Associated Press Despatch. New York, Nov. 9.—In a listless trading session bond prices merely marked time today. Buying was restricted by uneasiness over the money situation, follwing a rise in the call loan rate and the extensive calling of loans by banks to correct a deficit shown in last week's claring-house statement. This feeling was intensified after the close of the market when the Federal Reserve Bank of Boston announced an increase in its rediscount rate to 4 per cent.

Unless the reserve rates at other centers are advanced, bankers do not expect any change in the general character of the bond market.

The only showing of strength today was given by the investment rail issues, some of which attracted institutional buying orders. Gains, however, were limited, and losses were correspondingly narrow. Profit-taking accounted for the reactionary appearance of the copper, rubber and motor issues, which attracted institutional of stocks. Oil company liens, on the other hand, maintained a fairly firm tone.
