It's The Stropped Blade That Gives The Perfect Shave

How about your morning shave? Does your razor strop the blade for you, giving you a cool, clean shave day after day? Can you clean and dry your Safety Razor without taking it to pieces—without even

These advantages are only possible with the AutoStrop Razor. The stropping of the blade is not only necessary from the stand-point of economy, but is the only way a "real" shave can be had. The AutoStrop can be used unstrop-

ped the same as the ordinary afety razors, but when you once realize the difference between a stropped and an unstroppe edge you will then appreciate the Self-Stropping feature of the AutoStrop

and try it

Pay nothing—deposit nothing. Decide upon its purchase after you have compared its wonderful blade service and smooth-shaving quality with other razors you have used or are using. Take it home and shave with it as freely as if you had purchased it outright. Your dealer will lend it to you for that purpose. Then come to a decision whether you will keep it or return it. We authorize dealers to loan the AutoStrop Razor on 30 days' trial and we stand back of the offer.

submarine. According to survivors who reached a British port, the Uboat shelled the vessel, and the German commander then ordered the crew to take to the boats and go alongside the submarine.

The Germans, the survivors assert removed the life-belts and outer clothing of all the members of the crew except eight, smashed the lifeboats with axes and then re-entered the submarine and closed the hatches leaving the men on deck. The submarine travelled on the surface for about two miles and then submerged, Thirty-eight of the crew were drowned. Three others were rescued by a patrol boat.

reached the city last night twenty-five Naval M. G. Winter and Mrs. Paterson of the Ladies' Reception Committee; the Premier, relatives and friends and a large gathering of people. The Premier extended the usual welcome and expressed the wish that every man would nejoy his furlough. Cigarettes were then distributed among the men by the ladies mentioned, after which the sailors whose homes outports were taken on board H. M. S. Briton and those in the city to their homes. This morning the men fell in on the deck of the Briton and after eing given furlough drove to Govrnment House, where they were reeived and welcomed by His Excelency the Governor and Lady David-

Rann-Dom Reels.

Woman's sphere is a cosy compartment in the back part of the house, ontaining a-kitchen cabinet, a malleable-top range and room for deep thought. Some of our greatest thinkers have been women who learned to think on both feet while engaged in trying household tasks, such as toying with the elusive safety pin, designing a cream pie and carrying in coal from the barn.

It is a peculiar fact that tent to wait on man, prepare his meals and sew on his buttons with a brass were not even allowed to speak up in prayer-meeting and express their opinion of the new minister's wife. In short, woman was classified as a part of the household furniture, and was not allowed to contract debts or anything else, except nervous prostration

For thousands of years woman was perfectly content to wait on man and sew on his buttons with a brass

In an early day in the history of the world man showed woman that her sphere is in the home, and he succeedd in keeping her in that locality for a long time. The worst jolt man ever got was when woman decided to support herself, leave him in an unkempt and buttonless condition and grab the ballot. This is due to the pernicious habit of allowing woman to read the daily newspapers when she ought to be figuring out a new pattern of cornstarch pudding. It was never intended that woman should know anything that would make her 2 dissatisfied with her lot, and yet shortsighted husbands continue to bring home the uplift magazines and permit their wives to read them, instead of demanding a higher grade of pancakes and teaching idle spouses how to run

Man is entirely to blame for this lawless procedure on the part of woman. The average husband is too mealy-mouthed and soft-headed. If the leaders in the suffrage movement had possessed husbands with an imperious will, man would not now stand in danger of being outvoted and the death rattle of the mulct saloon would not be heard with such depressing frequency. What we need is more husbands wearing a determined mien and brass knuckles.

Woman's sphere used to be a joke, is now a sad, stern reality.
