

The Free Press. LONDON, ONT.

IMPOTENT BATTLE-WINNERS. It will no doubt be the general opinion that the Grits at Ottawa have not added anything to the attenuated prestige of the Opposition by the course that they have taken during the now closing session of Parliament.

Mr. Mills amongst their number—have had to hang their heads in shame at the failure of their malicious enterprises. The legislation that has been brought forward by the Government has been found to be salutary, and the arrangements that have been made under which the C. P. R. are about to pay back to the country the \$20,000,000 that was lent to them two years ago, have been received by the country with great satisfaction. The bill on which has done not a little to open the minds of the people to the true inwardness of the Opposition, who, in order to catch a few votes from the province of Quebec, were ready and willing to censure the administration for the firmness that it exhibited in carrying out the law as respects the arch-rikel.

It has been seen that the "high minded Mr. Blake," the possessor of that "serene soul," was not above endeavoring to take advantage of a passing prejudice on the part of some of the Lower Canadian, and to denounce those that upheld the law, and saw that justice was done to those who had conspired against the country, and had caused the loss of so many valuable lives. Whilst Mr. Blake was squabbling as to the supposed injury of the (a condition which it was simply proven had been assumed one) the leader of the Opposition did not seem to carry with him one thought as to the losses that the Volunteers had sustained. All that he was after was French-Canadian votes; and in order to get them he was willing to arraign the Government on a plea that was as frivolous as it was transparently untrue. But the people will not forget Mr. Blake on this matter when the day of reckoning comes. The efforts of Mr. Mills, and Mr. Edgar, to fasten charges of wrongdoing on the Hon. Mr. Bowell and Mr. John White, M.P., failed in a most ridiculous manner. The evidence submitted to a committee of the House was conclusive on that point, and though Mr. Edgar stated that he had trustworthy information that a wrong had been committed, it turns out that he has been unable to point out even the source of his alleged information. But when the tables were turned a different state of things was presented. The immaculate Mr. Mills, who is ever suggesting that others are engaged in wrongdoing, has been detected and exposed in a transaction in connection with his bosom friend, H. H. Cook, M.P. which bears on the face of it something that might be very properly called by a much harder word than favoritism. It has been seen that though defeated at the polls in 1878, he was not unwilling—after that event, and within eight days of an enforced resignation from office, to make an order in favor of Cook which deprived the country of \$1,800 that was due to it, and had been lying due for several years. Mr. Mills has not as yet detected or attempted any explanation of that gross dereliction of duty. And the conclusion that has been come to is that no sufficient explanation can be given, and that the bare fact is that he allowed and assisted Mr. Cook to pocket \$1,800 that did not belong to him. It is true that the sum is not a large one. But the transaction is one that lets in a good deal of light on the Grit methods. We know that Mr. Blake was able to put a large sum of money into the pockets of his "friend Moore" by writing a little note commending him to the special care of Mr. Mackenzie. And now it comes to light that Mr. Mills was not one whit less anxious to do the same kind of service, at the expense of the public, for his friend Mr. Cook. If all the Grit Ministers had their special friends such as Moore, Cook and Anglin, it is no wonder that during the Grit regime the country and its service were "going to the devil."

One thing they do in the Boston retail stores that might well be emulated here. They close at six o'clock all the year round, and during the hot summer months at five. Sharp as the Yankees are reputed to be, after a dollar, they allow their clerks to become acquainted with their families. In Chicago, writes a young Canadian, the time is entirely devoted to eating, sleeping and working. And on Sunday the clerks "go to bed" as to make church-going a labour instead of a pleasure. If the eight-hour movement is to prevail there is no class amongst us to whom it would prove so salutary as to the store-keepers and their assistants.

The Guelph Council has appointed a committee of citizens to enquire into the feasibility of establishing and operating an electric light system in charge of the city.

COMMERCE IN FRUIT.

Judging by an interview with Prof. Wm. Saunders, of this city, published in the Canadian Gazette, of London, England, the people of Great Britain are being astonished by the fruit display in the Canadian court at the Colonial and Indian Exhibition. It demonstrates to them the wide possibilities of our climate and soil, and those varieties of fruit which require months of sunshine for their development afford an effective contradiction to the impression which has not been wholly eradicated from the minds of millions of Britons, that in Canada snow covers the earth for a greater portion of the year. The collection will do more than that; it will tend to stimulate our export trade of apples, and perhaps open up a demand for some of those species of fruits which we have never yet attempted to ship. It has been demonstrated, for instance, that many of our desert fruits, which, under ordinary circumstances, decompose within a week after ripening, may be safely carried a long distance with the aid of the refrigerator system. The adoption of this plan may bring about a new era in our fruit trade. Even if nothing more than our apple trade should be benefited, very much good will be done. Last year we exported 242,165 barrels, valued at \$607,136, and that, too, when the crop was by no means a large one. The prices obtained were very good; so good, in fact, as to tempt American shippers into branding their apples as of Canadian growth, in order to gain the benefit of our good reputation. In connection with our trade in fruit, two things appear to be beyond controversy:—That we have, by so means satisfied the home demand, and our foreign trade in its infancy. We can grow the finest apples in the world, and with attention to packing and naming, so as to retain the confidence of the buying public of Great Britain, we shall find that to be one of our most profitable branches of commerce. It is with a view to bringing the colder sections of the North-west into usefulness in this respect, that Hon. Mr. Carling intends to establish an Experimental Station there, to test, amongst other things, the hardier varieties of Russian fruits, with a view to their adaptation to those districts. The older Provinces are rapidly developing in fruit culture, and the Colonial and Indian Exhibition will undoubtedly do a great deal towards making known the many varieties and classes we are able to produce and offer for sale.

