

**NEW IMPROVED
DE LAVAL
SEPARATORS**

DAIRY SIZES
\$45.00 to \$175.00

There is no difference in the quality of the ten styles and sizes of De Laval separators; the difference in price simply indicates a difference in size or capacity. Uninformed buyers are sometimes induced to buy an inferior separator because it is offered at a price below that of the prevailing size of De Laval in use in the district. If they had ascertained by test the actual capacity of the machine purchased they would have learned that for less money a De Laval of equal or greater capacity and infinitely superior mechanical construction could have been purchased.

Intending purchasers are advised before buying to secure the free trial of a New Improved De Laval through the Company or its nearest agent and thus familiarize themselves with the standard by which creamerymen and dairymen of international repute have measured every other cream separator and found it wanting.

Do You Make Good Butter?

Why not keep it good by using Cane's New Idea

BUTTER TUB

to pack in this season? They cost no more than the ordinary kind, but give you better satisfaction and keep good butter good longer than any other wooden package.

Ask for them and give them a trial.

All live grocers have them or will get them for you.

Manufactured only by

Bruce's Giant Yellow Intermediate Mangel

FREE—Our 104-page illustrated catalogue of Vegetable, Flower and Farm Seeds, Bulbs, Plants, Poultry Supplies, Implements, etc. Send for it. ESTABLISHED 60 YEARS.

John A. Bruce & Co. Ltd., Hamilton, Ont.

This grand Mangel, which we introduced in 1891, is without a doubt the favorite with all cattle men at the present day. The large size of the roots, their uniformity, handsome shape, bright, smooth yellow skin, flesh of the most solid texture, nutritious and splendid keeping qualities, make it one of the most valuable introductions of recent years. While in point of size they will not equal the best of the long varieties, yet in yield per acre they frequently produce as much and in richness they far exceed the best long varieties, added to which they are much more easily harvested, about half of their length being above ground. We have kept our stock fully up to the original high standard, and it will pay every grower to procure our grand strain of this unequalled variety. $\frac{1}{4}$ lb. 10c.; $\frac{1}{2}$ lb., 15c.; 1 lb., 25c. Postage extra, 5c. a lb. to Canadian points, and 16c. to United States and Newfoundland.

Amatite

ROOFING

Will End Your Roofing Troubles

If you will write to-day for a free sample of "Amatite" the end of your roofing troubles is in sight. After you have submitted it to every test that you can think of, you will be prepared to order it not only for your new buildings, but for your old roofs as well. You will find that it is cheaper to cover them with Amatite than to continue painting and repairing them.

We make a strong point of our "Free Sample" offer because the smallest sample of Amatite speaks for itself. It is more convincing than yards of talk.

There are all kinds of ready roofings on the market—so-called "rubber roofings," so-called "guarantee roofings," so-called "sand surface roofings."

The "rubber" roofings are no more made of rubber than a cow is made of saw-dust. The "guarantees" that are promiscuously handed out with many brands are

hedged around with so many provisos that it will take three lawyers to dissect them and find out what they are all about. The "sand surface" has little or no protective value.

The point to remember is that all of these roofings have to be painted every year or two to keep them tight. In other words, it is the paint that protects, and not the roofing. If a man will sit down and figure out exactly what this paint costs, he will find that it is more than the roofing itself. Amatite, on the other hand, has a surface of real mineral matter and we sell the goods on the broad statement that you need never coat or paint this roofing.

You can lay Amatite on a roof and then forget all about your roofing troubles. No painting, no coating, no worry. The man who puts Amatite on his buildings is insured against leaks and trouble for many years.

Free Sample

If you have any doubts about the matter and want to investigate our claims, send for sample and booklet to-day. The sample tells its own story; the booklet is written for practical men. It hits straight from the shoulder.
