

## FROM ALL OVER THE MARITIME PROVINCES

### MONCTON

Moncton, N. B., April 4.—Adrien Doucet, who arrived in Moncton today to continue the search for his brother-in-law, Joseph Doucet, who is feared to have died in the vicinity of Moncton.

Adrien Doucet went out to Harrisville to interview Charles Vincent, who reported seeing the missing man a week ago last Saturday. Vincent identified a photograph of Joseph Doucet, but was unable to throw any light on his mysterious disappearance. Chief Rideout says there is little doubt the missing man is dead and his body will be found in the woods in the vicinity of Moncton. Adrien Doucet will continue the search tomorrow in Harrisville.

Hugh Sullivan, charged with stealing a watch from Fred Goggin, was convicted before Police Magistrate Kay today. He was given six months, but allowed to go on suspended sentence.

Moncton, N. B., April 5.—Joseph Doucet, of Rogersville, for whom friends, aided by the Moncton police, have been searching in this vicinity the past ten days under the impression he had carried out his intention, as expressed in a letter to his wife, to commit suicide, was located tonight at the home of Freeman Horsman, Mountain road, three miles from the city. Last Saturday night or Sunday morning, Doucet was found lying on the road by a horseman with his feet badly frozen. He was taken to Horsman's home and cared for until the police tonight learned of his whereabouts. He was brought to the hospital suffering with badly frozen feet. The night Doucet was found was extremely cold, and he would have probably died from exposure if he had not been found. Doucet is considered to be mentally unsound and will probably be taken, eventually, to the Provincial Lunatic Asylum.

At tonight's meeting of the city council the city clerk was instructed to write Hon. H. R. Emmerson, re Albert-Moncton railway bill, now before the senate, asking him to have the bill amended, if possible, by substituting the following clause: "Provided, however, that should any grant or grants of money or subsidies be given by the Dominion of Canada, province of New Brunswick, city, town or municipality in said province by any company or corporation carrying on business in the province to the company, as a contribution towards the construction of a bridge, the right of the company to charge tolls for the use of said bridge by persons, animals, carriages, street cars, etc., shall cease."

This step is taken by Moncton to guard against the company promoting the Albert-Moncton railway bill shutting off the Moncton Street Railway Company from crossing the Petitcodiac river bridge in the future.

A parlor concert was held this evening at the residence of Mr. and Mrs. D. Pottinger, for the benefit of the Wilfrid Fleming, the young man who lost both feet by being run over by a train at the Church street crossing, a short time ago. Mayor Reilly presided, and about 150 attended. In the vicinity of \$100 was realized. The benefit fund started for Fleming by the Rev. J. L. Batty was estimated to be nearly \$200.

### THE ENERGY FOOD

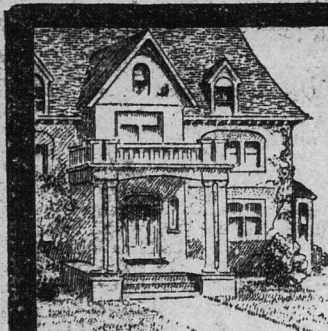

#### The Vim and Vitality One Gets From Oats

There is something in oats which creates spirit and energy. No other grain can bring results like them. Everyone knows what oats do for horses. They have the same effect on man.

An extract of oats is employed as a tonic. A diet of oats multiplies one's vitality. That's why energetic men—men of vim and spirit—are said to "feel their oats."

In Quaker Oats the finest oats—Canadian grown—are subjected to 62 siftings. Just the rich, plump grains are used. There is only ten pounds of Quaker Oats in a bushel.

These grains have the maximum of richness and energy. They are also the most delicious. To eat Quaker Oats once a day for a month will show the limit what tonic effects, what bubbling vitality one can get from oatmeal. One never knows how good oat food is, or what it can do, until he tries Quaker Oats. Made in Canada.

### Strongest and Most Stylish-Looking

MARITIME Ornamental Fencing and Gates have the quality. There is no gaudiness that. Only first quality tubing is used for the gate frames. We could, like many makers, use second quality and save one-third to one-half the tubing cost. We could also use small wires and save more. But we use large, strong, stiff No. 9 wire. This wire is more smoothly, thoroughly and heavily galvanized than the wire generally used for fence and gate purposes. You know what that means. Strongest, most lasting, as well as most stylish-looking. Write for free catalogue, showing the different designs, and from them choose a gate you'll be proud of.

The officers of the court and a press representative were the only persons present, for there was no business to be transacted on fact upon which his honor complimented the sheriff and through him the people of the county, which the court was adjourned sine die.

An important meeting of the residents and ratepayers of Hampton Station was held last evening at the court house, at which the Firemen's Protective Association presented their report for the past year, which showed an indebtedness on the apparatus of less than \$20, with sundry subscriptions yet unpaid. These items were decided to call in and to extend the call to the residents of Hampton Station, who are to be paid for the protection afforded by the organization, so that means may be available for keeping the apparatus in perfect order for any contingency which may arise. It was also decided to fit up the lower part of Barnes' hall as a fire station, where fire trucks and other property may be safely housed.

The annual meeting of the St. John River Log Driving Company was held in the Queen Hotel this morning with the president, J. Fraser Gregory, in the chair.
