Have You Made Your Will?

By RUTH CAMERON.

RUTH CAMERON.

Did you ever make a will? I wonder just what proportion of my readers will give a mental "No" to that. I don't doubt it will be a big majority.

"Why should I?" most of them will add mentally. "I haven't any property worth making a will about."

Do you know, I don't think that is true of one per cent of you.

Little Things Become Valuable When Sentiment Is Attached.

True, you may not have any real property in the sense in which we usually employ that word, but have you certain little personal belongings which would mean a good deal to your friends and relatives if they came to them by your express wish, with all the added value of the sentiment that would thereby be attached to them?

The Hearing Grandmother's Voice Again.

In a family of which I know, the grandmother died recently. She hadn't any considerable property, but she had the inevitable little collection of treasures, and she made a will leaving each of her children and grandchildren some definite articles, together with some little personal message. You can't imagine how touched and pleased they were, when the will was found. It was like hearing the little grandmother speak again. And though they are not people to whom the simple treasures would mean much intrinsically, I know they mean a great deal, both because they were grandmother's, and because they represent her individual thought of them.

Will's Prevent Sordid Quarrels.

A definite will sort of prevents any possibility of ugly, sordid quarrelling. Quarrels of this sort sometimes make permanent breaks in families. Of course, one can say that no one with a spark of decency would quarrel over the belongings of a person whom they loved. But the point is that they feel that their quarrel is with the living, and not with the dead. They may love the dead ever so dearly and yet resent injustice on the part of the living. True, it would be kinder to the memory of

the dead to give up anything rather than enter into a quarrel which would have grieved the loved one, but the trouble is that each party thinks that the other side should feel that way too.

How much better to avoid any such possibility by some definite expression of one's wishes. Even if this were not legally endorsed, those families would be happy to follow it. Which does not, of course, mean that a person with any considerable property should omit to get such endorsement. On the contrary.

Milady's Boudoir.

THE DANGEROUS TAN.

Tan is rather a delightful thing—out in the open, and in company with the cool white linen of sport attire; but tan with a flimsy evening gown or a formal afternoon toilette is another thing entirely—and by misadventure the woman who adores lavender and whose skin burns easily will look a fright in her most cherished gowns.

And the complexion exposed recklessly to the weather all summer will never again get back its delicate milk and rose tint, for sunburn inevitably toughens and coarsens the skin and cosmetics must take the place of a natural rose flush before very long.

So the wise maid anticipates sunburn and prepares to combat it at the season's very beginning.

Before going out on the blazing beach in one's bathing costume the face, neck and arms should be anointed with cold cream, applied liberally and well rubbed into the pores. After dabbling over the creamed surface with a soft towel or a bit of absorbent cotton, sprinkle with pure talcum to "take off the shine" and finally rub down with a piece of chambray skin.

Thus armored the skin will resist the onslaughts of the sea, sun and wind, for cuticle protected with cold cream and covered with talcum does not burn readily. If many hours are spent on the sand it will be well to retire to the bath house during the period and repeat the cold cream and talcum treatment.

If the complexion is naturally fair and delicate a veil should always be worn in the sunlight, particularly if a brisk breeze and glare from the water accompany strong sunshine. Brown veils are the best preventives of sunburn, but a white veil, draped over a wide-brimmed hat, will be excellent protection.

It is not for what he had that his absence makes us sad, it was not the touch of skill in the hands forever still. That we miss, who stayed behind. But the gentle deeds and kind that they did to smooth our way. It's the voice that used to say Words of comfort and of bliss. And the vanished smile, we miss.

25 Brls. Parsnips 3 " Cranberries

Soper & Moore Wholesale Importers and Jobbers.

THE THINGS WE MISS.

When a friend we've loved has gone, Said farewell and traveled on, What is it we sigh to know, We who struggle still below? What is it he took away That we yearn for, day by day? Not the luster of his fame? Or his sign of grief displayed For the money that he made?

