

THE "SUNSHINE,"

A FARM FURNACE.

Feed-doors large enough to admit rough blocks of wood.

Large ash-pan catches every pick.

Parts which come in contact with fire are made extra heavy.

Has self-acting gas damper.

Made in three sizes.

Burns coal, coke or wood.

A reliable, up-to-date furnace, at a reasonable price.

Estimates and full information free from our local agent or nearest house.

THE McCLARY MFG. CO'Y.

London, Toronto, Montreal, Winnipeg, Vancouver; St. John, N. B.

MAPLEWOOD HACKNEY STUD.

PROPERTY OF FREDERICK C. STEVENS, ATTICA, NEW YORK.

Champions of two continents.

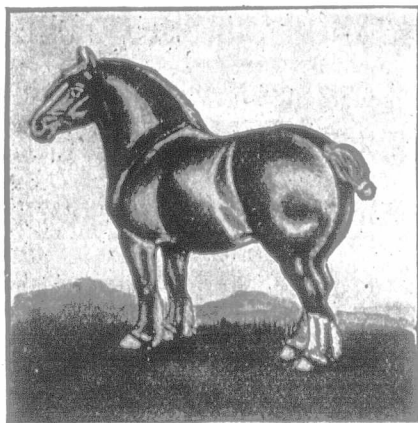

The magnificent **LANGTON PERFORMER**, the peerless **CLIFTON 2nd**, and the sensational **FANDANGO**, all in service for the coming season.

Magnificent young Stallions and Mares for Foundation Stock,

sired by the above champions, and out of mares equally famous, now offered for sale. MAPLEWOOD is truly "THE HOME OF THE CHAMPIONS."

FOR FURTHER PARTICULARS, ADDRESS:

E. T. Gay, Manager, Attica, N. Y.

LATELY IMPORTED A FRESH LOT OF

Glydesdale Stallions,

Comprising sons and grandsons of many of the most noted Scotch showyard winners and sires, all in the pink of condition without surplus flesh, and personally selected to meet the best Canadian markets, having, without exception, the best of bone, hair, feet, and action, coupled with true Clyde character. I will make further importations as the times demand. Inspection invited.

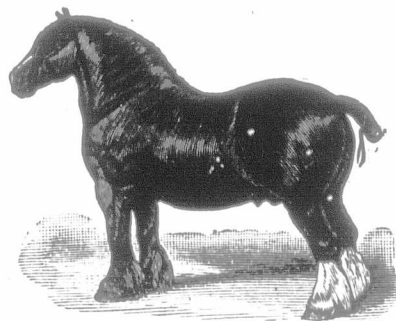

Prices consistent with quality.

ROBERT GRAHAM,

Ringwood P. O., Ont.

Stouffville Station, G. T. R., and telegraph office.

CLYDESDALE STALLIONS ALL SOLD.

Our importations are always

WELL-BRED BIG GOOD ONES.

The winner for two years at the Canadian Horse Show, Toronto, was imported by us. Early in July we will sail for Great Britain for a new lot, and will earnestly endeavor to make satisfactory selections of mares and stallions for persons who will inform us just what they want.

DALGETY BROS.,
London, Ontario.

Metal Roofing. So long as wooden shingles can be had some people will use them, because they were brought up that way. That, however, is not a justified reason for doing so when such a roofing can be secured at a reasonable price as that manufactured by the Pedlar People at Oshawa, Ont. It is not only cleaner, neater and more enduring than wooden shingles, but it is fireproof as well. Metal roofing reduces the cost of insurance, because it reduces the risk of fire. Write the Pedlar People for their catalogue, which will astonish you with the beauty of designs in their ceilings, wall decorations, etc.

Volume X. of the Canadian Ayrshire Herd-book has been issued from the office of the Association, Parliament Buildings, Toronto, by the secretary and registrar, Mr. H. Wade. The frontispiece is a portrait of Mr. A. Kains, of Byron, Ont., president of the Association for 1900, opposite which appears that of Mr. Wade. It contains a list of officers, prize-winners at the Toronto Industrial (1899), pedigree (bulls and cows arranged together) from 1898 to 1910, list of transfers and index to animals. It is a well-printed, 330-page volume, with engravings of several noteworthy animals.

NOTICES.

A Wonderful Implement.—We learn from Massey-Harris Co., that they are receiving a great number of orders for their No. 10 mower. This machine is similar in form of construction to their No. 7 mower, though enlarged and strengthened, and having larger and broader-faced driving wheels, and longer cutting apparatus, in keeping with the big, strong frame that carries it. The Massey-Harris No. 10 mower is specially designed for farmers who have large areas of hay to secure. It is very light in draft, and the application of the roller and ball bearings is mechanically correct. The No. 10 mower is made in three sizes, cutting swaths 6 ft., 6 ft. 6 in., and 7 ft. wide, respectively. The trouble with the majority of mowers made for cutting wide swaths is that the increased width of track is obtained by merely increasing the width of the axle. This is not the case with the Massey-Harris mower, but the whole frame is of special size and design, with a view to constructing a perfectly-balanced machine. The farmer who has a large area of hay to cut ought certainly to have a Massey-Harris No. 10 mower this season.—Adv.

