McGILL UNIVERSITY

MONTREAL.

OBSERVATORY.

May 28th. 1921

Sir Arthur W. Currie,
Principal of McGill University,

Dear Sir:

After the consideration you have shown me following my impatient attitude over Observatory matters, I shall be very content to leave you to do as you judge wise in the matter of the resignation I left in your hands. I beg however to withdraw any portion of it that implied a lack of appreciation. Permit me to thank you for the confidence in our work shown by approving our estimates where we had perhaps no right to expect.

It is well that the exact nature and limitations of the McGill Observatory be again examined when more pressing claims have been met. In the meantime the humble work being done, I am sure, has been rendered "more agreeable to the Superintendent of the McGill Observatory as it is, no matter who he may be,

Yours respectfully,
James Weir
