little ills before they grow big. Nothing for indigestion, heartburn and cramps like Polson's Nerviline. Large bottles for 25c.

British Aze Pensiens.

London, March 11—The Tribune on Saturday confirmed recent rumors that the forthcoming budget will provide a certain sum of money for some kind of old age pensions scheme, the Government having decided to make a start in this direction this year. This start will be only tentative, however, as it will take two or three years to carry through the completed plane

Help the Overworked Heart. Help the Overworked Heart. — Is the great engine which pumps life through your system hard pressed, overtaxed, groaning under its load because disease has clogged it? Dr. Agpew's Cure for the Heart is nature's lubricator and cleanser, and daily demonstrates to heart sufferers that it is the safest, surest, and most speedy remedy that medical science knows.

Chinese Hotels.

The hotels are usually grouped with-in a square or two of one another. Each one seeks to attract guests by high sounding titles. For example, in Can-ton are hotels which flaunt the signs of the Fortunate Star, the Golden Profits (an unusually frank confession for a landlord to make), the Rank Conferring and the Happiness. The food is not so bad, but the traveler who goes to one of these houses to sleep will wish that he had gone to another. The hedrooms are corellated. The bedrooms are small, thin walled The bedrooms are small, thin walled boxes in which you may bear the breathing of your next neighbor or be kept awake half the night by the conversation of people at the other end of the hall or, worse still, be almost stifled by the smoke from an opium pipe which is being induled in by the man which is being indulged in by the man across the passageway.

"The blood is the life." Science has never gone beyond this simple statement of scripture. But it has illuminated that statement and givilluminated that statement and given it a meaning ever broadening with the increasing breadth of knowledge. When the blood is "bad" or impure it is not alone the body which saffers through disease. The brain is also clouded, the mind and judgment are effected, and many an avit deed or impure thought may be directly traced to the impurity

THE LATE LORD GOSCHEN

ENGLISH STATESMAN WHO WAS IN GRAND OLD MAN'S CLASS.

LATE VISCOUNT GOSCHEN

derstanding of economic theories, with a practical grasp of affairs. More than any man in a hundred years, Goschen left his impress on the English national debt, whose conversion was undoubtedly the greatest piece of work he ever did. His reduction of interest on the debt was contemplated with alarm in financial circles, for it was felt that the task was so huge and complicated by so many problems that he would surely make some mistakes. But so skilfully was the change accomplished that there was no disturbance whatever, and the new "Goschens," as they were called, were as readily subscribed as any former issue of consols.

of consols.

Lord Goschen will also be remembered for a notable failure, as well as for a great success, for it seems inevitable that the battle he lost will for a great success, for it seems inevitable that the battle he lost will
be fought again and won some time
in the future. He felt that the strain
on the coinage of the nation was unnecessarily severe, through the absence of paper meney of less value
than five-pound notes. As the average weekly wage is much less than
£5, the paper currency was not, and
is not, used by the great proportion
of people in England. Goschen wished to create £1 and £2 Bank of Enghand notes; but, though he put forward a strong argument, he failed to
carry his point. His "Theory of Exchanges" is a standard text book on
the subject of international balances,
and indicates the general culture as
well as the deep special knowledge
of the writer.
Goschen was one of those members of the Balfour Cabinet that stepped out when Mr. Chamberkain's policy was announced. He had no sympathy with the preferential idea, and
was a pronounced free trader.
Lord Goschen had Camadian investments, and must have had a peculiar
interest in the country, as he was
for years Governor of the Hudson
Bay Co., in which position he preceded Lord Strathcona. The two men
were thus closely associated, their
common bond being an interest in
Canada. As Lord Goschen has been,

or impure it is not alone the body which saffers through disease. The brain is also cloaded, the mind and judgment are effected, and may a evil deed or impure thought may be directly traced to the impurity of the plood, No one can have a below the property of the plood. No one can have a wholesome and pure life unless the blood is jurge. Foul blide can be made gure by the use of Dr. Pierce's Golden Medical Discovery. When the blood is pure, body and brain are anke healthy and life becomes a standing out in bold relief, all alone and a conspicuous example of open, frank and honest dealing with the sick and afflied, Dr. Pierce prints on the bottle wrapper in plain English a full list of the ingredients. Therefore not a "patent medicine," but a medicine of known composition.

For Cut Ffowers.

Pretty receptacles for flowers that are inexpensive are goldfish bowls. A small one costs but 10 cents and will be found most artistic. The nasturitim, rose, mignonette or any dainty flower with pretty stem, is at its best as the clear glass bowl.

partners in the firm, which still fleur-ishes and from which all the family wealth is derived.