"All About Canada."—From Alfred Hewett, publisher, Toronto, we have received a copy of "The Canadian Yearbook" for 1901, being the fourth year of publication. The work is steadily improving. It contains the customs tariff, list of post offices in Canada, members of the Dominion and Provincial Parliaments and Governments, militia lists, sporting records in very complete form, banks and branches, besides statistical and other data. Paper bound; 330 pages. Price, 25c.

GOSSIP.

Geo. Harding & Son, Waukesha, Wis., have recently purchased the entire Shorthorn herd of E. B. Mitchell & Son, Danvers, Ill., and will sell the best of them at Chicago on August 7th, together with selections from their own herd and a number of high-class imported and home-bred cattle, lately purchased in Canada from Messrs. Cargill & Son and others.

The Jersey heifer, Gul Bahar 147713, portrayed from photograph on page 434, this issue, calved May 21st, at seventeen months old. She is sired by Sir Wilfred St. Lambert 56193, and out of Primrose Park's Pride 30475, sold by Mr. W. J. Craig, London, to the Dominion Government for the Pan-American dairy test, where she is now standing at the head of the Jerseys in profitable production of butter, being only a few cents per week below the highest producer in any breed. The heifer is now giving over twenty pounds of milk and about one pound of butter per day. She is large for her age, handsome, and promises to excel her dam, who is a great cow, having a record of 543 pounds butter in 12 months.

Mr. W. N. Haskett, of Markdale, Ont., is offering for sale a few choice Jersey cows. The cow, Melba of Brampton, is out of the famous herd of B. H. Bull & Sons, and is a really nice specimen of that most popular dairy breed. She is a light fawn, 5 years old, with a large, perfectly-formed udder, and is a very heavy and persistent milker. She is sired by Massena Butte Boy 30609, a bull of more than ordinary merit as a producer. Her dam is Rose of Ingleswood, one of Mr. Bull's extra choice females. Mr. Haskett is also offering a very nice bull, 17 months old, out of this cow, sired by Prince of Markdale, who was bred by Wm. Ralph, of Markham. Besides these, there are for sale two bull calves and one heifer calf. Parties wanting any of the above lines will best consult their own interests by writing Mr. Haskett, Avon Mawr, which, by the way, is the name of Mr. Haskett's beautiful residence in Markdale, and is also the home of a choice selection of poultry. The present specialties are B. and W. Plymouth Rocks, G. and S. Wyandottes, Light Brahmas, and Black Minorcas, also Pekin ducks.

JAMES DOUGLASS' SHORTHORNS.

Perhaps never before was that invincible law of breeding, that like begets like, more aptly illustrated than in the case of the youngsters to be seen on Willow Bank Stock Farm, the beautiful and excellently-appointed home of James Douglass, near Caledonia, Ont. The stock bull, Christopher (imp.) 28859, is about as near perfection as it is possible to get, being very long, very deep, very smooth, exceptionally well filled in back of shoulders, with enormous breast and quarters, on very short legs, and as quiet as a kitten. He is sired by Emancipation 6547, dam Fairy Girl, Vol. 39, P. 265, by Gravesend 46161 and bred by J. Stephen, Lethenty, Inverurie, Scotland, and imported by H. Cargill & Son. He is Scotch topped, on Booth foundation. The young stock are simply living images of this great sire, sweet, smooth, straight-backed. No wonder Mr. Douglass reports an active demand. A young bull sold a few days ago to Mr. M. W. Moran, of Arnprior, Ont., is one that will surely win laurels in the prize-ring, as it is hard indeed to fault him. The many really excellent dams in this farm are nearly all of the famous Bates and Booth families. The herd numbers some 100 head, and it is well-nigh impossible to specify any particular one as the best. The cow, Milliner 16th, deserves special mention, as she is certainly a beautiful type of modern Shorthorn. She is sired by Isabella's Heir 19650, a grandson of Imp. Lady Isabel, a cow that swept the board for a number of years at all the leading shows. Her dam is Milliner 12th 25433, by Earl of Goodness 20th. Another dam from the same sire is British Lady, dam Victoria 8th 16080. Perhaps special mention should be made of the yearling heifer out of this cow, and sired by the stock bull, Christopher. She is a roan, of very even proportions and symmetrical make-up, and will make things interesting at the coming fall shows. This farm is also the home of some 70 odd very superior Leicester sheep, founded on Bow Park importations, and the highest standard of excellence has always been Mr. Douglass' aim in his selection of sires, and the result of 45 years' experience in breeding and improving his flock is, that here can be seen the beautiful Leicester in all its glory and perfection.

