

CREAM SEPARATORS

Don't buy a cream separator without being sure you KNOW what you are doing.

Making a mistake in buying a cream separator means a great deal—it means waste of time and butter-fat twice a day, every day in the year, if you get the wrong machine,—until you "scrap" the machine itself.

More than 15,000 users who had made such a mistake replaced their "mistaken" machines with DE LAVAL separators during the year 1908.

They had probably wasted Five Million Dollars worth of investment, labor and butter meanwhile.

If you feel inclined to buy some other make of separator by all means do so, if you can find any apparently good reason for it.

BUT why not TRY a DE LAVAL machine beside the other machine for ONE WEEK before you actually contract to buy it? Simply SEE the comparative operation and comparative results and examine the comparative construction.

That's a proposition open to every intending separator buyer. Any DE LAVAL agent will carry it out. WHY not avail of it and KNOW what you are doing before making this very important investment?

Don't let any alluring "catalogue house" literature or clever talking agent wheedle you into buying any other separator without FIRST actually TRYING it alongside a DE LAVAL.

In other words, buy your separator intelligently and knowingly and not on blind faith in anybody's representations.

New Eclipse Plows

The Self-Locking device on New Eclipse Plows has a double advantage.

FIRST—When your land is very hard, you can lock the Plow down, so that it will stay absolutely to its work.

SECOND—When your land is ordinary, or stony, you convert your plow—in a moment—to a

floating beam, which automatically raises over obstructions and enters the ground again.

No other plow has this device. It is patented. Let us send you printed matter, describing fully

WHEN ANSWERING ADVERTISEMENTS MENTION THE ADVOCATE

Frictionless Empire

What is best for you, a cone-method separator or a disc? Ask our agent. He will tell you Both methods, all sizes, in

LINE OF QUALITY EMPIRE CREAM SEPARATORS

You know there are two standard methods of cream separation—the cone and the disc.

Each differs considerably from the other.

The cone has some special features that make it peculiarly suitable for the requirements of some people, while the disc has features that make it more suitable for others.

You see, it all depends on your requirements what method is best for you.

So go to our agent and tell him your requirements—and he will tell you the method that is best for you.

He will tell you the whole truth about the two methods. The Empire line contains both cone and disc machines, and it is to Empire agent's advantage to sell you the method that will give you utmost satisfaction, whereas the object of the agent of a one-method line is to sell you his style of separator regardless of your needs.

Both the frictionless Empire (cone method) and Empire Disc are made of Empire Quality materials, by same expert workmen, in the most modern separator factory in the world.

The Frictionless Empire is the original cone method and the most famous separator in America. It has such exclusive features as Ball Neck Bearing and Three-ball Bottom Bearing. No closed bearings on spindle,

where others have one, generally two. Easiest-to-turn, easiest-to-clean, closest skimmer. No other cone separator in the same class.

The Empire Disc is the champion separator of Europe, with addition of several Empire patented improvements. The bowl weighs twenty per cent. less than any other disc bowl of same capacity with central distribution feed. Discs are easily cleaned. It runs easily. It is best value on the market of any disc machine.

But you will want to read our Free Dairy Book, which explains both machines in detail, so get your pen right now and write us a post card for your copy. It also tells about a guarantee as good as a government bond, and a generous Free Trial Offer.
