### ST. GEORGE'S DAY IN ST. ANDREW'S

The memory of England's Patron Saint was duly honored last Sunday morning, in our local Anglican Church. A good congregation gathered in the Sacred edifice, appropriate hymns were sung, and an inspiring sermon was given by the Rector of the Parish, the Rev. Mr. Bate.

Although the day previous—Saturday—was really England's feast day, for her Saint, it is more likely, the day was observed as here on Sunday throughout the vast Empire upon which "The Sun never sets. The wide world over, wherever an Englishman found his dwelling place, their thoughts of the glorious past, and England's Martyr Saint, would be sure to enter.

Christians in the legions of Rome, had introduced the Gospel faith among the Ancient Britons, and it is asserted in histories of the Early Church, that St. Paul himself extended his missionary labors to what is now England when he travelled "to Spain and Gaul, and the Isles of the West." Certain it is, that in the very first centuries, a Christian Church found place in the Motherland. St. George was one of the Christian host, and during his short life, displayed all the qualities of a noble, faithful Christian Soldier. Born in the year 270 A. D. his career ended, as a glorious Martyr, in the year 303. He chose rather to obey the voice of Heaven, than the voice of a persecuting Roman Ruler, whose authority he defied. He gave up his life, but his name will never die while an Englishman lives to hold up the red cross of St. George, on its field of white, in the banner of England.

The well loved Rector of St. Andrew's, chose as his text the words found in the 2nd Chap. of the 1st Epistle of Peter, at the 17th verse "Honour all men. Love the Brotherhood. Fear God. Honour the King." The opening hymn was the beautiful 255 and the National Anthem, hymn 253, closed the service. A deep Spirit of reverence, earnestness, and enthusiasm, was shown through out the whole service.

### MISTAKES COST MONEY

The securing of Electric Power for the Town of Newcastle is a matter which is now receiving the attention of our Town Council. This matter is a most vital one, and one which requires careful consideration in every minute detail. The present Power Plant has about outlived its usefulness and for the past few years large deficits have been made in operating the plant. It is thought by some that there is no necessity for such deficits while others are of the opinion that it is impossible to operate the present plant without making a deficit. This is a matter which also should receive the careful consideration of our Mayor and Aldermen. Notwithstanding this difference of opinion, the time is not far distant

street lights to burn all night instead of as at present, and the Light Committee promised to give the matter consideration.

The Mayor enquired if the Council had any definite information regarding the possibility of the Town securing Hydro-Electric Power, and Ald. Durick said that while the Council had no definite information, a committee from the Commercial Club had taken the matter up with the N. B. Water Power Commission and the information they had received was encouraging. It was moved by Ald. Durick, seconded by Ald. Sargeant and carried that the Light and Water Committee be a Special Committee to act in conjunction with the Commercial Club in considering Hydro-Electric matters.

On motion the Council adjourned.

### YOUNG-ADAMS AT OPERA HOUSE

H. Wilmot Young and Marjie Adams the ever popular stars with Newcastle theatregoers are returning to the Dime Opera House and presenting three performances. The first being on Wednesday night April 27th. A beautiful Irish Comedy entitled "True Irish Hearts" a comedy that is brimful of pretty songs and dances. Both Miss Adams and Mr. Young are seen to advantage in the play, and in addition to the play there will be six big new vaudeville acts, making the show continuous with out waits between acts.

On Thursday afternoon they will present the old favorite drama "Uncle Tom's Cabin." This is a play that never grows old, and Miss Adams is a star in the role of Topsy.

On Thursday evening, which will positively be the last appearance of the Company, they will present a comedy drama in four acts "The Trail of the Lonesome Pine."

This is one of the best comedies now being presented to the Canadian people.

The voice of the Commercial men is. The Young Adams Coy is the best playing this season. Be sure and secure your seats early they are now selling at Dickson & Sons.

tant when other methods for obtaining Electric Power for our town will have to be looked into. At present, negotiations are going on with the object of securing current from the Hydro-Electric Development on the Nepisiquit River in Gloucester Co. This may or may not be a feasible solution for the present condition of affairs. It is an acknowledged fact that Newcastle made a mistake, a number of years ago, when it was decided to establish the present Electric Lighting System. This mistake has cost the town thousands of dollars, and it behooves one and all to be most careful, that in future a similar mistake will not be made. To avoid such a mistake it would be advisable to secure the services of a capable Electrical Engineering Expert to guide the town in any action which it might take. By doing so, the possibilities of making mistakes would be eliminated and the money spent for such a man's services would be well spent, and would receive the hearty approval of all citizens. Furthermore, the opinion of the citizens should be considered in this question and before any definite action is taken in the matter the ratepayers should be made conversant with all the details, and they should be given an opportunity to express their approval or disapproval of the matter, by the holding of a plebiscite.

We have a Water Power Development on our own river, which, if enough pressure was brought to bear, would be developed and would place us in a much better position than we otherwise would be in. This fact should not be lost sight of, and it almost would appear to be a certainty that if we go headlong into this Nepisiquit proposition without the guidance of a capable engineer, we will forever eliminate the prospects of having our own Water Power developed. MISTAKES COST MONEY! AVOID THEM.

What the town wants is POWER, an abundance of it and at as cheap a price as it is possible to obtain it. Industries will then come to our town, which we are sadly in need of. Then and then only, will our town be considered by industrial enterprises.
