

Northern has visited 2 schools regularly during the winter and spring, each teacher receiving a package of leaflets at each visit, and a copy of the Union Signal supplied to each school. Wellesley School was added to this District in the spring, and 2 visits were made also literature left with the principal for distribution. In all, 4,000 papers of literature have been distributed by this Union.

Parkdale, a teachers' social was given and literature distributed among the schools of this District.

Bathurst also gives a teachers' social once a year, and distributes literature to the schools in that District, though no Superintendent has been appointed.

Creighton, Youmans and Deer Park report literature distribution, but no socials given.

H. A. STEVENS,
Superintendent.

UNFERMENTED WINE.

In submitting my report I feel there is little to do as it is much about the same year after year. I visited most of the Unions and found 2 had no Superintendents, but they at once appointed them and they visited the churches.

The different Unions report :

Central, most of the churches in the District use unfermented wine with the exception of the Episcopal and some of the Presbyterians. They still cling to the old idea that the only wine fit to represent our Saviour's blood is the fermented.

Gordon, all use unfermented with the exception of one Presbyterian and the Episcopal. All the churches in this District have been visited.

Bathurst, all the churches have been visited, Methodist, Baptist and Presbyterians use unfermented wine, Episcopal fermented.

Willard, all the churches use unfermented wine with exception of Episcopal.

Creighton, all the churches use unfermented except the Episcopal.

Youmans, the five churches in District use unfermented wine.

H. WALKER,
Superintendent.
