That Land Scandal. Voters of Placentia Bay will find

in the Evening Chronicle of last night a confirmation of the charge made in a letter published on Monday in the Evening Telegram that the Govern-ment had granted away lumber land in Placentia Bay. Here is the substance of the charge:-

"Every fisherman in Placentia Bay knows that there is only two patches of timber in the whole Bay, one is situate in Great Sandy Hr., and the other at Paradise Sound. Every fall the fishermen go for firewood to both of these places; in fact they are the only places where a mast for a boat or her timbers can be cut. In the year 1900 Mr. William Coffin, of Hay-Coun il for the timber land on Great of the Bay heard that their birthright was in danger they protested against it, and the Government of Sir Robert Bond upheld the protest of the fishermen and refused to grant the land in question, because of it being the fishermen's reserve. Now what has happened? A Mr. Bernard McGrath, a schoolmaster from King's Cove, has secured from the Morris Government not only all the land of the Great Sandy Hr. River, but he also secured a grant for all the tim-ber areas of Paradise Sound. So that the fishermen's rights to the only two bits of timber land in this bay is granted to a King's Cove man for was Mr. Howley when our rights over these lands were being bartered away? Where was Mr. Devereaux Where was Sir Edward Morris and took place? Both Sir Edward and River and Paradise Sound woods to

this bay for firewood, masts and schooner building material." True, the Chronicle says the land has reverted to the Government, but this does not in any way justify the granting of the land by the Morris Government after the protest which is referred to in the letter.

they not insist on protecting the fish-

land were worth hundreds of thous-ands of dollars to the fishermen of

nen's rights.

No wonder it is that Mr. Howley is getting out and going to St. John's East. No wonder it is that Mr. Frank Morris is seeking the seclusion of a Howley considers his goose cooked.

Is not Mr. Morris's goose cooked anyway? At all events the people will take care that Sir Edward's goose

A Graball's Philosophy.

We must congratulate Mr. McGrath on the consistency of his argument with his conduct and that of his associates in the Tory Party. Dr. Lloyd got little from the Government and therefore his value is small. Mr. McGrath got much and therefore his value is great. No wonder he sets such little value on the Fishermen's Union candidates, who are pledged to have no grabs at all. But after all, what a funny philosophy. A Parnell, a Redmond, a Bright, who get no grabs at all from a government are of no value whatever. But Hon. D. is as great as his fifth interest in his great Labrador grab and

mmense. He got 5,760,000 acres, 640,-000 acres and 25,600 acres, and a job in the Post Office. He never knew his own greatness until the Hon. P. T. McGrath told him And what about the size of brother Tom and his application for 6,000 square miles and a job in the Customs? The people never really recognized the greatness of these great men and the statesmanship of the Devereaux, Crosbies, oodisons, Emersons and the Morris's until they got this assurance from Mr. McGrath that their statesmanship was to be measured by the size of their grabs. And now they find that

In New York a Chinese woman complained to the authorities, saying her husband mistreated her. This seems to disturb the generally accepted theory that a Chinese wife takes whatever her husband hands her. If your ambition to gather it easily leads you into Wall Street, do no complain if, during the process of being trimmed, you suffer some pain. Men frequently say to their wives: I didn't marry your family." But in

the majority of cases that is what it mounts to. The man who can cook and make himself useful about the house might as well do it. He seldom is worth much down town.

Eph Wiley says that while he willing to be convinced, no woman who stumps the country for a presi dential candidate can do it.
