Cat Breeding as a Business for Women Many instances illustrating the pos sibilities of cat breeding as a business for ladies could be given, but I shall confine myself to briefly reciting the experience of one lady in New Jersey as showing what intelligent breeding, hard work and fair dealing will accomplish. When but a girl in her teens this young lady made up her mind to take up long haired Persians, but was not in a position to put up but was not in a position to put up the necessary money to start, so keeping her own counsel and biding her time she patiently waited for an opportunity to offer itself. Finally in looking over the "For Sale" "ads" in a New York paper she saw a litter of long haired Persian kittens advertised at a very low price and not ter of long haired Persian kittens advertised at a very low price, and noting the name and address she started for New York the next morning ostensibly for the purpose of purchasing a spring hat with certain money her father had given her. That evening she returned home with a kitten, but without the hat. Her next step was to sell a finely educated parrot which she had raised and invest the proceeds in a female cat or two. MANY SMUGGLED DIAMONDS. Once They Are Stolen at the Mines They

Although the weight of diamonds and recious stone imported into the United States is never given in the official reports, yet some information on the sub ject is now being prepared by dealers in the Maiden lane district. It was said the Maiden lane district. It was said some time ago by an officer of the Diamond Importers and Cutters' Association that the gems smuggled into this country are worth as much as those that come through lawful channels. By keeping careful records of weight as well as values, it is suggested, something will be learned as to the amuggling operations. A clandestine traffic in the De Beers gems is known to take place, although a most elaborate system has been devised to prevent thefts from the mines and the works, in compounds under strict supervision. Some months ago an inspector at the works committed suicide after it was learned that he had been trading in diamonds with an unlicensed broker. More recently the finding of diamonds on Guano Island, off the African coast, caused much excitement, it being heralded at first as the discovery of new mines containing stones of quality equal to the best of the De Beers mines. Investigations showed that the stones on Treasure Island, as it was then called, had been taken from the De Beers works and buried in the island, awaiting the time when they could be safely taken away by the thieves, who try to smuggle their treasure into various countries.

The smuggling of stones coming from this underground traffic is one of the elements which add to the difficulties of the customs officials. some time ago by an officer of the Dia

The Comic Side of Crime

It is a generally accepted fact that one an see humor in most things if one looks deep enough, and certainly Mr. Harry furniss, in the second of his articles, which he contributed to the November Strand Magazine, under the above title, is able to find plenty of fun even among crimes and criminals. Mr. Furniss, who was formerly cartoonist-in-chief to "Punch," illustrates his own stories very effectively, though there is a sketch of the late Charles Peace which would

doubtless make that notorious murderer feel glad he was hanged could he only see it. The following is, perhaps, rather a queer story without much humor, but it is worth quoting if only to emphasize the futility of choosing juries in the haphazard way still followed in England:

A man was tried on evidence irresistible "to anybody but a jury" for a most terrible murder. He had slain his father doubtless make that notorious murderer