Do we mourn a friend because He had earned the world's applause? When his soul has left the clay Do we miss him, day by day, And is all our sorrow for The few medals that he wore? Was his life so small and cheap, Now that he has gone to sleep, That we miss, with him away, But the glitter of display?

Oh, the things we miss, when one That we loved has traveled on, Are not gold and earthly fame, Nor the glory of a name, But the handshake that was true, And the cheerful smile we knew, The glad voice that used to speak Words of courage to the weak, And the strength that used to share All the griefs we had to bear.

It is not for what he had That his absence makes us sad, It was not the touch of skill In the hands forever still. That we miss, who stayed behind. But the gentle deeds and kind That they did to smooth our way. It's the voice that used to say Words of comfort and of bliss. And the vanished smile, we miss.

Items of Interest.

The average life of an elephant is 105 years.

In a mile of railway there are over 2,000 sleepers.

The best time for exercise is about two hours after a meal.

Potatoes in Greenland never grow larger than a marble.

The life of a tradesman is about two-thirds that of a farmer.

Torpedoes are said to have been invented by an American in 1777.

One pound of Indian tea will make 179 strong cups of beverage.

Over sixty miles of tunnel have been cut out of the Rock of Gibraltar.

It is estimated that a lightning flash is visible only 1-20,000 part of a second.

The orange tree is very fruitful, a single tree will produce 20,000 oranges.

The Congo River has, at one place, 32 waterfalls within a distance of 154 miles.

Greenland never had a printing-press until 1861. The first was imported by Dr. Rurk.

A woman's chances of getting married are only 2½ per cent. when she reaches her fortieth year.

The doll is probably the most antique of toys. It has been found inside the graves of children of ancient Rome.

Sheep thrive best in a pasture where moles are numerous. The mole-holes serve to drain the land.

Divers' boots weigh 20lb. apiece. The helmet weighs 40lbs., and the diver carries 80lbs. weight besides.

The bones of an average male skeleton weigh 20lbs., while those of a female are about 6lbs. lighter.

The growth of girls is greatest in their fifteenth year, and that of boys in their seventeenth year.

An injury to the tongue is repaired by Nature with more rapidity than is the case with any other part of the system.

A great authority on fish estimates that every square mile of sea is inhabited by 120,000,000 finny creatures.

The whole of the land on the globe above water-level, if shovelled into the Pacific Ocean, would fill only one-seventh of it.

The idea that alcohol keeps out the cold is wrong, as mountaineers have found by repeated experience that the opposite of this holds true.

Though willow grows in wet places, it is naturally one of the driest woods. It contains only 26 per cent. of water. Oak contains 34 per cent.

The Escorial, Spain's royal palace, contains a cathedral, a monastery, three colleges, three chapter houses, three libraries, and nearly 2,000 apartments in addition.

The rate at which a Zulu can travel upon emergency is astonishing. Some will clear as much as fifty miles in six hours. Eight miles an hour is an ordinary pace.

The marigold is a little weather prophet, for if the day is going to be fine it opens about three or four

o'clock in the morning; but if wet weather is in store, the marigold does not open at all.

Natal's hippopotami are extinct. The last herd was protected by the Government on a reservation near Durban, but did so much damage to the surrounding sugar plantations that orders were given to have it destroyed.

The first use of Niagara's power was made in 1725, a primitive saw-mill being operated. Nothing more was done until 1842, when Augustus Porter conceived the idea of hydraulic canals, and in 1861 one of them was completed.

The term "Dragoon" was first applied to a regiment of mounted infantry, so called from the dragons, or short muskets, with which they were armed. The head of a dragon wrought on the muzzle of the muskets seemed to spit fire, and at one time was depicted on their standard.

The King's Royal Rifle Corps (the old 60th), one of the most famous regiments in the British Army, was once known as "The Royal Americans," having been recruited almost entirely in New York and Philadelphia. The present 2nd Battalion is also of American origin, having been raised in North America in 1758.
