

GOSSIP.

Mr. A. I. Hickman, Court Leet, Kent, England, exporter of pedigree stock of all varieties, makes a change in his advertisement in which he intimates that during the winter months special attention will be given to the selection and export shipment of cattle of the best and dairy breeds, and heavy horses. Mr. Hickman reports a large number of shipments to several countries in the last six months.

The twenty-fifth annual meeting of American Aberdeen-Angus Breeders' Association, the silver jubilee meeting of the organization, will be held December 2nd, at the Exposition Hall on the International Show grounds, Union Stock-yards, Chicago, during the week of the International Exposition. Meeting commences at 7.30 p. m. Sixty head of high-class cattle will be sold at the auction sale during the show. Chas. Gray, Secretary, 17 Exchange Avenue, Chicago, will mail catalogue and information.

VISIT THE INTERNATIONAL.

The International Live-stock Exposition, held at Chicago from November 28 to December 10, is the supreme court of the year's prizewinners. It is justly styled the show of champions, the show within whose portals the bluest blood of the bovine, ovine and porcine families struggles for supremacy, the exposition whose educational value cannot be over-estimated. Here the foremost breeders, who, by constant study, mutual contact, observation and comparison, have succeeded in producing the best, are giving the world the benefit of their labors. Here the breeder and feeder are shown by actual block demonstration by what method their work can be made more profitable, and the kind of animals the butcher wishes them to supply. These, and the many other object lessons that can only be earned by a visit to this great exposition, make a visit to the International Show a paying investment and is a part of the training of every progressive farmer, feeder and breeder. The National Dairy Show and Horse Show are slated for the same dates at Chicago as above.

The fact of his having attended a previous show does not signify, for new problems are being solved here each year; each year sees the work and achievements of the previous shows surpassed, and at each successive exposition new standards of excellence are brought to the attention of the public. Enquire of your railway agents for reduced passenger rates.

THE SIBERIAN WHEAT FIELDS.

Much discussion has been given to the possibilities of Siberia as a wheat-producing country. It has been claimed that in time this great territory would reinforce Russia, and, as a result of the building of the trans-Siberian railway and the settlement of Siberia by emigrants from Russia who are naturally wheat-growers, a great, new, inexhaustible source of wheat supply would come into existence. A few years ago American farmers and millers were greatly concerned over this Siberian possibility, and many of them feared that, with the opening of the new territory, there would appear upon the scene a fresh competitor for the position of the world's food purveyor. Time passed, the great railway was built, but as yet neither the Siberian miller nor the Siberian wheat-grower has made his appearance in the markets. What this country can do in the way of wheat-production on a large scale is yet to be demonstrated. Possibly the day may come when it will be counted as important in the list of wheat-raising countries, but at present this seems too remote for serious consideration, and the future wheat-fields of the world seem to be extending in an altogether different direction. The Asiatic is becoming a wheaten-bread eater; by the time his taste for the bread of civilization is fully developed, the Siberian miller may find a market in China and Japan for his product, if he is able to compete with the American miller of the Pacific Coast, who is now exploiting this field successfully. As far as Europe is concerned, there seems no prospect, remote or immediate, that Siberian wheat and flour will find its way thither in any considerable quantities.—W. C. Edgar

Get the Top of the Market

If you could put a lot of heavy fowls in A-1 market condition and "finish" them just when scarcity makes high prices, you'd consider it good business, wouldn't you?

That kind of thing is done by hosts of farmers and poultrymen who have no better birds and no more fattening foods, than you or any one else. It isn't so much what a fowl eats as what a fowl digests that does the business. These men "skim the cream" because they give their fowls a regular daily portion of Dr. Hess Poultry Pan-a-ce-a once a day. That is the secret, and you can get just as good results as they if you follow their way.

Dr. HESS Poultry PAN-A-CE-A

makes a fowl thrive because it contains tonic properties which are a most positive aid to the digestive organs, and it cures gapes, cholera, roup, and the like. It causes the greatest possible assimilation of nutrition, hence, the greatest possible growth. Poultry Pan-a-ce-a is "The Dr. Hess Idea." He believed that good digestion was the foundation of all success in feeding. That it was possible to aid digestion and thus reduce food waste. Poultry Pan-a-ce-a does this very thing. Little chicks grow fast and escape most chicken ills if it is given to them; and when moulting time comes, Poultry Pan-a-ce-a strengthens all fowls to pass this trying time safely. Dr. Hess Poultry Pan-a-ce-a makes good blood and carries dead poisonous matter out of the system. It is endorsed by leading poultry associations and sold on a written guarantee. A penny's worth is enough for 20 hens one day.

1 1/2 lbs. 35c; 5 lbs. 85c; 12 lbs. \$1.75; 25 lb. pail \$3.50. Duty paid. Dr. HESS & CLARK, Ashland, Ohio, U. S. A. Send 2 cents for Dr. Hess 48-page Poultry Book, Free

DR HESS STOCK FOOD

Every time a steer, cow, horse or hog, gets a little of Dr. Hess Stock Food in its grain ration, the animal is made stronger to digest and use its food. This is "The Dr. Hess Idea" and the true theory of feeding—make the maximum amount of ration digest and assimilate and gain will be rapid and steady. Dr. Hess Stock Food is composed of beneficial elements—iron for the blood, bitter tonics and cleansing nitrates. It increases milk, hurries fattening and gives good health to all domestic animals. Promoting stock health and condition is also a profitable feature of feeding Dr. Hess Stock Food. Sold on a written guarantee.

100 lbs. \$7.00; 25 lb. pail \$2.00. Smaller quantities at a slight advance. Duty paid. Send 2 cents for Dr. Hess Stock Book, Free.

INSTANT LOUSE KILLER KILLS LICE

Shorthorns!

BELMAR PARC