IT PAYS TO ADVERTISE IN
THE FARMER'S ADVOCATE.

A Good Complexion

Depends on Good Digestion.

This is almost an axiom, although usually we are apt to think that cosmetics, face powders, lotions, fancy soaps, etc., are the secrets for securing a clear complexion. But all these are simply superficial assistants.

It is impossible to have a good complexion unless the digestive organs perform their work properly. Unless the stomach, by properly digesting the food taken into it, furnishes an abundance of pure blood, a good complexion is impossible.

This is the reason so many ladies are using Stuart's Dyspepsia Tablets, because they promptly cure any stomach trouble, and they have found out that perfect digestion means a perfect complexion and one that does not require cosmetics and powders to enhance its beauty.

Many ladies diet themselves or deny themselves many articles of food solely in order to keep their complexion clear. When Stuart's Dyspepsia Tablets are used, no such dieting is necessary. Take these tablets and eat all the good wholesome food you want, and you need have no fear of indigestion, nor the sallow, dull complexion which nine women out of ten have, solely because they are suffering from some form of indigestion.

Bear in mind that beauty proceeds from good health, good health results from perfect digestion, and we have advanced the best argument to induce every man and woman to give this splendid remedy a trial.

Stuart's Dyspepsia Tablets can be found in drug stores, and cost but 50 cents per package.

If there is any derangement of the stomach or bowels, they will remove it, and the resultant effects are good digestion, good health, and a clear, bright complexion.—Adv.

Mrs. E. M. Jones, Brockville, Ont., long since established her reputation as a breeder of high-class Jerseys. Just now she has a few choice young bulls and one heifer of the desirable sort for sale. The breeding of these young things, as well as the price, are given in our advertising columns.

In Yorkshire hogs, Mr. F. G. Green, Greenwood, Ont., is showing a large stock. His stock boar is Oak Lodge Imperial 2nd 3588, sired by the imported boar, Ruddington Lad 3572, which was bred by P. L. Mills, Ruddington Hall, Eng. Oak Lodge Imperial's dam is Oak Lodge Minnie 2nd 2310. His conformation and breeding stamp him at once a sire of the first rank. Among Mr. Green's sows is one that immediately attracts the attention of the visitor. She is Oak Lodge Girl 2nd, sired by Oak Lodge Conqueror 2475; dam Oak Lodge Girl 2nd. This sow is a remarkably fine type of the breed. There are at present in the pens some 30 odd head, of both sexes and all ages. A number of young sows are in pig to Oak Lodge Imperial, and parties requiring a brood sow or stock boar will find these animals all that can be desired, both in conformation and breeding. In poultry, Mr. Green's specialties are Barred Plymouth Rocks, Light Brahmas, and Bronze turkeys. The pens of each contain some very choice fowls. Mr. Green can fill orders for pairs, trios or larger numbers. Correspondence is solicited.

In Holstein-Friesians, Mr. R. W. Walker, of Utica P. O., South Ontario Co., near Manchester, on the Whitby & Port Perry Railway, is showing a choice herd of some 25, beautifully marked, symmetrically built, with large, well-developed and even udders. Among the earlier dams was Diploma 3rd 461, sired by Bonnie Queen's Last Boy 239; dam Diploma Bonnie Queen, the dam of Bonnie Queen's Last Boy, was a prizetaker and sweepstake winner, having a record of 72 lbs. of milk in 24 hours, and 10,000 lbs. in six months, taking first prize and sweepstakes as best dairy cow over all breeds at district shows. Diploma is the dam of Sykja (imp.), whose record is 78 lbs. in 24 hours. Another extra nice dam is Madame B 651, sired by Sir Westwood; dam, Madame Dot. This cow is a very heavy and persistent milker, with a large, perfectly-formed udder. The present stock bull is Forest Prince Abbe-kirk 1838, Vol. 5; sired by Forest Prince; dam Ida Abbe-kirk 1813. He is a very lengthy, nicely-formed animal, of good substance, and has proven his worth as a sire. Among the young bulls are two extra good ones, Ridge Dale Butter Boy 1902, sired by Madame B's Butter Boy 1221; dam Ridge Dale Maid 1505, a granddaughter of Aaltje Posch 4th, the noted sweepstakes cow at the Provincial Dairy Show at London, with a record of 146 lbs. of milk in 48 hours. Colanthus Prince is another young bull of sterling merit, sired by Father Tensen 984; dam Lady Colanthus Abbe-kirk 1028. These young bulls are for sale, and from their excellent make-up and superior breeding should prove a profitable investment to any one wanting a sire of this great dairy breed.
