

REGISTRATION BOARD

DETERMINING THE MAN AND WOMAN POWER OF CANADA

Military Data Will be Secured—One of the Beneficial Results Will Be a More Efficient Organization of the Agriculture Forces of the Country.

The Canada Registration Board has been created under the presidency of Honorable Senator G. D. Robertson for the purpose of carrying out the registration of the man and woman power of Canada, in order that the information so obtained may be utilized to proceed intelligently with the mobilization of the entire resources of the nation towards the successful prosecution of the war. Data of military value will be secured, but the main purpose to be served by this census of all males and females in Canada over 16 years of age will undoubtedly be the better distribution of agricultural and industrial labor to the end of securing the maximum results from the productive labor of the Canadian people, especially as regards the essentials of war. One of the most beneficial results, which it is expected will follow the census will be a more efficient organization of the agricultural forces of the country becoming daily more imperative in view of the constantly diminishing food reserves of the Entente Allies and the imminence of a food shortage which threatens our own civilian population.

REGISTRATION DAY

"Registration Day," the date of which will be fixed later, probably a Saturday in June, will give every Canadian effected by the law an opportunity to perform the great national duty of citizenship.

Registrars have been appointed for every federal constituency; these in turn will appoint deputy registrars and assistant deputy registrars in sufficient number to register the entire population. Registration offices or booths will be opened in conveniently situated locations, in factories, school houses, halls, etc., in every municipality, and certificates of registration will be issued to every registrant.

VOLUNTEER ASSISTANCE ENCOURAGED

In order to facilitate this gigantic task, Councils, School Boards, Boards of Trade, Labor and Fraternal Organizations, Patriotic and Red Cross Societies, are invited to assist the registration officials in every possible manner, by providing free of charge suitable locations, school buildings, etc., and by furnishing volunteer helpers to do the clerical work. The registration offices will be kept open from 7 a. m. to 10 p. m.; hence the necessity of providing lighting facilities for the registration places.

REGISTRATION A NATIONAL DUTY

While non-registration entails many penalties of the most serious character, it is expected that the Canadian people will look upon registration as a great national duty, to be performed, not out of compulsion, but rather in a spirit of pure patriotism and as an act of encouragement to our gallant overseas defenders. The registration of the man and woman power of Canada will go forth to the world as the solemn expression of Canada's unalterable determination to support her own and the Allied armies until the final victory.

REGISTRATION WILL STRENGTHEN MORALE OF THE ARMY

The few minutes required for registration, or the one day's salary donated by the willing workers, will be a small sacrifice indeed compared to those now being made by Canadian manhood in the forefront of the battle line. Yet it will be of inestimable value in maintaining the splendid morale of our unsurpassed citizen soldiers to know that those for whom they are fighting on the fields of France and Flanders are not recreant to the solemn duty of the hour in their beloved Canada. That duty calls for the exercise of every generation and high resolve in all the avocations of a spirited people, whose very existence as a people and whose great heritage is involved in the issue of the struggle.

For the purpose of registration all

Nature's Healing Herbs for Headache

A BLOOD FOOD

PRACTICALLY all headaches come from two causes—Biliousness and Nervousness. Bilious headache means upset stomach, and constipation—with severe throbbing pains all over the head. Nervous headaches mean that the nerves are exhausted and need rest and food.

Dr. Wilson's HERBINE BITTERS

Insure quick and lasting relief from these headaches. The simple old-fashioned herbs tone up the stomach, regulate the kidneys and bowels, purify the blood, and build up the whole system. A reliable spring tonic. Get it today and get rid of your headaches.

At most stores, 25c. a bottle; Family of 5, 10c. a bottle; 12c. a bottle.

The Braxley Drug Company, Limited

NERVOUS PROSTRATION

May be Overcome by Lydia E. Pinkham's Vegetable Compound—This Letter Proves It.

West Philadelphia, Pa.—"During the thirty years I have been married, I have been in bad health and had several attacks of nervous prostration until it seemed as if the organs in my whole body were worn out. I was finally persuaded to try Lydia E. Pinkham's Vegetable Compound and it made a well woman of me. I can now do all my household and advise all ailing women to try Lydia E. Pinkham's Vegetable Compound and I will guarantee they will derive great benefit from it."—Mrs. FRANK FITZGERALD, 25 N. 41st Street, West Philadelphia, Pa.

