

BOYD'S POTASH SALTS !!!

AND NITRATE OF SODA.

"Nitrogen, phosphoric acid and potash, are taken from the soil in large quantities by the plant, and after continuous cropping even the best soil is very liable to fail in these substances, if not supplied by means of stable or commercial manures."

"Fruit trees need as much care and as good manuring as any cultivated crop. Fruit trees especially give excellent returns for the manure given. When the trees are set out they should be well manured in order that they may get a good start. By well manuring and carefully caring for the orchard, we not only get fruit early, but in abundance. In the case of dwarf fruit trees whose roots do not penetrate very deep, a liberal dressing is absolutely necessary to obtain a good quality of fruit. As it is often quite difficult to obtain stable manure, sewage, or the like, we can get along just as well, and in some cases perhaps better, by the rational application of artificial fertilizers, and in the case of orchards, we need not trouble ourselves so much about the mechanical condition of the soil."

ALFRED BOYD Chemical & Fertilizer Merchant
1 Wellington St. East, Toronto.

\$3 a Day Sure.

Send me your address and I will show you how to make \$3 a day, absolutely sure; I furnish the work and teach you free; you work in the locality where you live. Send me your address and I will explain the business fully; remember, I guarantee a clear profit of \$3 for every day's work; absolutely sure; don't fail to write to-day.

A. W. KNOWLES, WINDSOR, ONT.

To All Growers of Fruit.

THE Committee on New Fruits is very desirous to receive samples of seedling fruits thought to be worthy of dissemination; also of all fruits recently introduced. Gentlemen having any such are earnestly requested to assist the committee by sending, when ripe, six average specimens of all tree fruits with unbroken stems; of grapes, three bunches, with three leaves of the vine; and of small fruits, one pint of each sort. Send by express or mail, free of charge, to

JOHN CRAIG,

Central Experimental Farm,

Ottawa