British capital continues to flow freely into American enterprises of almost every kind, South and West. Amongst the newest undertakings is the Scottish Carolina Timber and Land Company limited, with a capital of 300,000 shares of £10 each, established to purchase, cultivate and settle, improve and associate lands and hereditaments in the State of North Carolina and elsewhere in the United States. The company, which is almost the settlement of an entire territory, and includes some 140 square miles, which is bisected by the Pisagua River, a navigable stream of considerable importance. The title to the land is held in absolute title to upwards of 80,000 acres. The first race ever rowed in Great Britain in the new style of boat, sculling four, was rowed on the Thames on Saturday, of last week. Dr. Furnival, the President of the club, writes: "Two pairs of sculls in a skiff are all right; so are three pairs in a randaun, but four pairs in a four, eight pairs in an eight—good heavens, what is the world coming to! However, sculls for sculls is the one great change wanted in boating. All that has to be made, notwithstanding all the pickings in the world, is not on opposite sides, as with oars, but on the same side, and more equally and usually sit motionless on a platform, occasionally fanning herself, and speaking in a low voice. She is more equally and more profitably applied than with oars—a crew gets sooner together and gets more pace out of its boat. A sculling eight will do well as the fastest boat ever seen on water."

MR. BLAKE AND THE CANADIAN PACIFIC.

From the Montreal Herald. When Mr. Blake delivered his latest anti-Canadian Pacific Railway speech we found that he was as frigid as an iceberg, and that he was as transparently untrue as the sun. But the people will not forget Mr. Blake on this matter when the day of reckoning comes. The efforts of Mr. Mills, and Mr. Edgar, to fasten charges of wrongdoing on the Hon. Mr. Bowell and Mr. John White, M.P., failed in a most ridiculous manner. The evidence submitted to a committee of the House was conclusive on that point, and though Mr. Edgar stated that he had trustworthy information that a wrong had been committed, it turns out that he has been unable to point out even the source of his alleged information. But when the tables were turned a different state of things was presented. The immaculate Mr. Mills, who is ever suggesting that others are engaged in wrongdoing, has been detected and exposed in a transaction in connection with his bosom friend, H. H. Cook, M.P. which bears on the face of it something that might be very properly called by a much harder word than favoritism. It has been seen that though defeated at the polls in 1878, he was not unwilling—after that event, and within eight days of an enforced resignation from office, to make an order in favor of Cook which deprived the country of \$1,800 that was due to it, and had been lying due for several years. Mr. Mills has not as yet detected or attempted any explanation of that gross dereliction of duty. And the conclusion that has been come to is that no sufficient explanation can be given, and that the bare fact is that he allowed and assisted Mr. Cook to pocket \$1,800 that did not belong to him. It is true that the sum is not a large one. But the transaction is one that lets in a good deal of light on the Grit methods. We know that Mr. Blake was able to put a large sum of money into the pockets of his "friend Moore" by writing a little note commending him to the special care of Mr. Mackenzie. And now it comes to light that Mr. Mills was not one whit less anxious to do the same kind of service, at the expense of the public, for his friend Mr. Cook. If all the Grit Ministers had their special friends such as Moore, Cook and Anglin, it is no wonder that during the Grit regime the country and its service were "going to the devil."

That notorious Paris journalist, Henri Rochefort, who took an active part in the late Commune, for which he was banished to New Orleans, but subsequently escaped and was pardoned, has just completed what is termed "A very thrilling melodrama." In four acts, called "L'Infernal" ("The Irish Girl.") The plot is based upon the Fenian raid on Canada in 1866. The heroine—Susannah Campbell—is a ward of Lord Hastings, the Governor-General of Canada. The hero is Richard Sweeney, a dashing character, with all the glorious virtues and some of the dazzling vices of a young Irish gentleman of the old school. The scene is laid in Quebec. There are battles and riots, moonlight rides, love-making, treachery and female dagger thrusts. The fourth act ends with a terribly realistic scene, where the heroine and the hero are placed against a wall—like the Fenian communists in 1871—and are shot by a platoon of British soldiers. M. Rochefort intimates that he means "The Irish Girl" to be the Irish home rule war bard's "Paris" is to the Dutch republicans.

