CRUST OF EARTH BIG WATER TANK

Hydrographic Office Estimates Supply Would Flood Surface to Depth of 100 Feet.

Washington, D. C., Nov. 18. — The water which exists a vapor in the atmosphere, if precipitated, would cover the whole area of the earth to a depth of an inch and the ice in the polar regions, if melted, would cover the whole area of the earth five feet deep, according to the hydrographic office of the navy.

This estimate is made in an official computation of the amount of water in the great lakes. It is improbable that as much as one-tenth of one per cent of the water in the world is contained in the great lakes and their tributaries. The official estimate gives 207,496,000 cubic miles as the quantity of water in the oceans of the world, and 11,500 cubic miles as the volume in the great lakes and their tributaries.

The lowest competent estimate of the free water held in the earth's crust would be equivalent to a uniform sheet over the entire 197,168,738 square miles of the total area of the earth's surface to a depth of about 100 feet. This, however, according to the hydrographic office in only three-tenths of what Van Hise has estimated it to be, and about one-seventy-fifth of the amount postulated by Deless, whose total has been widely relied upon.

"DRY SWIMMING."

Physical Culture Supervisor Sudor, of the Chicago public schools, desires to interest the school authorities of that city in dry swimming. Swimming without water is literally impossible, but Mr. Sudor says it is possible to give profitable gymnastic instruction in water locomotion. He claims that from 80 to 90 per cent of pupils so taught are able to swim the first time they enter the water. Mr. Sudor's discovery should commend itself to school authorities everywhere. There is no adult who has not at some time been exposed to danger of death by drowning, and 50 per cent is a liberal estimate of the number able to swim. Between 700 and 800 persons were drowned in the United States in the summer of 1908, which rolled up a total probably no larger than that for the summer just past. A majority of these fatalities could have been avoided if the victims had been taught in school how to swim. If dry swimming is feasible, there is no excuse for failure to adopt it.—Boston Post.

ICE TRUST PROBE.

New York, Nov. 18.—The end of the presentation of the State's case against the American Ice Company was reached this afternoon. Special Prosecutor Osborne announced that the people rested. The trial was adjourned till tomorrow.

Do You Realize What an Important Work the Kidneys Do?

Do you know that every drop of your blood goes to the kidneys hundreds of times every day? Do you know why? To be filtered and purified from its impurities. That is the great work the kidneys have to do. They filter the blood. Then these impurities go to the bladder and are passed out of the body along with the urine.

Do you think it possible for you to be well, unless the kidneys do this work thoroughly?

It is these impurities—this unfiltered blood—that causes backaches, headaches, rheumatism, diabetes, Bright's disease, etc. They poison and interfere with the whole system.

If you have any kidney trouble let Doan's Kidney Pills do for you what they have done for thousands of others. They cure all forms of kidney trouble, and they cure them to stay cured.

Mrs. Maurice Doiron, Charlottetown, P.E.I., writes: "I was troubled with my kidneys for five years. They were so bad at times that I could not cross the floor for the pain. I went to a doctor, but he did me no good at all. I sent to the druggist and got five boxes of Doan's Kidney Pills, and I am glad to say that after taking them I was cured. I have had no trouble for nearly three years now."

Price 50 cents per box or 3 for \$1.25 at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

In ordering specify "Doan's."

MONTREAL PORT TO EQUAL NEW YORK

Water Access By Canal System and Creation of Manufacturing Sites Part of Scheme.

Montreal, Nov. 18.—The first official outline of the scheme which is to make the port of Montreal the equal of any port on the American continent was yesterday afternoon made public at a largely-attended luncheon of the Montreal Canadian Club by Manager George W. Stephens, chairman of the board of harbor commissioners. The scheme, the fulfillment of which will cover a long term of years, aims at nothing less than making this city rival New York in the excellence of its accommodation for ocean-going steamers, and when completed should give the St. Lawrence at Montreal a reputation second only to the Mersey at Liverpool for the transportation of a continent's merchandise and the passenger traffic of the world.

ANOTHER MILLION TO FIGHT PELLAGRA

Carnegie About to Help Combat the Hookworm in South.

New York, Nov. 18. — An intimation has been given to the national health officials at Washington that Andrew Carnegie is about to give an enormous sum for a campaign of eradication against pellagra, the mysterious "Lombardy epilepsy," which has appeared recently in Louisiana, Alabama and Mississippi and frightened the entire south. While there has been no definite announcement it is said Mr. Carnegie's contribution will equal the million dollars which John D. Rockefeller has given for the eradication of the hookworm (uncinariasis) in the south. The spread of pellagra is said to be equally as great as that of the hookworm, and the danger to the section affected even greater.

