This challenge is intended directly for the English cutter Verve, as the owners of that vessel have boasted that she can beat anything on fresh water. Editor World: I see by your issue of Monday that Capt. Kersteman thinks his setter Rudder was handicapped in the swimming race at the island last week. I am surprised at Capt. Kersteman entering his dog in a race knowing her to be in pup, and thereby staking the reputation of so famous an animal, but I am prepared to give him satisfaction at any time he may wish, the stakes to be from one delicate. wish, the stakes to be from one dollar to one hundred. I would like it to be stated also that Rudder was not only just beaten, as my dog Jack finished easy, with several lengths to the good.

Come to Time, Mr. Thomas, Editor World: The challenge given out by Mr. Thomas against any setter dog to a swimming race will be accepted by the writer if the first conditions are complied with, viz., "put up the stakes at the place mamed," and they will be met. Bruno.

Another of those mean remarks for which the Hamilton Spectator is becoming notorious, appeared in that paper yesterday. It was to the effect that Fred. Goldsmith intended to give up the saloon business in London and open here, the insinuation being that that affords a reason for his favoring Toronto in his umpiring decisions. Goldsmith has certainly gained favor in this city and for these reasons that, unlike the Hamilton unpires, he is thoroughly impartial, prompt and decisive. No other umpire that has been seen on the Toronto ground has given evidence of possessing umpire that has been seen on the Toronto ground has given evidence of possessing the same qualities to so satisfactory an extent. -The past six months has been a very uccessful season for the Waterloo House

acing sufferers from catavrh at a great sadvantage in the event of a cholera visita-

disadvantage in the event of a cholera visitation.

Catarrh is a contagious disease. It is a
muco-purulent discharge, caused by the presence of a vegetable parasite in the lining
membrane of the nose. These parasites reproduce themselves in great multitudes, and
each generation is more virulent. They spread
up the nostrils and down the fauces or back of
the throat, causing ulceration of the throat,
up the custachian tubes, causing deafness;
burrowing in the vocal cords, causing hearseness; usurping the proper function of the
bronchial tubes, ending in pulmonary consumption and death.

The reason that catarrh has become so prevalent a disease is entirely due to the fact that
it has not been understood. Physicians have
been unanimous in treating it as a simple
inflammation of the membrane and have signally failed to produce cures, but microscopic
research has revealed the presence of the
parasite, and now sufferers from this disease
who appreciate the fact that it is by way of
its secondary effects a most deadly one, will
be glad to learn that a wonderfully successful
treatment has been formulated, whereby the
most aggravated cases of catarrh have been
permanently cured in from one to three
simple applications. The interesting pamphlet descriptive of this new treatment, from
which we glean the above, is sent free to all
applicants on receipt of stamp by A. H. Dixon
& Son, 305 King street west, Toronto, Canada.
