WELLS IN THE IMMEDIATE VICINITY of barns are always open to strong and which are less liable to cold and suspicion. From the accumulation of manure and the other contents of the barn-yard there would be constantly drained into the soil impure liquid secretions containing germs of disease, and no cattle should be allowed to drink water so tainted.

Those who wish to renovate and cleanse feather beds can do so in the most effective and easiest way by In addition to my usu-large variety, I have this season added the simply laying them on the Leave them out a few days, if the Charter Oak Cook Stoves weather be fine, and turn them over every day. The stains and soiled places will be faithfully transferred to the snow beneath. A moist snow

to the snow be leath. A moist snow is better for this purpose than when dry.

A FRENCH AGRICULTURAL EXCHANGE of the Prairie Farmer, recommends throwing fresh manure from the horse stable into the poultry-house, in cold weather. It not only imparts warmih, but gives the fowls employment in scratching it over. In default of this material, dry, clean straw is suggested. The same paper recommends removing the roosts in extremely cold weather, and letting the fowls hover in the straw, at

night. THE WONDERFUL ADVANCE in the use of ensilage in England has attracted considerable comment in America, and in spite of a by no means unobstructed pathway, it continued to grow in popularity, and its use is rapidly extending from one end of the island to the other, and the practical Englishmen and their equally practical and even more economical Scottish b others, seem to be taking up the subject with an energy characteristic of the Anglo-

Saxon race. ONE FRUITFUL CAUSE of disease with pigs, is exposure to a cold wind when just out of a hot nest, where, perhaps, they have been piled upon each other. The sudden change of temperature may be as great as twenty or more degrees, enough any way, to cause colds, which may assume the form of pleurisy, quinsy, inflammation of the lungs or bowels. Sleep ing under the straw stack, and feed ing on the open ground in a raking wind, lay the foundation for many diseases.

Few FARMERS properly estimate the cost of their teams remaining idle fully half the year to secure the labor of the other half. How would they

### KING'S EVIL Was the name formerly given to Scrofula because of a superstition that it could be

cured by a king's touch. The world is wiser now, and knows that SCROFULA

can only be cured by a thorough purifica-tion of the blood. If this is neglected, the disease perpetuates its taint through generation after generation. Among its generation after generation. Among its earlier symptomatic developments are Eczema, Cutaneous Eruptions, Tumors, Boils, Carbuncles, Erysipelas, Purulent Ulcers, Nervous and Physical Collapse, etc. If allowed to continue, Rheumatism, Scrofulous Catarrh, Kidney and Liver Diseases, Tubercular Consumption, and various other dangerous or fatal maladies, are produced by it.

# Ayer's Sarsaparilla

Is the only powerful and always reliable blood-purifying medicine. It is so effectual an alterative that it eradicates from the system Hereditary Scrofula, and the kindred poisons of contagious diseases and mercury. At the same time it enriches and vitalizes the blood, restoring healthful action to the vital organs and rejuvenating the entire system. This great

Regenerative Medicine Is composed of the genuine Honduras Sarsaparilla, with Yellow Dock, Stillingia, the Iodides of Potassium and Iron, and other ingredients of great potency, carefully and scientifically compounded. Its formula is generally known to the medical profession, and the best physicians constantly prescribe AYEP'S SARSAPARILLA as an

Absolute Cure For all diseases caused by the vitiation of the blood. It is concentrated to the highest practicable degree, far beyond any other preparation for which like effects are claimed, and is therefore the cheapest, as well as the best blood purifying medicine, in the world.
