## **Rival Fleets** Soon Meet

Russian Squadron Contains the Greater Array of Ships But Superiority With Japs.

Rojestvensky's and Togo's Respective Commands May Clash at Any Time.

**Experts Concede That Chances** Are With Japs Already Season. ed by Experience.

THE Baltic fleet of Rojestvensky seems cumbrous and ill-balanced in comparison with the trim powerful and proven fleet of Togo. The chances favor Togo. But the Japanese admiral, ever cautious, will regret victory, well paid for. With the coming of a further Russian squadron, he will be warv of risking his ships even coming of a further Russian squadron, he will be wary of risking his ships, even to accept an opportunity to inflict a crushing blow. Togo has a base in the Pescadores; Rojestvensky has no base, unless he chooses to force a violation of neutrality which would threaten a world-wide war. From Togo's base his flotilas of torpedo craft will dash toward the Russian ships; submarines will also probably be used. It is well known that the Japanese navy has these dangerous vessels; the Japanese admiralty has said so officially, whatever that may be worth. The Russians have a preponderance of battleships, seven as compared with five of Japan. The Japanese have, however, a much greater preponderance of armor-

battleships, seven as compared with five of Japan. The Japanese have, however, a much greater preponderance of armored cruisers which would more than make up for the advantage in superior weight of Rojestvensky's heavy fighting ships. Furthermore, the Japanese are greatly superior in torpedo craft, and two of the Russian battleships rank as less effective than any one of half a dozen of the magnificent British-built armored cruisers of Japan. Counting auxiliaries and colliers as well as fighting ships, his fleet numbers over one hundred craft. But Russian, British, French and German naval experts have already pointed out that a majority of the vessels of the fleet constitute an element of weakness rather than of strength. Many of the Russian ships are really ineffectives. Some of them are naval experiments whose value is doubtful. Others are antiquated and incapable of fighting ships of modern construction and equipment. Rojestvensky is, moreover, handicapped with a big fleet of colliers and supply ships, on whose safety the survival of his fighting ships depends. The latter must, therefore, be disposed in battle in a way to protect the non-fighting craft. Some of the colliers and supply ships are sailing under neutral flags, but Togo has given ample notice to the world that he will sink any neutral vessel serving the Russian fleet.

The Japanese Fleet

The Japanese fleet consists of about forty vessels, including auxiliary scout cruisers. Togo's most effective fighting ships are four first-class battleships, seven swift armored cruisers and thirteen protected cruisers, all modern in construction and equipment. Accompanying his fleet is a big flotilla of swift destroyers and topedo boats. Owing to their superior equipment the swift unprotected cruisers of his command will be more than a match for a majority of the obsolete ships in the Russian armada, and they will doubtless be used to harass the transports. Togo is unincumbered by any of the latter, being in wire less communication with his naval base at Formosa. All of his ships are, moreover, clean bottomed and officered and manned with seasoned veterans flushed with the triumphs achieved during the past year. Rojestvensky's ships are, on the other hand, foul, owing to their long sea voyage without a chance to dock. Neither he nor his officers and crews have had any experience in actual warfare and the North sea incident furnished positive proof that they are easily rattled. The Russian is further handicapped by having shorter-ranged armament on his ships than the Japanese and ammunition vastly inferior to the Shimotose shells on Togo's ships, which wrought such havoc to the Port Arthur and Vladivostok squadrous. A Russian admiral has predicted that Rodestvensky is rush-The Japanese Fleet

ivostok squadrons. A Russian admiral has predicted that Rolestvensky is rush-ing to certain destruction. It is to be assumed that the powerful Japanese fleet mentioned in the cables consists of all the following battleships and armored cruisers, and the majority of the protected cruisers, in addition to destroyers and torpedo boats: Japanese Battleships.

The statement was given out as an official denial of the allegations that Chinese gambling joints had long enjoyed immunity from prosecution by paying tribute to certain officers of the police department through a "man higher up." In his statement, the commissioner says that the more money people pay for protection the less protection they will get. The statement says in part: "Chinatown must obey the law and keep its money in its pocket and understand that there is one rule for black men or white men or yellow men in New York."

the presidency of the bank and the facts of the case were laid before the federal authorities.

The complaint was sworn to by United States District Attorney H. K. Butterfield. It charges that Bigelow, as president of the First National Bank, embezzled a sum exceeding \$100,000.

A complaint and a warrant identical with those in Bigelow's case was made out for Harry Goll, assistant cashier of the bank, but Goll could not be found.

President Bigelow was taken before United States Commissioner Bloodgood and bail was fixed at \$25,000. He was released to appear before the next federal grand jury.

The Defaulter's Confession

President Bigelow's confession was made at a meeting of the board. He met the directors yesterday and all of last night. In addressing his fellow directors, President Bigelow said he had a painful statement to make—a confession that he misdirected the funds of the bank and that an examination of his books and a comparison of figures would show that he was indebted to the bank for more than \$1,450,000. This money, he said, had been lost in speculation in wheat and stocks. Not a dollar of it could be recovered, and the only sum he could offer toward compensating the bank was personal securities valued at \$300,000.

Mr. Bigelow had been recognized as the foremost financier of the Northwest.