Though the Goschens have been Christians for at least three genera-tions, they are of Semitic origin, a fact to which must be ascribed the marvelous skill of Lord Goschen as a financier.

IM GRAND OLD MAN'S CLASS.

His Budgets Compared Faverably With These of Gladstone—Left His Impress Upon the British National Debt—Likewise Remembered For a Notable Failure—Work of His Declining Years.

Viscount Goschen, whose death is reported, was one of the most distinguished English statesmen of his generation. Statesman rather than politician is the word that fits him, for Goschen dealt with great matters of finance, far above the head of the average cletor, and was never tempted to demagoguery. It is as a financier that he will be remembered in the history of the nineteenth century, and it will be hard for the historian to find a contemporary who was his segual in handling financial matters of Hastostone, and as the Chancellor of Chaostone, and as the Chancellor of the Exchequer these two men were in a class by themselves.

Goschen was something of the same type as Ltagl Avebury. Both were products of a city training, and each inherited, to some extent, his capacity for business matters. Both combined general culture, and a thorough understanding the combined general culture, and

tage to their Government. At Viennas more than anywhere else diplomasio office, per se, does not carry with it the entree into the grand monde, and the envoy from any European Government who comes there without the advantages of blue blood is apt to find himself restricted to intercourse with his foreign colleagues and Austrian officials, while the only opportunities he will enjoy of meeting the cream of Austrian society will be at those court balls and ceremonies to which he is invited by reason of his mission.

mission.

Indeed, his life there is the reverse of pleasant, since he sees himself barred from the most brilliant society of Europe, to which his attaches, provided they possess the advantages of birth which he does not enjoy, are welcomed with open arms.

NATURAL PARK FOR B.C.

nerican Endeavoring to Get the

Government to Set One Aside. The Provincial Government of British Columbia is now being strongly urged by Dr. W. T. Hornaday, director of the New York Zoological Park, to set aside the fine mountain area between the Elk and the Bull Rivers, in the Fermie district of southeastern British Columbia, as a game and forest reserve. The region in question is that visited by Messrs. Philips and Hornaday in September, 1905, concerning which, and their adventures in it, they have recently published a book entitled "Camp Fires in the Camadian Bookies."

This territory is well stocked with mountain goat, moustain sheep, grizzly boar, black bear and other animals. The mule deer, which once were numerous, have been shot out until that The Provincial Government of Brit-

MAP OF PROPOSED R. G. HATURAL PARK.

MAP OF PROFESSIO R. C. MATURAL PARK. species is now rare, and of elk only a few selitary individuals remain. Martera, mink and wolverine are still fairly plentiful. The works of nature there are extremely interesting, and the country as a whole, if preserved in its present natural wildness, would make a grand resort for camping parties of nature-lovers and photographers.

Dr. Hornaday has crafted a bill and submitted a map showing the boundaries of the proposed by him would be about thirty miles in length by fifteen miles in width, and would, therefore, contain a total area of about 450 square miles. The region thus delimited contains no coal nor other valuable minerals, no agricultural lands, and no timber of commercial value, so that, commercially or industrially, the people of British Columbia would make no sacrifice in carrying out the idea proposed. The reserve is situated between two main lines of the Canadian Pacific Railway, and would be accessible from three points—Michel and Fort Steele on the south and Banff on the north. Owing to the natural conditions of the country, it would be entirely possible for two game wardens effectually to protect the reservation. Dr. Hornaday proposes that the enabling act shall designate the mountains between the Elk and the Bull Rivers as the "Great Mountains," and the reservation as "Great Mountain Park." From the encouragement and sympathy which have been received, there is good reason to hope that the scheme may be varried into effect.

GOLD MEDAL

- FOR -

Ale and Porter AWARDED

JOHN LABATT

AT ST. LOUIS EXHIBITION 1904.

Only medal for Ale in Canada.

Naturally Puzzled Among the interested visitors of the marine barracks at Washington on one occasion there was a party of young girls from a Maryland town, friends of one of the officers of the barracks, They proved much interested in every-thing pertaining to the life and discipline of the post

"What do you mean by 'taps?" asked one young woman.

"Taps are played every night on the bugle," answered the officer. "It means flights out.' They play it over the bodies of dead soldiers."

A puzzled look came to the face of the questioner. Then she asked:
"What do you do if you haven't a

Regina \$28.00, and to other points in this district at proportionately low rates, and also at proportionate rates to the points of the points o

Platinum Vanishing.

