Experiments With Farm Crops Can You Answer

The members of the Ontario Agricultural and Experimental Union are pleased to state that for 1915 they are prepared to distribute into every township of Ontario material of high quality for experiments with grain, fodder crops, roots, grasses, clovers and alfalfas, as follows:

No. Experiments. Plots

Experiments.

Testing two varieties of oats...

Testing O.A.C. No. 21 barley

Testing two var. spring wheat. Testing two var. buckwheat...
Testing two var. field peas...
Testing two var. spring rye...
Testing two var. of soy, soja, or Japanese beans.......
9 — Testing three var. husking

Testing three var. mangels... 11 -Testing two var. of sugar beets for feeding purposes.....-Testing three var. Swedish Testing two var. carrots..... Testing three var. fodder and

silage corn..... Testing three var. millet..... -Testing two var. sorghum....
-Testing grass peas and two var.
of vetches....
-Testing rape, kale and field

- Testing three var. clover.
- Testing two var. alfalfa.
- Testing four var. grasses.
- Testing three var. field beaus.

23 — Testing three var. field beans. 3
24 — Testing two var. sweet corn... 2
29 — Testing three grain mixtures
for grain production...... 3
30 — Testing three grain mixtures
for fodder production...... 3
Any person in Ontario may choose any
one of the experiments for 1915 and
apply for the same. The material will
be furnished in the order in which the
applications are received while the supapplications are received, while the sup-ply lasts. Each applicant should make a second choice, as the material for the experiment selected as first choice might experiment selected as first choice might be exhausted before his application is received. All material will be furnished free of charge to each applicant, and the produce will, of course, become the property of the person who conducts the experiment. Each person applying for an experiment should write his name and address very carefully, and should give the name of the county in which he lives. C. A. ZAVITZ,

Ontario Agricultural College, Guelph, March, 1915.

What Would You Do With the Kaiser?

Director.

The above question was asked the readers of Beck's Weekly. We reproduce some of the answers given, which devise all sorts of punishment for him:—

Put him in an iron cage with plenty of food (outside) and let him die of starvation.

tion.

Put him in exile on St. Helena, feed him on trench bread and black coffee.

Would not allow him to have any reading matter.

Make him and his sons, surrounded by

Belgian widows and orphans, work with their own hands for the rest of their lives at rebuilding Louvain.

Set him afloat on one of his own mines,
bound and handcuffed, with a time fuse

set to explode in two hours. Put him on St. Helena and torture him s of the women and children

Put him in a cage, on the public square of every city in the Empire, that people might tell him what they thought of him. Let him live on, for "Vengeance is mine," saith the Lord. "I will repay." Condemn him to earn his living by operating a street wagon playing only two tunes, "Marseillaise" and "Rule Britannia," selling Union Jacks as a side

Place him in a cage with the Sultan of Turkey and exhibit him in a circus for the benefit of the Belgian sufferers.

I would do with Kaiser Bill everything that all your other readers have suggest

"It you'll Go, I'll Go.".

Say that to some friend when you leave him Saturday night. Of course you will mean that you will go to church you will mean that you will go to church Sunday if he will go too. That is a fine way to start off. If you are undecided which church to attend, select the one your mother used to go to. You can't go far wrong. Any fellow's mother's religion ought to be good enough for him. So next Sunday give up the lazy hour in bed. Have your best clothes ready. Put 'em on and start out with your head up and your shoulders back. You're doing one of the best things you ever did in up and your shoulders back. You're doing one of the best things you ever did in your life and if you keep it up you will never be sorry. And you'll be surprised to see how good it feels to be in church. And above all things, if there is congregational singing sing. Don't merely hold the book and bluff at singing. Fill up your lungs and let out the music. You'll know the lifeth when foresten it, all right. You may have forgotten the words but the tune, never. Why, your mother used to sing it! She will be a happy woman when she knows her

Trade in Watford and you will always

go home satisted.

Relief from Ashma. Who can describe the complete relief from suffering which follows the use of Dr. J. D. Kellogg's Ashma Remedy? Who can express the feeling of joy that comes when its soft and gentle influence relieves the tightened, choking air tubes! It has made asthmatic affliction a thing of the past for thousands. It never fails. Good-druggists everywhere have sold it for years.

These Questions P Why is the sea never still? Where does the wind begin? What makes an echo? Why does a ball bounce? Why can't we see in the dark? What are eyebrows for? Why are tears salt? Why does the kettle sing? What makes a fog?
Where do thoughts come from?
Why does a stick float?
Why does a stick float?
Why do we go to sleep?
What makes a bee hum? Does a plant eat?
Is a stone alive?
What makes a watch go?
Could the sky fall down? Why cannot animals talk? What makes a whirlpool? What is radium? What is mist made of? Why is the sky blue i Why do stars twinkle? What makes water boil? Why is now white?