CURRENT TOPICS.

The growing interest on the Continent in Canadian matters, says the Canadian Gazette, is indicated by the recent publication of the "Guide Universel de l'Est-Canadien," a copy of which has just been sent us from Brussels. This pamphlet deals with British Columbia, and the writer, Mr. G. Lenoir, can certainly claim credit for having exhaustively examined the resources and attractions of the Pacific Province.

Following a suggestion made some months ago by Lord Rosebery, it has been decided to found a Scottish History Society for the printing of unpublished documents illustrating the civil, religious and social history of Scotland. Amongst the MSS which it is proposed to publish may be mentioned letters of all dates for the last three centuries, charters and commonplace books of biographical and literary interest, household books, farm and estate accounts, genealogical memoranda, as well as presbytery and kirk records, parochial registers, and other ecclesiastical documents.

An inhabitant of London, Eng., consumes in a year thirty-two times as much fish as an inhabitant of Berlin, and though the stores of the North Sea are open to the German metropolis Paris, with her 2,300,000 inhabitants, consumes more fish than the population of 47,000,000. Berlin requires yearly 1,825 million pounds of food, of which 3 million are in pounds of fresh meat, 3 million in pounds of birds of all sorts, 24 million pounds of game, 77 million litres of milk, 30 million pounds of butter, 8 million pounds of cheese, 19 million pounds of eggs, 51 million pounds of fruit, 3 million pounds of salted fish, 21 million pounds of fresh fish, and 8 million pounds of pickled fish.

British capital continues to flow freely into American enterprises of almost every kind, South and West. Amongst the newest undertakings is the Scottish Carolina Timber and Land Company limited, with a capital of 300,000 shares of £10 each, established to purchase, cultivate and settle, improve and associate lands and hereditaments in the State of North Carolina and elsewhere in the United States. The company, which is almost the settlement of an entire territory, and includes some 140 square miles, which is bisected by the Pisagua River, a navigable stream of considerable importance. The title to the land is held in absolute title to upwards of 80,000 acres.

The first race ever rowed in Great Britain in the new style of boat, sculling four, was rowed on the Thames on Saturday, of last week. Dr. Furnival, the President of the club, writes: "Two pairs of sculls in a skiff are all right; so are three pairs in a randaun, but four pairs in a four, eight pairs in an eight—good heavens, what is the world coming to! However, sculls for sculls is the one great change wanted in boating. All that has to be made, notwithstanding all the pickings in the world, is not on opposite sides, as with oars, but on the same side, and more equally and usually sit motionless on a platform, occasionally fanning herself, and speaking in a low voice. She is more equally and more profitably applied than with oars—a crew gets sooner together and gets more pace out of its boat. A sculling eight will do well as the fastest boat ever seen on water."

Ex-King Theobald's famous hairy family, which he long kept jealously at Mandalay, are to visit Europe for exhibition. The family have been renowned in Burmese history for many years, and the present monarch, a mother and son, form the Burmese generation. The mother, Maphon, is sixty three, quite blind and usually sits motionless on a platform, occasionally fanning herself, and speaking in a low voice. She is more equally and more profitably applied than with oars—a crew gets sooner together and gets more pace out of its boat. A sculling eight will do well as the fastest boat ever seen on water."

Henry Deroway, a French-Canadian living at Dover, N. E., about twenty years old, fell in love with Alice Lockwood, commonly "Dancing Alice," of the notorious Salvation Army. She, as a port girl, at first encouraged him, but after a while her hands and heart went away from Henry, which made his life a void, and he determined to put himself out of the way. He secured a bottle of whisky, some nitric acid and a quantity of quicksilver. The former he drank about half-past eight o'clock and became very noisy. His father and others tried to get him into the house, but fruitlessly. He continued saying, "All poison myself," and started on a run for about three blocks. When in front of a shoe shop he drank the nitric acid and quicksilver, which he had mixed. In a short time he commenced vomiting and was carried home. A doctor was sent for, but when he arrived the youth was dead.

A CURE FOR DEUMKENNICK, opium morphia and kindred habits. Valuable treatise sent free. The medicine may be given in a cup of tea or coffee, without the knowledge of the person taking it. It is so distressing. Send 3c stamp for full particulars and testimonials. Address—M. V. LUMON, Agency, 47 Wellington St. East, Toronto, Canada.

DR. PRICE'S SPECIAL FLAVORING EXTRACTS MOST PERFECT MADE. Purest and strongest Natural Fruit Flavors. Vanilla, delicious and naturally as the fruit. PRICE BAKING POWDER CO., CHICAGO, ILL., U.S.A.

ROYAL BAKING POWDER Absolutely Pure. This powder never varies. A marvel of purity, strength and wholesomeness. More economical than the ordinary kinds, and cannot be sold in competition with the multitude of low test, short weight adulterated powders. Sold only in cans. ROYAL BAKING POWDER CO., 108 Wall Street, N. Y.