Mr. Carnegie has a positive rule against discussing any of his benefactions in advance. This rule prevented the press from securing any confirmation of the proposed million-dollar offer for pellagra yesterday. It was stated that if he had such a philanthropy in mind it would be announced through the proper channels when the details of the plan of eradication had been worked out.

TAYLOR—ROSS

Wedding of a Popular Couple in London on Wednesday.

The marriage took place at 8 o'clock Wednesday night, at the Post-office residence, 35 Adelaide street east, Toronto, of Miss Gertrude Rebecca Ross, daughter of Mr. George Ross, I. S. O., and Mrs. Ross, to Mr. Frederick Taylor, son of Mrs. Alfred Taylor, London, Ont. The ceremony was performed by Rev. Dr. Lyle, moderator of the general assembly of the Presbyterian Church in Canada, and Dr. Gutzeit played the Bridal Chorus from Lohengrin, and Mendelssohn's Wedding March, while an orchestra was also in attendance. The rooms were decorated with quantities of chrysanthemums, Killarney roses and palms, and the bride's table was arranged with white Killarney roses, lily of the valley and maiden-hair fern. The bride, who was given away by her father, looked charming in a very exquisite lace gown of the duchesse satin, elaborately trimmed with silk tulle and old Italian lace and richly hand-embroidered in ivory-leaf design, finished with edgings and ornaments of seed pearls; the entire costume was a beautiful creation in the 1813 style. The shower bouquet consisted of white Killarney roses, lily of the valley and maiden-hair fern. The bride's present from the bridegroom was a heart of pearls. Miss Marion Ross was her sister's bridesmaid, and was in a pretty and becoming frock of palest primrose muslin de soie, trimmed with lace and embroidered with French knots, her bouquet was of pale pink roses, and she received a pearl necklace from the bridegroom, who gave a signet ring to his best man, Mr. T. A. Ross, brother of the bride. Immediately after the ceremony a reception was held by the bride and Mrs. Ross, and the bridegroom, who gave a signet ring to his best man, Mr. T. A. Ross, brother of the bride. Immediately after the ceremony a reception was held by the bride and Mrs. Ross, and the bridegroom, who gave a signet ring to his best man, Mr. T. A. Ross, brother of the bride.

FILIBUSTERS BLOCKED.

New Orleans, Nov. 18.—What is alleged to have been an attempt to take a ship load of supplies to Bluefields to aid the forces of General Estrada was protested in a formal manner at the customs house late yesterday by Consul General Altschul, representing the Zelaya Government in Nicaragua. The Nicaraguan official asked that the steamer Utestein be refused clearance papers on the allegation that it had been chartered by ex-President Emanuel Bonilla, of Honduras, for the purpose of taking several revolutionists to Bluefields from this city. The collector of the port here wired to the state department at Washington for instructions, but none arriving late last evening he allowed the vessel to proceed to her destination. The Utestein is owned by Hoidt & Isaacson, of Norway, who also owns the Dictator, which was reported as captured by the revolutionary forces in Nicaragua.

DRIVEN OUT BY FIRE.

Sandusky, O., Nov. 18.—Fifty persons were driven to the street early today when fire broke out in the Mahala Block, a four-story business and apartment building. The building was destroyed, entailing a loss of upwards of \$175,000, including loss to tenants.

CHARLES LYMAN DEAD.

Montreal, Nov. 18. — The death occurred tonight of one of Montreal's oldest and most respected merchants, Mr. Charles Lyman, who fell dead at his home from an attack of heart failure. Mr. Lyman had been identified with the wholesale drug business in Montreal, forming the firm of Lyman, Knox & Co. He retired a few years ago on the formation of the National Drug Company.

PAINTING DICKENS LOVED TO BE SOLD

"Stealing Apples," By Zamacois, Bought By Novelist When He Visited America.

New York, N. Y., Nov. 18. — Zamacois's painting that Dickens loved and took away with him to England, is soon to be sold, among others, at auction, in the dispersal of the collection of the late Theron B. Butler, under the auspices of the American Art Association, in Mendelssohn Hall. When the novelist was visiting the United States, many years ago, he saw the painting in a collection, and it appealed to him for the story that is told.

The subject is "Stealing Apples." The artist has represented a youngster who has been surprised by a stern upholder of the law in an orchard. He protests that there is nothing in his hands, and turns out his pockets to demonstrate that no contraband thing has been there concealed. The forbidden had been placed in the queer little cap that surmounts his head, and an apple appears as though it were a big tassel.

Mr. Dickens took the painting back to England with him, and when some of his effects were sold it went with them. It came into the possession of Mr. Butler and was in his home for many years. His collection includes some twenty works, mostly of the Barbizon school, which have a strong appeal to the aesthetic tendencies of the present day.

CHRISTMAS IS COMING

Shop Windows Are Beginning To Take on Holiday Appearance.

