THE DEVIL-PISH. e specimes of this rare sea monster red in the harbor of Charleston, has red and mounted in the Museum of tory of the College of this city, and now have the opportunity of seeing a denizes of Southern waters, whose as been deemed fabulous even down to

besi. Devil, or Devil-Fish, belongs to the is class of fish, and to the family of Rays, a good type or representation of a Sting Ray, commonly called Sting-inherman.

Rays, a good type or representation of a Sting Ray, commonly called Sting-relementation of the Atlantic States, but in Southern hasbors, numerous species y are found—the well-known Clamre Eagle Ray, the Whip-sting Ray, the y, the Skates, and many others.

In Cracker stasins a great cite; we mured them five feet across the wingh, dibly informed that much larger ones aken. But none of them can be said a Devil-Fish, either in size, weight, powers or curious form. Having a or ten feet long, a tail six feet, and not large wagoner's whip; two infexible age as long as the body, one attached e, and measuring from the totip seven-heen feet across, and "with which he nell furiously through the water or h into the sir;" a capscious mouth wide, with gape sufficient to receive arman abreast;" two fines, one project-neh side of the mouth, called horns or properly instruments of prehension, ilera and feeders, with which it aweeps ge mouth the amall fish, shrimps and which it preys; two prominent eyes, at the base of each horn or arm, and feet apart; skin chagreen, like that of iteeth very small, not more than twice, the appertities upon the calles; mouth a ten double rows of strainers, a curious liful apparatus, a fine sieve through infiltrates the water, and secures the nale upon which it feeds; color, dusty re, with long, dusty, opaque cloude bea white ground—these all combined eingular form of animated nature—the

his contemporary the shark, which, active classification of Professor Agasiz, ame order of fish, the placoid, the Davilvery lively animal; he leaps often and the air, and with a half somerset, or a wings, falls back into his element with vise and a splash. It is no ancommon nt, if amasement indeed it is, for this is up the grapnel of some fishing beat craft, with his horns or arms, "which rapidly before his mouth, while he nd clasps with the utmost obstinacy body it may inclose;" dart off auddenly, great rapidity drag after it the beat and led crew, and after an excursion of a wo, relax his hold and escape. But he always loose himself at his pleasure; by he becomes entangled in the rope, and ungles to extricate himself, turns someristing the rope into coils, enveloping sithin them, and thus forfeits his life to rity.

within them, and thus forfeits his life to rity.

similar manner was the subject of this ken. A large schooner was anchored a from the breakwater of Sullivan's Island, ing her cargo into a flat, or lighter. To ithe passage of the lighter from and to el, a hawser was extended from the latter, and made fast on the shore, the slack of swinging loosely several feet below the of the water, the tide about half obb, and rebt rapid; auddenly the schooner was ad to be adrift, as the captain supposed, inging round towards the shore. Upon to the hawser for relief, he saw that a th was entangled in the bight. This was reen o'clock in the evening; and not benight, and after much labor and considered fife, did he auccord in bringing him even o'clock in the evening; and not beleight, and after much laber and considerrof life, did he succeed in bringing him
le the vessel properly secured. During
ggle the fish dragged the schoener, anchor
ggle the fish dragged the schoener, anchor
about three hundred yards. His borns,
howere found clasped around the hawser,
in the number of somerates he made, many
turns and coils of the rope were passed
is body. A few years ago, and near the
rhere this occurred, a soow was anchered,
ag to the government, and used as a lighter
ie in building the breakwater. The crew
ingaged on the work ashore. Suddenly
seen moving at a rapid rate out to sea;
rere sent in pursuit, and after a long chase
ral miles, she was evertaken and found to
b at anchor, It is presumed that one of
ish was the cause of the mysterious flight
toow; clasping his horns around the stock
anchor, he tugged her through the narrow
inding channel, and moored her asfoly in
ing; giving the crew a long chase and a
tow, and eliciting many maledictions from
lors upon the head of the marine represenof his Satanic majesty.
