HERE are many distinct differences between Lowe Brothers "High Standard" Liquid Paint and ordinary paints, but the most noticeable is in the pocketbook.

Ten gallons of "High Standard" will usually do as much work as twelve to fifteen gallons of cheap paint—and do it much better.

"High Standard" costs a little more per gallon, but you will use so many less gallons that your total cost will be lower. It works easier, toc, and your painter can apply it in less time. "High Standard" is thoroughly tested to meet

your requirements. Ask us for color cards. We will cheerfully give you an estimate on your requirements.