There are thousands of women everywhere in Mrs. Fitzgerald's condition, suffering from nervousness, backache, headaches, and other symptoms of a functional derangement. It was a grateful spirit for health restored which led her to write this letter so that other women may benefit from her experience and find health as she has done.

For suggestions in regard to your condition write Lydia E. Pinkham Medicine Co., Lynn, Mass. The result of their 40 years experience is at your service.

EDUCATION NECESSARY

It is particularly desirable that clergymen of all denominations, members of Parliament, School teachers, professional agriculturalists and members of other professions, Journalists, Captains of Industry, Members of Council, in short all those who by reason of their social position wield great influence, should make known the requirements and the purposes of registration, in order that a false conception of its import may gain ground, or jeopardise its success.

THE CALL AND THE RESPONSE

The people of Nova Scotia responded nobly to the urgent demands of the war; large numbers of their best young manhood have left and are still leaving for the front; they many be found in all the different army services; many have made the supreme sacrifice, others have been wounded or invalided by sickness; all have gained imperishable renown on the blood-soaked fields of Ypres, St. Julien, Lens, Festubert, Arras, Vimy, Passchendaele and elsewhere. The record of their achievements is the immortal heritage of this Province for all time.

Out of their abundance our people have contributed freely to the different War Relief Funds and Organizations. Shall we be less generous now in making a much smaller contribution to ourselves on record as a united people, mobilized for the purpose of helping these boys of our own flesh and blood, who are battling overseas for all we now so bountifully enjoy? The great cause of a united people, mobilized for the purpose of helping these boys of our own flesh and blood, who are battling overseas for all we now so bountifully enjoy? The great cause of a united people, mobilized for the purpose of helping these boys of our own flesh and blood, who are battling overseas for all we now so bountifully enjoy?

GEORGE E. CORBITT
Superintendent of Registration.

Sailor Son Killed As Father Goes to War

BOSTON, May 20—A navy department message, arriving ten days after her husband had gone to join their boys in the war, notified Mrs. Julia C. Woodworth, 34 Pleasant street, Hyde Park, that one of the boys is dead. This was Horace C. Woodworth, chief radio officer of the U. S. S. munitions ship Florence H., blown up in a French port about two weeks ago. This boy was reported in the list of explosion casualties as slightly burned. The message of last night said that he died Friday and that he had been buried with military honors in a military cemetery. The message did not state where he died or designate his burial place.

The youth, only 18 years old, was a star athlete at Hyde Park High school. He came back to the school in his navy uniform to receive his diploma last June. He had enlisted in April. He was captain and pitcher of the baseball team, quarterback on the football team, and was a member of the track team.

Douglas P. Woodworth, brother of the dead radio man, is serving with the Canadian Black Watch regiment. The father, Todd C. Woodworth, a mining engineer, enlisted in the Canadian forces at the Boston recruiting office 10 days ago and went forward to join his regiment immediately. He is a son of the late Douglas Woodworth, of Kentville, N. S. There is a daughter home with the mother.

Minard's Liniment lumberman's friend

WILL IT PAY TO SPRAY IN 1918?

[By G. E. Saunders, Dominion Entomological Laboratory, Annapolis Royal, N. S.]

The above question is agitating the minds of many apple growers at the present time.

The prospects are that some of the sections that Nova Scotia supplied with apples in 1917, will themselves, have a moderate crop for their own use in 1918. It is more than probable that the major portion of this crop will be of poor quality if the season is in any way normal for the development of apple scab.

The paramount question in many minds is the question of price in 1918. Although we do not consider that the question of price for 1918 should be the dominant factor in influencing us to or not to spray in 1918, let us examine the point for what it is worth. What do we know about the 1918 price? In 1916, people expected normal prices for potatoes when they dug the crop, before the next spring many potatoes were sold for around \$3 per barrel. In 1917, people expected high prices for potatoes and many growers sold in the field for \$4 per barrel. Today, any quantity of potatoes can be bought for \$1.50 per barrel and less. In July, 1917, many farmers cut their hay, not expecting to be able to dispose of it in 1917-18 for the cost of gathering.

In November, 1917, many lots of hay sold for \$7 per ton loose. Within the past week hay has sold from the barn in the same districts for \$15 per ton. In 1914, the general talk was "Apples will bring nothing," yet we got fair prices. In 1915, the talk was even worse and we got better prices. In 1916, the talk was that apples would scarcely be worth picking and we got better prices than ever. In 1917 many expected low prices for apples during the spring and summer, but when the crop outside became known and outside buyers came to the country, expectations were changed, every one looked for high prices. With strange buyers bidding against each other in new territory for fruit, with which they were not familiar, prices were forced too high and apples were not consumed as they should have been early in the season. As Messrs. Carey and Vroom express it the price nailed the barrel too tightly to the warehouse floor. It prevented apples from moving and apples were consumed by the classes only and not by the masses. The result was, apples moving too late or out of season the year through, a glut in the prices, which is causing untold loss to both growers and speculators.

