

NEW TRAP WORK ON THE MARKET.

One of the latest announcements in piano supplies is regarding the new trap work put on the market by Hammacher, Schlemmer & Co., of New York. Regarding this trap work they say, by way of explanation:—"As the illustration shows, there are three springs, bent at right angles (and with only two screws required for each) which fit into the three levers as shown. The levers are drilled for the round wood plugs which are slotted to receive the springs. The springs are secured fast and the levers can then be taken on and off by simply raising them up off the springs and the slot in the ends permits release from the props. The center pedal is connected by means of a small wood dowel, as shown in illustration."

New trap work put on the market by Hammacher, Schlemmer & Co.

The price quoted includes three patent springs, three special split dowels, three No. 2070 N.P. pedals, three Simplex pedal brackets, three levers not bored nor slotted, three pedal props.
