*Miss Jewel and her friends*  
*"My fond father said: A watch like a family depends upon the jewels it holds"*

The proper number of jewels in a watch insures its time-keeping integrity. These gems, unlike metal, are not affected by the varying temperature. They are used as tiny bearings upon which the little wheels go round to meet their timely obligations of telling the truth about the hours.

Our assortment of Ladies' Bracelets, Watches and Gent's Pocket Watches, with jeweled movements, is most complete. May we have the pleasure of your inspection?