Though there are still some five weeks before Christmas Day, the shops are already beginning to take on a festive appearance. The most alluring displays are being placed in the windows, and everything possible is being done to tempt the unwary passer-by to start the Christmas fever early. Already there has been a strong demand for gay silks and baby ribbons, and those other things that are used by loving aunts and sisters to manufacture those delightfully useless collar bags and pin-cushions and similar things for their unhappy male relatives. Oh, these are busy days for the ladies, and most of them have already a little pile of presents all prepared and duly wrapped up in pink tissue paper. In the last few days, too, the cooler weather has made people begin to realize that the holiday season is imminent, and the tradesmen are rejoicing in a very decided increase in business. The express companies are handling more parcels, and everything goes to show that the Christmas rush is beginning. It is the day of the early bird, and the wise ones mindful of the rush of the weeks preceding the holiday are already busy in their preparations.

FIRST DIVISION OF FEDERATION

Roll Call Was Demanded Over Report of Adjustment Committee.

Toronto, Nov. 18.—For the first time since the A. F. of L. began its convention here a division was called for. Richard Rickard, demanding a roll call of delegates on the report of the adjustment committee recommending the amalgamation of international associations of workmen and brotherhood of railway carmen. About 25,000 men are involved.

"Condition of things is so serious and critical that the time has come when we must say to groups of labor, 'You must amalgamate for our general protection,'" said Vice-President O'Connell to the convention.

The division on the report, and amalgamation will follow. There were 13,561 votes cast, with 12,189 voting yes and 1,377 voting no.

The convention also forced together the Amalgamated Brotherhood of Carpenters and Joiners and the Amalgamated Wood Workers.

After a hot fight they gave the iron molding jurisdiction over the metal polishers.

Delegates thumped desks at the news that the Washington court of appeals had affirmed the stay of Nov. 29, in the Gompers, Mitchell and Morrison appeal.

CORRESPONDENCE.

In Defence of the Kindergarten.

To the Editor of The Advertiser:

Will you allow me to enter my little protest against the action of the school board regarding the kindergarten teachers? If they had ever been in kindergarten and watched the teachers for a whole morning teaching and training our little tots, not only in kindness and unselfishness but in actual knowledge, they would not ask them to take a new school in the afternoon and go through all that again. And not only that, but there is nearly two hours' work to be done after school, getting the work ready for next day, and this doubled would make four hours' work for the school session—longer hours. I will venture to say, than any of the school board work at their professions.

One of our principals of the city says that a child who has gone to kindergarten is two years ahead of the one who has not when they enter the grades.

As for doing away with Miss Laidlaw's services and getting Inspector Edwards to do the work, it would be unfair to both. Mr. Edwards has not been trained for kindergarten work. Surely if it is necessary for the city fathers to economize there are other ways of doing so than making war on girls, the faithful and conscientious teachers of our little children. They might, as my boys say, "Take a man of their own size."

A MOTHER OF SIX.
London, Nov. 19.

HENRY BONER DEAD.

Philadelphia, Nov. 18.—Henry S. Boner, for 32 years superintendent of the Lutheran Publication Society, and one of the best-known laymen of that denomination in the country, died at his home here yesterday, aged 73.

FAST MAIL WRECKED.

Columbia, S. C., Nov. 18.—Seaboard Air Line train No. 43, known as the Florida fast mail, was wrecked at 2:45 this morning about two miles south of Denmark. The fireman is reported killed, and Engineer Pett slightly injured. The conductor, baggage master and express messenger also were injured. No passengers were hurt. The entire train was derailed, and the engine landed forty feet from the main line.

Why Stanfield's Use Nova Scotia Wool

THE chief reason is because the Stanfields have never found any other wool that makes Underwear so peculiarly suited to Canadians.

The salty, ocean breezes and healthful climate, coupled with the rich grazing, give Nova Scotia wool a quality which is not found anywhere else.

Nova Scotia wool is perfectly blended.

It is soft and smooth, yet staunch and strong. It can be spun like silk and wears almost like steel. Garments, knitted of this fine wool, give the desired warmth and are not heavy or bulky.

It is no exaggeration to say that the Stanfields get the pick of the Nova Scotia wool. The founder of these mills did much to develop the sheep-raising industry throughout the Maritime Provinces. The farmers saved their best wool for him, and continue to send their high grade wool to the Stanfield mills.

Then, too, this wool reaches the mills in the best possible condition. There are no long railroad hauls—no lengthy journeys in the holds of tramp steamers. The wool is shipped direct to Truro as soon as sheared. Experts sort, clean and make it ready at once for its trip of transformation into Stanfield's Unshrinkable Underwear.

Stanfield's Underwear is made by the only process which takes the shrink out of the wool before the garments are knitted.

