BEAUTIFULLY SITUATED ON THE UPPER OTTAWA.

To is only a few years comparatively since Penbroke was difficult of access and was askedom waited by she ontaide world excepting by commercial men and tourists anxious to see for themselves the magnificeral scenary of the Upper Ottawa. The extension of the Brockville and Ottawa Railway, now apart of the Canadian Pacific Railway, brought it into direct communication by rail, and the building of the Canadian Pacific Railway to the Pacific Ocean has placed it on the direct line of trans-continental travel. From Pembroke to Des Josebina, 46 miles above, was and still is a favorite trip, and all along nature is seen on her grandest scale. An expansion of the river, known as the Upper Allumette Lake, and an aland 46 miles in length, also named Allumette, are directly in front of, the town, while away in the distance the Laurentian range of motutains, which follows the course of the river, forms in back-ground majestic and innovant. Durings the trip the fampus "Oiseau" Rock (bird-rock) is passed and the the islands in the Narrows, pronounced by many to be far more beautiful and picturesque than even the Thousands Islands of the St. Lawrence. The river is always the same majestic, irresustible stream, well worthy of being called the Grand River, the name given it by the early French explorers. Among the historical names associated with its early history are those of Champlain and Cadient. On the summit of a hill near the Grand Chute as the grave of Champlain and Cadient. On the summet of a hill near the Grand Chute as the grave of Lagicax, who died from exhaustion after als encounter with the initorical names associated with its early history are those of Champlain and Cadient. On the summet of a hill near the Grand Chute as the grave of Lagicax, who died from exhaustion after the farmet who come here to pray, believing that design of the fine of the control of the contr

France the gold of India and the riches of the Orient. Pembroke was one of his stopping places, and what transpired between him and the dusky children of the woods there is very little record. After his visit 200 years clapsed before another white man appeared upon the scene. In the spring of 1828 Peter White meddled his way up from Ottawa, and builts his cabin near where the Muskrat discharges into the lake. Others followed and by and by it became the greatest ceutre for lumbering operations in the Province. It was incorporated as ac village in 1802 and as a the neatest and most reliable manner. Undertaking in 1877. In 1861 it was made the county seat of the county of Renfrew, after which the present Court House and Gaol were bulls at a cost of some \$50,000. The Court House is 96x46, and is built of a frestone, almost white quarried about 4 miles from town. Though exposed for over 20 years it is as bright and clear as ever, and without the faintest trace of rush. Other valuable building stones are quarried in the immediate vicinity, one being a brown frestone, of a warmer tist than the Adjuda brown stone of the Credit Valley. This stone was selected for the post office now in course of crection.

The town is 115 miles from Ottawa and 758 from Port Arthur. The Canadian Pacific Railway connects it with Ottawa on the south side of the river, and the Pontiac Pacific Almedian Railway on the north side. Pacific Junction Railway on the north side.

Though lumbering has to a certain extent moved never to the great pine woods, Pembroke still retains much of its former importance in this industry. Immense quantities burned down a year ago. It is a 2-story build-

broke still retains much of its former importance in this industry. Immense quantities of legs come down the tributaries of the Ottawa, and there are two extensive saw mills manufacturing lumber. It is also the headquarters for lumbering supplies.

The modern town is substantially built up with two and three story brick blocks, and many of the private rendences are models of elegance. It has both the are and incandescent system of electric light, and waterworks are in contemplation. Here we find the are light costs \$75 per annum and the incandescent spice. The Town Hall is a commodious 2-story brick block tower, erected in 1874 at a cost of \$18,000. On the ground floor are the commodities and supplied the Box and supplied the Box and supplied the Government is erecting for the town.

The Town Hall is a commodious 2-story brick block tower, erected in 1874 at a cost of \$18,000. On the ground floor are the commodities and supplied the Box and supplied the Box and supplied the Box and supplied the spin part of the private rendences are models of the flower and an account \$8.516. U.S. \$1.1318.

The Town Hall is a commodious 2-story brick building with clock tower, erected in 1874 at a cost of \$18,000. On the ground floor are the commodities and supplied the Box and supplied the Box and supplied the Box and supplied work and manufacture doors, such blinds, moulding the most life seated for \$00 people. The Council consists of Wm. Murray, Mayori W. O'Meara, and box and bridge work, and house furnishings generally. They also do a good deal of mill and bridge work, and to the provisions box and the produce Exchanges are said of all commodities dealt in Our patrons are kept commodities of the produce Exchanges and contract of all commodities of the produce Exchanges and contract of the commodities of the produce Exchanges and box and box and box and box and supplied work and supplied work and supplied the Bishop and fire stations and supplied the Bishop and fire stations and supplied the Bishop and supplied the Bishop an in contemplation. Here we find the are light costs \$75 per annum and the incandescent \$10.

The Town Hall is a commodious 2-story trick bunking with clock tower, erected in 1874 at a cost of \$15,000. On the ground floorare the commodious 2-story is fitted up as a hall with stage and acenery and is seated for 800 people. The Council consists of—Wm. Murray, Mayor; W. O'Meara, Revey R. C. Millar, Deputy-Revey Council lors: F. E. Fortin, R. Russell, H. Jamieson, W. G. Irving, R. H. Roe, J. L. Morfis, P. Kelnor, R. Meners, fr., and R. W. Kenny, A. J. Fortier is Clerk and Richard White Treasurer. The total assessment is \$1,500,000 and the population is given as 4405.

The county officers are—John Deacob, Judge; Jas. Morris, Sheriff, Andrew Irving, Registrar, Arch. Thomson, Clerk County, Morfast, County Treasurer; R. G. Moles, Wardaug R. G. Scott, School Lapsector, S. E. Mitchell County Clerk; and J. Wright, Jaller; W. O. Irving, Clerk Division Court, has also has office in the Court House.

The High School is a brick building erected at a cost of \$8000, and 3 teachers are employed, L. Lapp being the Principal. The Public School is also a brick structure which cost of \$8000, and a Couvent.

The Preshyterian. Methodist, Anglican and Roman Catholic chargies are all remark ably fine attructures of advanced architecture.

The press is represented by The Observer, published by R. C. Miller, and The Standard, published by R. C. Miller, and The Standard, published by R. C. Miller, and The Standard, published by Rose & Ross.

crices.

Why are they there?

Paresis!

Did it come on at once?

Not at all. It was a gradual but positive growth. They overtaxed nature. The drain on their vitality, their nerve powers, their brain tissue, was too great, and they gradually but surely sank under it. The things they did to bring this sad end about are precisely the same things that are being done by thousands of men and women to day. It is not necessary to name them. They all end disastrously unless checked or regulated.

Prof. Phelps, of Dartmouth College, knew this fully when he began his experiments which resulted in the discovery of the wonderful Parnes Colery Compound. He realized that paresis (consumption of the brain) was our great National weakness. He knew that the brain and nervous system must be fortified to meet the great strains which modern life bring upon it. He saw that men were becoming debilitated and women weakened by the pressure and demands of life, and he sought and discovered the remedy Paine's Celery Compound, if rightly taken, will renew the brain and build up nerve tissues as fast as they become exhausted. It is not a narcotic. It contains no drugs, no nostrums. It is perfectly pure. It is absolutely harmless. The high character of its discoverry marnates this, and the
