Now and again the Dominion Parliament puts on a spurt and does a little work. But notwithstanding the proximity of the Easter holidays, the Government has decreed that there should be a few days of play now. When the House adjourned last night it was resolved not to meet again till Wednesday next, as Tuesday is Lady day.

THE London ADVERTISER complains that the Dominion Government "taxes knowledge." We don't see why the ADVERTISER should kick against a tax that bears so lightly upon it.— Hamilton Spectator. gainst a tax can all amilton Spectator. Have you never noticed that a great many copie make the most fuss about matters that o not concern them?—[Toronto World.

We accept the compliment. Our disinterestedness, however, would not allow us to remain silent in view of the fact that the Dominion Government does, in some measure, add to the natural difficulties which our esteemed contemporaries experience in obtaining what they at any rate so much need.

IF ANY proof were needed to show the advantages of dwellings built on sanitary principles, and provided with healthy surroundings, the evidence can be found in the annual report of the Peabody Trust, the organization started by a wealthy philanthropist for the maintenance of good homes for the working classes in London. The report shows the birth rate in the hesitate to pronounce very emphatically on houses kept by the trust to be 8.72 per 1,000 above the rest of London, and the death rate nearly 1 per 1,000 below the average, while the infant mortality is only a little persons. The average earnings of each family are about \$5.75 per week, and the average weekly rent about \$1.90. average weekly rent about \$1 20. The rate per room is 52½ cents per week.

THE big railways continue to swallow up the small concerns, despite legislative enactments to the contrary. In Canada, the G. T. R. and C. P. THE PRISON COMMISSION.

It cannot be said that Premier Mowat opinion, though he moves more slowly at times than his more ardent supporters think seems to act on the principle of "slow but sure." He has given another indication of the announcement made by the Premier on Thursday night, to the effect that he will at an early date appoint a Prison Commission. The consideration of the whole question of the classification of prisoners, of the employment of those under sentence, the most effectual means to deal with juvenile delinquents and first offenders, and how youthful lawbreakers can be reformed advantageously to themselves and the com-munity, whether in industrial schools, reformatories, or in common jails, may well be remitted to a commission capable of discovering and applying the best possible methods now pursued, or which can be im-

In the matter of intelligent and humane treatment of the blind, deaf, dumb and insane, it is admitted on all hands that and barley malt 40 cents per bushel of 24 Ontario leads the countries on this continent, and stands second to none, not even Great Britain, in the old world. There is no reason why steady progress should not also be made in dealing with criminals and the prevention of crime. A few weeks ago the question was forcibly reasoned out before the Ontario Premier, by the Prison Reform Association, and he now shows that it has not escaped his memory. The commission will be appointed in due course, and we hope and trust its labors will be thorough, and that much good

The great problem is how to prevent the of criminals, and in that connection to discover how best to deal with the young who have taken a first step on the downward road. This subject was ably discussed by Warden Lavell, of Kingston Penitentiary, in a recent public address. He said that in that institution "there are now 584 convicts. More than 60 per cent.

Think of it," said the Warden, "100 boys undergoing imprisonment for the commission of crime. The cause of this crime was neglect in early you.n, dissipated parents and the lack of individual knowledge. Very few men who had a knowledge of a trade came there."

This is a lamentable condition of affairs,

another plank of their plactors are the principles of tariff reform as enunciated by President Cleveland in his official utterances, and we demand the abolition of the customs tax on raw material for the manufacturers. Our diversified industries should no longer be compelled to languish under the oppress on of a war tax to enrich an overflowing treasury and gratify the cupidity of unscrupulous legislators. In these two particulars the Democrats

of Rhode Island are in hearty accord with their party, and the fall elections in several States-notably in Ohio and Iowa-proved More recently further evidence of the feeling of the country was given in the State 46 different railroads and branches, include of New York in the result of the municipal elections. The Philadelphia and Reading elected Democratic mayors, including all cities of the first rank, while only six cities the same State, and the Baltimore and Ohio elected Republican mayors, the most imcontrols ten local lines, and the absorption still goes on. Unless the lines are taken election of President Harrison ten cities have changed Republican for Democrat rule, while only one has been lost to the Democrats, and that is said to have been due to the treachery of Governor Hill's friends. In all these elections, it is stated, national politics were made an issue, one of the chief matters discussed bedoes not respond to the voice of public ing the state of the country under protection. It would appear, therefore, that the Republican majority at Washington does desirable. The Ontario Liberal leader not represent the sense of the country in maintaining a high tariff, and especially a tariff which bears heavily on the farming his anxiety to promote the public interests in the manner indicated by those who make a study of social problems. We refer to publicans to fortify themselves by making triends of at least one of the discontented classes, the farmers. The sub-committee of that committee has made a report of startling significance and should their recommendations be adopted by Congress the consequences to Canada are destined to be very serious. Following is a partial list of the duties proposed by the sub-committee

The London Free Press goes as far as to admit, in speaking of the Rykert letters, that, "to say the least, they are highly injudicious." "Highly injudicious" is a very mild way of putting it, but it is a great deal for such a dyed-in-the-wool Tory as the Free Press to be obliged to admit. You can almost hear the tears dropping from its eyes with a dull and sickening thud as the wheels of the press go round, grinding out this reflection on so shining a light in its own party.

At the age of three months a rash (which afterwards proved to be ezema or sait rheum) made its appearance on my face. A physician made its appearance on my face. A physician was the cause; was called. Ho said teething was the cause; better I would have no control of them. The disease continued in this manner until I was seventeen years old, and one day in January 1879, I read an account in the Tribune of your Curnoura Remedies. It described my four Curnoura Remedies. It described my case so exactly that I thought, as a last resort, to give them a trial.