The value of this discovery—made by the founder of the Stanfield Mills—is shown by the growth of this business, which is now capitalized at \$750,000.00 and employs over 300 operatives.

Stanfield's Unshrinkable Underwear is made in 3 standard weights, Light (Red Label), Medium (Blue Label) and Heavy (Black Label) and in 17 other weights and qualities to suit the requirements of every man and woman.

The best dealers everywhere handle Stanfield's Underwear. Catalogue showing styles, and samples of fabric, sent free for your address.

LAYMEN'S CONTRIBUTIONS

Presbyterians Gave Largest Amount, With Methodists a Close Second.

Toronto, Nov. 18.—That the Laymen's Missionary Movement, which was organized in Toronto about two years ago, was spreading to all English-speaking countries, was the assertion of John R. Mott at a mass meeting here. He said the eyes of the whole world are on Toronto.

The movement decided to try and raise this year \$500,000. Last year the amount reached from the various denominations was as follows:

Presbyterians, \$102,878.
Methodists, \$101,374.
Anglicans, \$81,876.
Baptists, \$55,065.
Congregationalists, \$4,985.
Salvation Army and other societies, \$28,820.

Next year the amounts suggested that each church should give is: Presbyterians, \$129,000; Methodists, \$120,000; Anglicans, \$82,000; Congregationalist, \$66,000; Baptist, \$60,000; Salvation Army and other societies, \$42,000.

A banquet was held in Massey Hall, at which about 600 were in attendance. John R. Mott was the chief speaker, and he urged all to aid in the evangelization of the world. He said that in other countries the poor were taking up the work, while the rich just look on indifferently. In his opinion the greatness of the undertaking alone would make it attractive enough to your family tell others about it.

To show the great progress made, the receipts in 1907 were \$175,000, and in 1908 \$385,790. The object was, half a million, has not been attained, but all eyes are still fixed on it.

CADET LINDSAY WON

Strathroy Man Wins Cross-Country Run at Kingston.

Kingston, Ont., Nov. 18.—Cadet Rogers, Toronto Junction, was first, in 35 minutes; Cadet De Lotbiniere, Quebec, second, and Cadet Lindsey, of Strathroy, third in the cross-country run of five miles pulled off yesterday by 36 cadets of the Royal Military College. Company A won the company prize.

TRAVERSED "PENN." TUNNEL

First Official Trip Under the Hudson and East Rivers.

New York, Nov. 18.—Burrowing beneath the Hudson River, under Manhattan's skyscrapers, and below the East River's bed, a railroad train today for the first time traversed the new tunnel route of the Pennsylvania line from New Jersey to Long Island. The trip was taken by President McCrea and the directors of the Pennsylvania Railroad, to inspect the work, which is expected to cost before it is finished, close to \$100,000,000.

The officials' train entered the tunnel at the Harrison, N. J., terminal, halted at the new Pennsylvania station in Manhattan, and then proceeded in the tube across the island and under the East River, to the terminus in Long Island City.

It is stated that the tunnels will be ready for use by next June.

UNKNOWN VESSEL COMPLETE WRECK

Duluth, Minn., Nov. 18.—An unknown vessel is ashore on Isle Royale, and said to be a complete wreck. Capt. Bell, of the steamer Baker, of the Pittsburgh Line, reported from Two Harbors that he had seen an unknown twelve-hatch vessel, with a black smokestack and a light hull, ashore.

ALMOST WIPED OUT.

Jamestown, N. Y., Nov. 18.—The most disastrous fire that has ever occurred in the village of Westfield broke out early today and the central part of the village was almost wiped out, including the Menton House, on which the loss was \$30,000.

The fire departments were called out from Fredonia and Brockton. The fire was under control at 9 o'clock this morning. The total loss will reach \$100,000; insurance about \$60,000.

More Than You Expect in Soap

You who are used to ordinary soaps will be surprised when you first try Taylor's Infants' Delight Soap.

No other soap compares with it for every toilet purpose—the bath, massage, shampoo, or for washing baby's rose-leaf skin.

For we make this soap of pure coconut oil from the isle of Ceylon, and vegetable oils from France.

We clarify and blend these oils and mill them by our own special process. Nothing is left undone to make this soap supreme.

Infants' Delight Soap

is the product of forty-four years of conscientious effort and costly experiment. Over a million Canadian families find it superior.

Its use prevents chapping, roughness and other skin complaints.

Containing a small amount of boric acid, it combines the healing qualities of this much used antiseptic and cleanser with the stimulating and nourishing action of pure vegetable oils and essences.

It makes a rich, creamy lather, cooling and delightfully refreshing.

Prove for yourself that a cake will outlast any ordinary soap. See how delightful it is to use three times a day. Get a cake from your dealer today.