What does any one know as to the price of apples in 1918? We know the quantity of apples consumed by the most widely, and is influenced almost wholly by price so we can rest assured that if the price is low, say one-half that of October, 1917, apples will be used as a food and not a luxury, that they will be consumed by the masses as well as the classes, and the consumption will be enormous.

We expect that the quality of apples produced in many sections will be better than normal. In order to keep well and sell best, we must have our quality as high as possible. It has been amply demonstrated in the past that spraying and the growing of clean fruit pays even better in years of large crops than in those of small crops, for good quality apples have some chance of good prices in years of plenty, while poor quality apples have practically no chance in such years. Aside from the possibility, which every man must judge for himself, of our marketing, part or all of our 1918 crop in our normal market, London; the most important consideration is the effect of spraying or not spraying on the crop of 1919.

We know the demand and need for other foods than apples and will make the greatest efforts to produce potatoes, beans, grain, etc. We know that there is a labor shortage, but the spray gun amounts to more than saving a man in spraying. We know that our apples, if not sprayed, will be retained late the leaves to stay on late, we must keep them free from fungus diseases by spraying. This is absolutely the most important consideration in spraying in Nova Scotia, and by neglecting spraying in 1918 we are, if the season is at all normal, insuring a smaller crop or a failure for 1919.

We know the demand and need for other foods than apples and will make the greatest efforts to produce potatoes, beans, grain, etc. We know that there is a labor shortage, but the spray gun amounts to more than saving a man in spraying. We know that our apples, if not sprayed, will be retained late the leaves to stay on late, we must keep them free from fungus diseases by spraying. This is absolutely the most important consideration in spraying in Nova Scotia, and by neglecting spraying in 1918 we are, if the season is at all normal, insuring a smaller crop or a failure for 1919.

We must grow all of the grains and vegetables possible, but for our economic future, we must also keep our big prominent asset, our apple orchards from depreciating. We do not want the same kind of a crop in 1919 that Ontario had in 1917. Apple scab and neglect of spraying in 1916, spoiled the Ontario apple crop in 1917.

GIRLS! LEMON JUICE

IS SKIN WHITENER

How to Make a Creamy Beauty Lotion for a Few Cents

The juice of two fresh lemons strained into a bottle containing three ounces of orchard white makes a whole quarter pint of the most remarkable lemon skin beautifier at about the cost one must pay for a small jar of the ordinary cold creams. Care should be taken to strain the lemon pulp gets in, then this lotion will keep fresh for months. Every woman knows that lemon juice is used to bleach, soothe and massage it to the ideal skin softener, whitener, and beautifier.

Just try it! Get three ounces of orchard white at any drug store and two lemons from the grocer and make up a quarter pint of this sweetly fragrant lemon lotion and massage it daily into the face, neck, arms and hands.

Sch. Jennie T., Capt. George Lent, of Freeport, has made her first spring trip to St. John, Port Maitland, and Yarmouth. From the latter port she brought back a load of salt, consigned to C. A. Haines & Son, West End.

The Paint That Costs The Least

is the Paint that covers the greatest surface—that takes the shortest time to apply—that wears the longest. Martin-Senour "100% Pure" Paint does all three. Here's the proof. "100% Pure" Paint covers 900 square feet of surface per gallon.

Hand-mixed-lead-and-oil, and cheap prepared paints, cover only about 500 square feet.

The greatest cost of painting is for labor. It takes less time to apply Martin-Senour "100% Pure" Paint because its fine, even texture spreads much easier.

MARTIN-SENOUR "100% PURE" PAINT

(Made in Canada)

is guaranteed to be exactly as represented. The purity of the White Lead and Zinc Oxide—the high quality of the Linseed Oil—the minute fineness of the grinding by powerful machinery—insure a paint that gives years of protection and beauty to your home.

Why use cheap paint—that is expensive to put on—when Martin-Senour "100% Pure" Paint wears nearly twice as long?

If you are painting this year, you'll be interested in our books—"Town and Country Homes" and "Harmony in Neu-Tone". Call or write for copies—free.
