-In spite of the enormous increase in the production of coal in Nova Scotia, the price of this commodity is higher than it has been production of coal in Nova Scotia, the price of this commodity is higher than it has been for years, and the consumer naturally complains of the injustice of such an apparently unwarranted increase in price. The history of the development of this industry is not so clid that it is not remembered by our people; it began with the lease of the Cape Breton areas to the Whitney Syndicate and has been so rapid that the whole aspect of our coal mining operations is changed. New markets have been found for the Nova Scotia product, and, though the production has been doubled, there is still a greater demand from consumers than the mines can supply under present conditions, and hence the corporation have seen fit to take to themselves monopolistic powers in increasing their profits. It is not because coal is scarce that the price has been advanced, but because the mine swares are anticipating the profits that should accrue were they able to meet the market demands. The Whitney Syndicate, or correctly speaking, the Dominion Coal Ce'y, have practically a monopoly of the call mining business of the province, and are able to increase their profits at will without fear of serious competition from the small-ited to the call at the exhibition, and Ferron, the horse of the province, and are able to increase their profits at will without fear of serious competition from the small-ited who we small court to the small three houses and the profits at will without the afternoon.

—On Sunday next, (Sept. 30th.) the anunal Harrest Thanksgiving Service will be held as St. Mary's, Belletale.

—Mr. Mar Curry, who has been filing, the Pominion from the sundant strength of the Dominion Irigidate the Whitney Syndicate and has been advanced, but because the mine week for Sydney.

—The Yarmouth S. S. Co. have reduced their service from five to four trips per week, between Yarmouth and Boston. The statement "Boston" makes her last Thursday trip to morrow.

—It is reported that yet another industry is to be started in hustling Sydney. This time able to increase their profits at will without ble to increase their profits at will without feat of serious competition from the small
"Barlottetown, where he has entered Warren feat of serious concerns. Their ninety-nine year lease of the mining area they operate, carries power that may be exercised to the serious disadvantage of the people of this province; improper use of those powers will destract greatly from the benefits that we have begun to enjoy in the growth of a vaster inbegun to enjoy in the growth of a vaster in stry than would have been possible under the old system of working with a limited capital. Last year the Dominion Coal Comcany made a good dividend paying profit from their operations, and this year from a smoother working system and a largely increased production they would naturally tal, but natural increases are evidently insufficient, and the Standard Oil Company trick of enforcing an advance is being played. Such a game as this calls for government intervention, and our legislators should see to it that their legislation of a few years ago does not make the people the victims of a

serious tax on a necessity, and should not be tolerated unless there is good excuse for the levy. If the Dominion Coal Company and kindred corporations are to develop into mere money-making shylocks by reason of their great mineral holdings, the sooner our people get acquainted with the situation the better. There is a vast difference between the value of a developing agency earning a fair profit and one insisting upon an unnatural revenue. The one is of inestimable value to a community; and the other is largely an evil.

—E. Bent, Esq., has purchased for his son. Wednesday, Sept. 26th.

—E. Bent, of Lynn, Mass., the beautiful residential property owned and concepted by Mrs. George Murdock, on South street. Mr. Bent, with his family, will take possession of the same on the first of April next.

—The quarterly Session of the District Division will be held in Clarence Hall on Three Jerus and fifty thousand miners have quit work, in response to orders from the miner's unino hosses, and there is no hope for any immediate adjustment of the difficulties. The miners' grievance is an unnatisfactory wage scale, and this always constitutes the most hopeless of cases when laid before mining corporations for redress. The striking miners simply represent a new brigade entering the old conflict between capital and labor, and it must be admitted that thus far visitory has been almost invariably bivous accordance for the content of the difficulties. The miners' grievance is an unsatisfactory wage scale, and this always constitutes the most hopeless of cases when laid before mining corporations for redress. The striking miners simply represent a new brigade entering the old conflict between capital and labor, and it must be admitted that thus far visitory has been almost invariably bivous accordance of the first and the province of the first and the province of the miner with a far visitory has been almost invariably bivous accordance of the factor of the first has a real defeat. If the present struggle is prolonged the old sto but at such a cost as to characterize it as a real defeat. If the present struggle is prolonged the old story of suffering, rioting and business stagnation must be rewritten. In removing such a large body of laborers from active work in a great industrial centre, they at once become charges upon the generosity of working men in other communities, embassions without records, and each as working men in other communities, embassions without records, and each as working men in other communities, embassions without records, and each as working the laboratory of working men in other communities, embassions and three seconds and a record close to the provincial free-for-all mark.

A special cable from London says: Appearance of the Deering harvester works of which there were two, excited such favor, able comment that one of them was installed in the department of civil engineering. Each separate building comprising this plant was represented in miniature and lighted by electricity. The finding official confirmation to a popular verdict long since reached by visitors to the expectation. of working men in other communities, embraced in the labor union, making the disaster more widespread. Then the shortened production will create a demand that will advance the price of coal far beyond the normal figure, and away down here in Nova Scotia, far from the centre of disturbance, we shall feel the effects of the strike, and we shall feel the effects of the strike, and grumblingly pay enhanced prices for our hard coal. There is another feature of the trouble shat tends to make the average man wonder just how far political influence extends, and just what evils it is permitted to accomplish is a highly civilized and enlightened constituency. It is stated on good independent authority that the present strike is due not in a state of the province and also for the cleaning of the reservoir and also for the stoppage of the leak in the pipe which crosses the river.

—It is rumored that the reservoir from which visited us on Saturday afternoon was an extremely violent one on the southern coast of the provinces, Lunenburg and vicinity receiving the most sever visitation. A correspondent of the Halifax Chronicle thus describes it: About three o'clock this afternoon Lunenburg was visited by an electric storm the severity of which appraised the strike is due not authority that the present strike is due not so much to the dissatisfaction of the miners themselves as to the action of the bosses of the discovery of silver and copper near there.

Says an exchange The people of Mish there is now the control of the bosse of the later unlow, who are in large with Tammany leaders to produce as agitation that will add the Democratic canary in the produce as agitation that will add the Democratic canary in the approaching presidential election. There is a proposing presidential election. There is the United State that they will submit to the United State that they will submit to the Isadership of such maters of political corruption. Of what use is a Republication of the Isadership of such maters of political corruption. Of what use is a Republication of the Isadership of such maters of political corruption.
