THE CATTLE EMBARGO.

Mr. Gardner's Answers Not Satisfactory—The Times on the Subject.

LONDON, April 24.—The Rt. Hon. Herbert Gardner's statement in the House of Commons yesterday to the effect he cannot remove the embargo against Canadian cattle has caused a lot of talk, and much dissatisfaction is expressed at the way in which the hon. gentleman is juggling this question. His answers to the questions put to him satisfy neither the friends of Canada nor the friends of the English farmer.

The Times says that the British farmers will see in the statements of the President of the Board of Agriculture much reason to fear an early withdrawal of the restrictions upon which they now believe the security of their herds depends. The farmer has all to lose, while the Canadians run no risk whatever and have everything to gain. If the case were reversed, adds The Times, the gravest doubt might safely be ventured that the Colonial Government would ever listen for a single instant to the pleadings of the British exporter. It is to the misfortune of the British farmer that every attempt to exclude from the country the terrible scourge among cattle known as tuberculosis, is capable of being represented as a disguised attempt to obstruct and set aside the well-meant intentions of those who are desirous of encouraging a spirit friendly to the development of free trade.

The Times says the Canadians complain very much of Mr. Gardner's blindness to the sustained fact that the severest test which the Canadian herds have been put to has failed to show that they even had a taint of disease. In conclusion, The Times recommends the Canadians to repeat their efforts of last season and send over the largest possible number of healthy stock upon the opening of the cattle shipping season in the hope that the renewed special examination by the British experts will remove all suspicion and that Mr. Gardner will then be compelled to raise the embargo and dispense with the slaughter of cattle at the port of entry.

Cattle Shippers Expect No Change.

MONTREAL, April 24.—Cattle exporters here are very indignant at the British Government's refusal to withdraw the embargo on Canadian cattle in spite of conclusive evidence of absence of disease here. General opinion is politics are at the bottom of it. Canadian farmers cannot compete with Americans in dead meat traffic. Loss of live stock trade means loss of £2 sterling to Canadian farmers on each head of cattle exported. Mr. Gardner's object in maintaining embargo is said to be to secure the Liberal Government the support of the Irish farmer, who is distinctly benefited by exclusion of Canadian stock from British markets. Feeling among shippers here is no change will be made while the Liberal Government remains in power in Great Britain.

We always keep a bottle in the house ready for any emergency."

Tips From Wall-Street.

The market closed firm on shorts covering. London bought St. Paul to-day.

Ryan & Co.'s gossip: Market steadier, with leaders in industrials more hopeful. Sugar strong on good demand for both accounts on official assurance from Voorhees that tariff will not pass without duty on sugar. The talk is bearish on B. & Q., and gossip somewhat bearish on Gas.

Henry A. King & Co.'s special wire from Hubbard, Price & Co., New York: New York failed to respond to the better prices abroad. The opening was irregular and generally lower, but fairly steady. Sugar was firm during the morning on the conviction that no tariff bill can pass the Senate which does not include the protection of sugar. Chicago Gas opened feverish and lower, subsequently improving on the same confident buying which has characterized the trade in this stock for days. Distillers trust was sold from the very start by the bears on the annual report of the company and in an effort to catch stop-orders. Towards noon the stock began to act badly, stop-orders were reached and the price declined to 28, a loss of 3 points from the opening. The railway shares were nearly all lower. The extreme depression in the Chicago wheat market this forenoon was considered sufficient reason by the bears for attacking the grangers and they succeeded in dislodging some long stock. Mo. Pacific and N. Pacific preferred, upon which numerous bear points circulated, and which were expected to be among the leaders of the decline, have been strong, the former particularly so. W.U. was a shade easier on the apprehension that possibly the depression might affect the rate of dividend despite the denials by officials of the company.
