A Danger Warning —Bleeding Gums

Are your gums tender? Do they bleed when brushed? If so—watch out for Pyorrhea.

This disease of the gums, which afflicts four out of five people over forty, not only destroys the teeth, but often wrecks the health.

In Pyorrhea, the gums become spongy, then recede; the teeth decay, loosen and fall out—or must be extracted to rid the system of the infecting Pyorrhea germs which breed in pockets about them. These germs lower the body's vitality and cause many diseases.

You can keep Pyorrhea away. Visit your dentist often for tooth and gum inspection, and use Forhan's For the Gums.

Forhan's For the Gums prevents Pyorrhea—or checks its progress, if used in time and used consistently. Ordinary dentifrices cannot do this. Forhan's keeps the gums firm and healthy—the teeth white and clean.

Start using it today. If your gums have receded, use Forhan's according to directions, and consult a dentist immediately for special treatment.

air station, Hampton Roads, Va., where a non-rigid airship of the C class will be inflated. This experimentation is being conducted in connection with tests in regard to buoyancy, valve control, permeability of airship fabric and methods of handling helium in connection with all types of lighter-than-air craft.

This will be the first airship in the world to be so inflated, and it is expected that important data will be obtained which it is hoped will be of considerable value in future employment of the gas.

This will be in accordance with the provisions laid down by the aeronautical board of the army and navy for the experimentation and development of lighter-than-air craft.
