THE TRAVELERS AND THE MERCHANTS.

Those who imagine that the vote on Monday night in the board of trade settled the issue between the merchants and their travelers is likely to be mistaken.

Those who imagine that the vote on Monday night in the board of trade settled the issue between the merchants and their travelers is likely to be mistaken. It has narrowed down to a fight between the board of trade, and what practically is a trade union, possessed of a large fund, energetic members, and considerable influence.

In the matter of argument the merchants have the big end of the stick; they outnumbered their opponents on Monday night and left them high and dry when it came to a vote.

The talk of a city paper yesterday that the meeting was packed and that the board of trade was never intended for a dead-heading institution, was silly. It was the best meeting in the way of discussion held in Toronto for many a day.

The board of trade have the public sympathy in that if they succeed the public will eventually share in the benefits of reduced fares. The more concessions are given to the travelers the sooner will they have to be given to all.

There is one thing that appears to have been overlooked, namely, that the board of trade in antagonizing the travelers is endeavoring to get up what, in some respects, is an institution like the present Travelers' association. For the idea is to make the board of trade a desirable body to join by reason of the traveling, insurance, and other privileges it will confer.
