Mr. and Miss Amateur Photographer.
Which do you consider the greater necessity—speed or quality. Speed in most cases produces slipshod methods with unsatisfactory results. The firm of S. H. Parsons & Sons is not of mushroom growth, established in 1871, and has been developing and printing films for amateurs ever since they were placed on the market in the year 1888. You should use the A.P.M. Film, because of its extreme speed, wider range of exposure, and finer printing quality than any other on the market. A trial will convince you that our up-to-date methods and appliances for developing and printing your films are the very best.
S. H. Parsons & Sons,
Corner Water and Prescott Streets.
