EW. RATHBUN Esq.
VICE. PRES.

THE BOILER INSPECTION & INSURANCE CO.

OF CANADA

CONSULTING ENGINEERS

G. C. ROBB, Chief Engineer

H. N. ROBERTS, Sec.-Treas.

HEAD OFFICE TORONTO

Heat and Power cannot be obtained except by the expenditure of some form of fuel. All the fuels of earth are things upon which the sun shone at some time or other.

Some fuels have taken ages to reach the form in which we now have them, and it should be considered a crime to waste them.

Are You Wasting any Fuel that might be saved or put to better use?

Arrange to have your Boilers regularly inspected and make sure that the heat produced in the furnaces is being usefully employed.

Did you ever have the furnace ashes examined? Have some put through a sieve and see what will be found.

Inspection by a Skilled
Man is worth more
than any amount
of Insurance.

**THE BOILER INSPECTION
and INSURANCE CO.** gives
both Inspection and Insurance.
