

DOCUMENTATION OF IMPACTED AQUATIC ENVIRONMENTS	3-6
Precipitation Patterns and Hydrologic Cycle in Relation to Transboundary Pollutants	3-6
ALTERATION OF PRECIPITATION QUALITY	3-8
Surface Water Quality	3-11
Nova Scotia and Newfoundland	3-11
Rates of Acidification in Salmon Rivers in Nova Scotia	3-14
Time Trend of pH in New Jersey Streams	3-14
pH and Alkalinity Changes in North Carolina	3-14
Episodic pH Depression in West Virginia	3-18
Lake pH in Waters of the Adirondack State Park, New York	3-18
Alkalinity Time Trend at the Hinckley Reservoir, New York	3-21
pH Trends of Lakes in Maine	3-21
Seasonal pH Deparession in Northern Minnesota	3-21
Element Fluxes and Geochemical Alterations of Watersheds	3-23
The Hydrogen Ion	3-23
Nitrate and Ammonium Ions	3-24
Sulphate	3-27
Cation and Anion Budget	3-29
Hubbard Brook, New Hampshire	3-29
Lake pH and Element Budgets in the Muskoka/Haliburton Area	3-31
Relationship of Forest Manipulation or Other Land Use Practices to Watershed Outputs	3-35
Regional Responses in Lake Chemistry	3-35
Mobilization of Metallic Components of Soil and Sediment	3-38
Acid-Induced Mobilization from Solid Wastes, Metals and Mine Tailings	3-42
Alteration of Impacted Biotic Components	3-43
Phytoplankton	3-43
Aquatic Macrophytes	3-44
Effects on Zooplankton	3-46
Effects on Macroinvertebrates	3-47
Effects on Microorganisms	3-48
Effects on Amphibians	3-49
Impacts on Fish	3-51
