Here, again, the Wilson administration has made the United States an honorable exception to the conduct of the powers. Here we seen an up-to-date example of the intrigues of diplomacy which run directly against the people's will. That our own history, as well as that of other nations, contains many instances of this kind is not to be doubted. Purity in food, lower cost of living these are the demands of the day.

Baking Powder

Pure food is health, and health is economy itself. We cannot have health without healthful food.

The most healthful foods are the quickly raised flour foods — biscuit, cake, muffins, crusts and other pastry, when perfectly made from wholesome ingredients.

Dr. PRICE'S baking powder makes these foods in specially attractive, appetizing and wholesome form, and for both economic and hygienic reasons, such food should be more largely substituted for meat in the daily diet.

But bear in mind that alum, or unwholesome baking powder, can never make pure, wholesome food.
