the gravel free from all foreign sub be i-sued to cut the posts required for stances and in mixing it in the correct this fence on Dominion lands. Woven Wire Fence.

The fence will be of woven wire with sults are infinitely more satisfactory fifteen horizontal strands, making the faces even and a half feet high. It is that if done by contract. It is estimated that the walls will bear It is estiweight of two tons to the square foot at the base of the foundation and are

hus of ample size to support the mmense building to be crected.

In putting in the concrete foundacion this winter great care was exercised that the concrete should not be affected by frost before it set. Materials Heated. For mixing the concrete a large puilding was erected through which

cassed some 700 feet of 1½ inch stean pipes. The gravel, after passing hrough the crusher, was carried into this heated building, where it was carefully screened to remove all sand The sand was heated b ore being used, and warm water was sed in mixing the concrete. In this building 130 cubic yards of concrete ould be mixed at one time. bat part of the wall being built was rected a house with four lines of team pipes, which kept out the frost The warm concrete was placed in posi-ion and kept housed for six days unthe concrete had sufficient time to t. The results of this careful catment were as good or better than the foundation had been built in

It is estimated that by the middle of May the foundation of the Parliament buildings will be complete and eady for the steel work. All the steel required in this building has been ordered from the Dominion Gridge Company, of Montreal, a he first shipments are expected arrive here early in May. The st ork will be carried to a considerabl

To Use Calgary Sand Stone. The building is to be constructed of algary sand stone, with one course of granite at the bottom. The de pariment are now considering the tuestion of procuring this stone, but orders have been placed for any of it as yet. The walls will also be started this year and carried as an is possible, but the work connected with the cutting and laying of the stone is extensive and will converted. tone is extensive and will cccupy onsiderable time. It is safe to say hat the building will not be complet-

Ann Street, Toronto, Aug. 13, 1907.

MONTREAL

"Dear Dr. Slocum,-I feel it a duty and pleasure to testify to the benefit I have received from the use of your wonderful remedy. Psychine. A few months ago while travelling in New Ontario onducting special meetings I contracted a very bad cold, which gradually developed into brouchitis of the worst form. I was advised to try Psychine, and after using a few bottles I was completely restored to health. My voice, since using Psychine, is stronger and has much more carrying power than it had before I had bron chitis, and the vocal cords do not tire with speaking. I strongly recommend the wonderful remedy to all sufferers from bronchiti nd other throat and lung troubles. P. TILLER, Captain Salvation Army