Why is sugar sweet? What makes a cat purr? Why has water no taste What is smoke! What is smoke!
Why is yawning catching?
Why does salt melt snow?
What is air made of?
Why does hair turn gray? What keeps the stars in place? Why is foam white?

What makes us sneeze? Have fishes any feeling? Why don't we fall off the earth? How do flies walk on the ceiling Why does milk turn sour? What makes us hungry? Why do we dream? What is the only liquid metal? What plant catches flies to eat? How does water make rocks? How did men first tell time?

Why is the tiger striped? Feeding the Fighters

Our soldiers fighting at the front must our somers igning at the front must be fed. "An army fights on its stomach." Their families waiting and watching at home must be fed. The reserves in camp must be fed. The sailors on the high seas must be fed. The industrial workers of Great Britain must be fed. The Belgian refugees must be fed. Who will provide the food, who will produce it? The appeal comes to Canada. Shall we do our share? Our best will not be too

Here is the British soldier's daily

11 lb. of fresh meat, or lb. of canned meat. 11 lb. of bread.

3 oz. of cheese.
4 oz. of jam.
3 oz. of sugar.
½ lb. fresh vegetables, or 2 oz. of evaporated vegetables. 5-8 oz. of tea, coffee or cocoa. 2 oz. of tobacco, or

50 cigarettes per week. Tommy Akin gets his ration, if the ration can get to him.

Saskatchewan will Close all Bars During War

Regina, Sask., March 18.-Saskatche wan will be the first province in Canada to completely abolish the bar. On July I next, not only will the retail sale of all intoxicating liquors come to an end, but the wholesale trade will be taken over by the Government and operated as a Government monopoly, under a system of dispensaries. Later even these dispensaries may be abolished, if by a referensaries may be abolished, if by a referendum vote the people of the province so

This, in brief, is the effect of an announcement made by Premier Scott in addressing a meeting at Oxbow this after

Definiteness Aimed At

It is claimed in some quarters that the Patriotism and Production campaign is being conducted on too in-definite lines. The bulletins obtainable free on application to the Publications Branch, Department of Agriculture, Ottawa, treating each of one subject, and written by acknowledged expert authorities, are especially definite. Readers in occasion al cases may think they know as much as is there set down, or even that they know better, but to the vast majority there cannot fail to be something helpful. At any rate send for the bulletins and see.

Bacon and Hams

In 1913, Great Britain imported 5,440,387 hundredweight of bacon Canada supplied 272,745 hundredweight. Russia, Sweden, Denmark and the Netherlands furnished 3,129,570, and the United States 2,019,776 hundredweight.

In 1913, Britain imported 957,595 hundredweight of hams, of which Canada supplied 100,892 hundred weight and the United States 851. 835. In 1910 Canada only supplied 42,136 hundredweight.

There is some improvement in hams, but a sad falling off in bacon. Britain took 689,704 hundredweight of the latter commodity from this country in 1911, but, as previously stated, only 272,745 hundredweight in 1913, a decrease of 416,950 hundredweight in two years.

Varieties of Corn to Grow

Seed Branch shows that about sixty so-called varieties of corn are, grown for ensilage in Ontario and Quebec, and many farmers do not know what variety they are planting. varieties are being used in districts where they will not mature one year in five to the glazing of the grain which is the necessary condition to make sweet ensilage. Some ordinary feed corn imported from the Central and Southern States is used for seed. Most of this is of a late variety entirely unsuited to Canadian conditions and is often injured by

The following recommended varieties of corn are arranged in order of the wings of which stond out of their maturity: Quebec Yellow, Longfellow, Sandford or North Dakota, Compton's Early, Golden Glow, Early White Cap, Wisconsin No. 7. In selecting varieties for our Northern districts, later maturing, heavier-yielding varieties may be planted on a warm sandy soil than on a cold clayey one. The proper maturity is essential to high quality ensilage, and this should be aimed at even although an increased acreage is needed to give the desired quantity.

Pneumonia

The disease most to be dreaded at this time of year is pueumonia. In its various forms it stands first on the list of fatal diseases, and was responsible for more deaths in Toronto in 1914 than even tuberculosis. It is one of the impure air diseases. Close confinement in over-heated, badly-rentilated houses, work-rooms and factories; over-eating with insufficent exercise; and the use of alcoholic liquors, are among the more common pre-disposing causes of this fatal disease. It is most fatal among those advanced in years and those addicted to alcohol. It is well to bear in mind that pneumonia is due to a specific germ, and therefore, may be conveyed from one to another. From twenty-five to fifty per cent, of the people in every large city are carrying germs of this disease in the mucous membrane of their noses, mouths or throats during the winter season, but way we are not likely to be affected by them.—Health Bulletin.

The Lemon and Its Many Uses

A hot lemonade will cure or greatly
