CLOSING COTTON LETTER. By direct private wires to J. C. Mackintosh & Co., St. John, N. B. New York, Sept. 8.—The early routine news was rather bullish of tenor this morning. Liverpool opened 2 points better than a parity with spot of 15,000 bales. Middling cotton for foreign market sold 2 points over 14 cents, the record high price for the current crop. On this showing our market opened about 6 points up. Orleans had account rose 6 points prior to the government census report. The census bureau estimates the amount of cotton ginned to Sept. 1 at 37,000 bales, or about 1,000 more than popular expectations. This compares with 402,000 bales last year, when the yield reached 13,900,000 and 300,000 in 1907. It can, of course, be urged that the present price of cotton accounts largely for these large figures and this material, perhaps, is correct. However, there is nothing in this exhibit that can be considered otherwise than bearish nor can the bulls derive much comfort from the fact that the crop was 1,000 bales, or about 1,000 more than popular expectations. In view of these figures we are not inclined to believe that the spinning interests will buy cotton at these prices, except upon a basis of month sales, and without an unusual demand from this source it will be extremely difficult to force higher prices.

JUDSON & CO. CLOSING STOCK LETTER. By direct private wires to J. C. Mackintosh & Co. New York, Sept. 8.—The stock market again reflected the genuineness lately evinced by disquieting rumors of the state of Mr. Harriman's health. Up to noon there were neither authoritative affirmations nor denials of reports current on the exchange during the morning when the market was up 1 to 3 points. In the early trading Union Pacific, Southern Pacific and Silver Leaf were naturally the chief sufferers, but others also showed today despite heavy supporting orders which were distributed on a scale down. This was particularly true of Steel common. Around noon the market recovered from the low levels of the day. The government crop report as a whole was regarded as favorable, showing but average deterioration in the condition of the leading cereals during the past week. The routing news, particularly that bearing on the iron and steel trade, was favorable.

PRICES SHOW GAINS. Chicago, Ill., Sept. 8.—The Government crop report had a bullish effect on the wheat market here today and prices at the close showed net gains of 1/2 to 3/4 c. Corn prices also advanced sharply on the bullish showing of the official crop statistics, final quotations being up 1/2 to 1 1/4 c. Oats closed firm, but prices irregular.

MARKET WAITS THE MONTREAL PULSE BEATS

NEW YORK, N. Y., Sept. 6.—The speculative temper still showed itself in a state of high strung sensitiveness to news from the bedside of E. H. Harriman and the various price fluctuations of stocks during the day were the faithful reflection of nothing but the advice which filtered through from the house on the top of the Ramapo Mountains in the region of the financial markets. The news was exceedingly meagre and some of its contradictions of a price movement, therefore, was confused and subject to shifts in the current with subsidence between times to a condition of practical stagnation in the matter of the discussion of the market. The limited volume of the transactions suggested that large operators are, as a rule, keeping out of the market with the purpose of letting it find itself. The day's dealings were clearly made up in large part of professional transactions of secondary importance. That the situation of the sick financier was regarded as grave was obvious from the close attention paid to all news on the subject and to the growing disposition amongst financial associates to recognize the fact with more candor in their discussion for publication. It was considered that this policy was calculated to lessen the danger of a shock from the cable news. It was pointed out also that the absence of the guiding hand of the Harriman properties from the market fostered the growing inclination to question whether speculative markets were not lending undue importance to the immediate news features of the market. The situation was given to any other matter however. The character of the crop news for some time past, has paved the way for the possibility of a government crop report published today. The fact that both corn and wheat advanced after the publication of the report was taken as evidence that the previous rise in prices had not adequately discounted the falling off in condition of corn and spring wheat. The growing money requirements of the interior are reflected in demands upon the New York and in the falling off in the offerings of bank notes for current redemption. The sub-treasury in New York is again drawing large amounts from the banks. These factors may have influenced the heavy underperformance of stocks but they did not prevent the early advance when Mr. Harriman's estate was reported improving, nor a sharp recovery when his physician again announced that he was better. Bonds were easy. Total sales, par value, \$2,878,000. U. S. bonds were unchanged on call.

CANADIAN CONSOLIDATED CEMENT COMPANY. By direct private wires to J. C. Mackintosh & Co. At the close of a protracted meeting of the leading interests behind the new Canadian Cement merger yesterday the official announcement was made of the complete financial arrangements of the company and the terms on which it is proposed to make a public offering of the securities of the company. Of the total amount of \$5,000,000 of the six per cent gold bonds it is intended that \$5,000,000 should be issued at the present time. Of the total capital of \$30,000,000 of the 7 per cent cumulative preference shares out of an authorized total of \$11,000,000 and \$12,500,000 of the common shares out of an authorized total of \$19,000,000. This will make a total of \$22,500,000 of preferred and common shares. In the future it is the intention to make a public offering of \$5,000,000 of the 7 per cent cumulative preference shares and a bonus of one share of common will be given for every four shares of preferred stock subscribed for. A decision was reached to have the dividends on the preferred stock made payable and in due course application will be made to have all the securities of the company listed on the Montreal and Toronto Stock Exchanges. Owing to the wide spread interest in the public offering of the securities of the new company it is announced that subscription lists will be opened in all the important centres across the continent, including Halifax, St. John, Quebec, Montreal, and Vancouver. Some of the members of the Montreal Exchange seen after the terms of the issue were announced stated that they considered them liberal and they expressed the opinion that they would be favorably received by investors throughout the country.
