after all the deceptive nostroms of the day had utterly failed; and to many thousands they have
permanently secured that aniform enjoyment of
health, without which life itself is but a partial

acarcely less than miraculous to those who were
acquainted with the beautifully philosophical priaciples upon which they are compounded, and upon
which they consequently act. It was to their

Unlike the host of pernicious quackeries which
boast of vegetable ingredients, the LIFE MEDICHESS are purely and solely vegetable; and cuntain neither Mercury, nor Antimony, nor Arsenic, nor any other mineral, in any form whatever.
They are entirely composed of extracts from rate
and powerful plants, the virtues of which, though
long known to several Indian tribes, and recently
to monic eminent pharmaceutical chemists, are altogether unknown to the ignorant pretenders to
medical science; and were never before administered in so happily efficacious a combination.

The first operation is to looses from the costs of
the stomach and bowels the various impurities and
cradities constantly settling round them; and to

Other medicines only partially cleanse these, and leave such collected meases behind to produce habitual Contiveness, with all in train of svile, or sudden Diarrhosa with its imminent dangers. This fact is well known to all regular anatomists who examine the numan bowles after death; and hence the prejudice of these well-informed men against the quack medicines of the age. The second effect of the VEGETABLE LIFE MEDIGINES is to cleanse the kidneys and the bladder; and, by this means, the liver and lungs, the healthful action of which entirely depends upon the regularity of the urinary organs. The blood, which takes its red color from the agency of the liver and lungs, before it passes into the heart, being thus purified by them, and nourished by food coming from a clean stomach, courses freely through the veins; renews every part of the system, and triumphantly mounts the hanner of health in the blooming cheek.

The following are among the distressing variety of human diseases in which the VEGETABLE LIFE MEDIGINES are well known to be misi-lible:

Dropsies of all kinds, by freeing and strengthening the kidneys and bladder: they operate most delightfully on these important organs, and hence have ever been found a certain remedy for the worst cases of GRAVEL.

PILES. As a remedy for this most distressing and obstinate malady, the VEGETABLE LIFE MEDICINES deserve a distinct and emphasize recommendation. It is well known to hundreds in this city, that the former proprietor of these valuable Medicines was himself afflicted with this complaint for upwards of sharty rive years; and that he tried in vain every remedy presented within the whole compass of the Materia Medica. He however at length tried the Medicine which is now offered to the public, and he was cured in a very short time, after his recovery had been proposable, by any burnan means.