A prominent French writer deplores the vanishing stock of the world's platinum, says the London Globe. All the known deposits are becoming exhaust-ed, and the price is going up to a prohibitive extent. In 1876 the metal could be bought for \$100 the kilogram. Four years later it had doubled, in 1901 it had quadrupled, and today the price is \$1,200 per kilogram, or twice the price of gold. Even that is for crude platinum. The worked metal is twice as dear again. Considering how many industries are now absolutely dependent on platinum, the question of replacing it by some really efficient alimportance.

Purity is our watchward. Selecting only the choicest herbs and roots known to pharmacists. No spirits or harmful drags. Hollister's Rocky Mountain Tea is purity itself. 35 cents, Tea or Tablets.

THE CARE OF RUGS.

How to Sweep Large Ones and to Dust:

Some housekeepers have concluded that they prefer two or three small rugs in a room to one large one which is too heavy for a woman to handle is too heavy for a woman to handle and beat. A great single rug covering the center of the room looks well, even if of no better quality than a good. Smyrna. But smaller rugs must be of better quality to prove satisfactory. Provided there is a large rug down and no man willing or to be hired to. and no man willing or to be hired to beat it, by care it can be kept in fair tion for several weeks. Of course? trims to several weeks. Of course, it must be swept where it is. Having dusted the movable ornaments and chairs and carried them to another room and dusted and covered other things that are conveniently me sweep the rug in the direction of the warp in short strokes and take up the dirt along the edges on the floor. Now sweep the rug again in the opposite direction after scattering over it bits of dampened newspaper pressed/agdry as possible. Turn the edges up and brush out underneath for a few inches. Now sweep the bare floor with a dust brush, and after the dust bas a dust brush, and after the dust has-settled wipe the floor with a slightly-damp cheesecloth and the rug with an-other cheesecloth dampened in water to which a few drops of ammonia have-been added. In this way the rug will-look bright and be quite free from dust.

Tea leaves when used to take up dust are apt to stain delicate colors.

The above method of cleaning a rug
may seem troublesome to one who
would prefer to attack it with a broom and give it a vigorous digging, but it would be no cleaner by her treatment, and the walls and furniture would be loaded with dust, to say nothing of discomfort to the sweeper in breathing: the dust.

If small rugs are used, do not allow them to be taken out and shaken by one end or, in fact, shaken at all, for this is the way to break them into rags, along the edges at least. Hang over along the edges at least. Hang over alone and beat with a rattan, or, better yet, have the rugs laid on the grasse and beaten on the wrong side first and then turned.—Chicago Inter Ocean.

A FIREPLACE CLOSET

It Makes a Convenient Place to Keen

Hats and Shoes.

A fireplace that is not in use and that does not present as nice an appearance as the room surroundings demand may easily be improved by transforming it into a closet, as shown in the accompanying illustration. Remove

PIBRPLACE CLOSET

all the interior fixtures and put in their place a set of small shelves. Then arrange a silk or tapestry curtain In front. Suspended from a brass rod it looks artistic and acts as a screen. The interior makes a very convenient shoe and hat closet.

One Sided Girl "She has pretty hair," the athletic girl admitted, "but it is never dressed evenly. The right side always looks much better than the left."

"That is because she never moves her bureau," said the wise girl. "Her rates, and also at proportionate rates to all points in Minnesota and Da-kota.

Lange around, so month in and month out she dresses with her right side to the light and the left in

"Consequently one half of her fa and hair is well groomed, while the other haif gets only a lick and a promother hair gets only a lick and a prom-ise. Any girl who would avoid looking-one sided must dress one week with her right side to the window, the next week with her left side to the light."

Get Lightweight Hats.

Never buy a heavy hat if it is possible to get a light one. Insist that hats if made for you are made with the mindmum of weight. Heavy hats cause heataches, gray and falling hair by impeding the circulation. A heavy hat worn only two or three hours a day is responsible for the feeling of heaviness that attacks so many and that disappears as soon as the cause is removed; or within half an hour afterward. It is well to have hats differing in their is well to have hats differing in their paint of pressure on the head so that in changing from one chapeau to an-other the head may be rested, in sec-tions at least.

The street is fu'll of humiliations to the proud.

It is the motive alone that gives character to the action of men.

When Freedom from the Mountain high,
Unfurled her Standard for all to see,
These words appeared in black and white,
"Drink Rocky Mountain Tea."
