NOVA SCOTIA BRANCH, Truro, N.S.

ST. JOHN, N.B.

When writing mention FARMING.

FARMERS

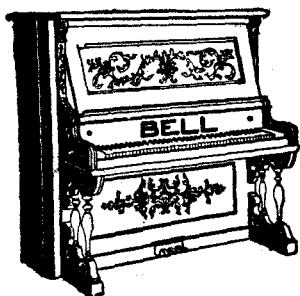

We again call attention to our method of Silo fill-
ing. To us it seems like unnecessary talk to say
that our machine has proved a success, and it just
appears equally as foolish to hear of any intelligent
farmer talking of purchasing a common chain slat
carrier machine. If such a man can be found in
any neighborhood where our Blower Propellor
Machine, of our make, has been at work, if some
person will send us the names of such persons,
and if they will build their silo twice the height it
now stands, say 50 feet, if we cannot elevate at
the rate of 8 to 12 tons per hour, we will give the
machine away, and at a speed of less than 600
revolutions per minute. Our machines are built
on correct principles for economy of power and
fast work.

This machine is patented in Canada and the
United States, and all infringements will be prosecuted.
This applies to those who use, sell or manufacture.

THOM'S IMPLEMENT WORKS WATFORD

Correspondence solicited. PATENTEES AND MANUFACTURERS.

We manufacture the "Ideal" Two-furrow Plow for two or three horses. Will do the work
of two plows, with a saving of one man and a horse.
